BUSINESS has continued quaet in this branch of trade, with few customers in town, and orders 1) trade, with few customers in town, and orders coming in but moderately. Still there is no failing off in sales as compared with last year, though the amount of stock to be wintered over will in most articles greatly exceed that held twelve months since. For the last few weeks the imports of Dry goods into Montreal shew a marked decline as compared with last year, the decrease for the month of November being over \$25,000 in Cottons, Woollens, and Silks and Velvets.

Among the goods, which are in excess of require-

and Velvets.

Among the goods, which are in excess of requirements, may be mentioned Striped Shittings, Demins, Ticks, and generally ordinary Cotton goods. Of Grey Cottons, particularly low priced, and of low priced and medium Prints, the supply is short. Among articles of which there is a scarcity may also be noted blue and brown Horse Blankets, for which there appears to be a large demand and not a pair to be had.

THE HARDWARE TRADE.

FEMIL fall trade may now be considered fairly at an end, and business during the past week has been end, and business during the past week has been of a very limited character, unmarked by anything worthy of especial mention. Prices are unchanged for the most part, the only alteration to be made being in Cut Nails. In these, in consequence of the large stocks of imported Nail Iron held by the merchants, and the report current that the agreement heretofore existing among the Ironmaters has been broken by one of them, the price has fallen to \$3.5°. Sales to a small extent are being made at this figure, but, in general, buyers are holding off, as a much further decline is considently anticipated.

PERFECT tranquility reigns throughout in this line.

I line.

The wholesale merchants say they are doing nothing, the brikers say they are doing nothing, and the jobbers say they are doing nothing.

In fact there appears to have been almost an entirecessation in business for the past few days. The country merchants have generally laid in rather large stocks, and the reads in the country at present are in such a condition as to seriously interfere with trade, and consequently prevent the merchants from relieding themselves from their present stock. A few days of good winter weather will soon put this state of things to rights, and business may be expected to start into activity again.

MONTREAL PRODUCE MARKET.

FLOUR-We have to note diminished receipts and a very restricted business. Outward chiercent I a very restricted business. Outward shipments have mostly ceased, and the local demand has been triffing, owing in a measure to the defective condition of the country reads. The higher grades only find buyers in broken lots. Superime has been a slow sale, notwithstanding comparatively limited stocks, dealers being disposed to lay in supplies only as needed for actual use, and while prices have ruled pretty steady, the market is generably languid, and the turn in favor of buyers. We quote S7 to \$7.10 as closing rates for fair to good, there being stome low-grade Super on the market at inside figures, without engaging much attention. Limited sales of No 2 and finat about \$6.75 and \$6.50 respectively may be noted mostly in broken lots.

BAG FLOUR.—Receipts have been trifling, and operations mainly confined to supplies from the local mills. Fair to choice samples command ready sale at \$3.80 to \$3.90 per 1/2 lbs.

OATMEAL.—Continues in steady demand at \$5 to a very restricted business. Outward shipments

\$5.10, the limited receipts being freely taken as offered e rates. EAT.—Since close of navigation receipts by cars

at these rates.

WHEAT.—Since close of navigation receipts by cars have been direct to miliers, and few sales can be noted. Nominal rates for U. C. Spring are \$1.50 to \$1.63
PEARE—Transactions are confined to occasional car loads from store at \$1.90 to \$1.92 per 66 lbs.

OATS.—Since close of navigation transactions have been lew and truling, nominal rates are 32c, to 33c, per 32 lbs.

BAILLY is purely nominal in absence of transactions.

per 32 bs.

Ballly is purely nominal in absence of transactions.

Pork —The continued decline both in New York and in the West has produced its natural consequence here in a dull and depressed market. Mess has been sold by retail at \$20 for new and \$21 for old but there is no disposition to buy beyond immediate requirements, as the feeling is prevalent that er long a lower range of prices must rule. All other grades are purely nominal, no transactions having taken place in them, and at present asked rates \$4.5 \text{ in the III not buy a single barrel ahead of their actual wants.

Dressed Hogs are beginning to arrive sparingly, but with the present ma'd weather the bulk of the receipts are in a doubtful condition, and to effect sales low prices have to be accepted. Strictly prime hogs, fresh and bright would command \$7, but interior are not in any demand, and either hang on hand or are packed to prevent further loss. It may be considered as fortunate that the break in the Pork market occurs at the very commencement of the Season, as with the opening price at a low figure, operators can with reasonable prospect of safety (agage extensively in packing Itad it been otherwise and late high prices continued normally to rule, operations would have been attended with great danger, and before the close of the season serious loss would inevitably have resulted.

In the general run of the stock on hand no inducement in price will tempt even an offer. A prime article will, even in the present paralyzed market, command a full price, but the quantity of such is so small as not to be worth attention. Stocks are unreduced, and the local consumption is not equal to the daily receipts which go to swell the large quantities already oppressing the market. As yet there are no signs of relief from any quarter. Both the American and British markets, so far from improving, are, under the influence of large receipts and decreasing demand, decluming, and the Irade here are holding off in conident expectation of a much lower range of pr

quiet and prices barely maintained.
