*Wind Mills are Right!*

R. & J. RANSFORD, Clinton, Ont.

Gentlemen.—We have much pleasure in stating that this past winter we have fed on an average 175 head of cattle, for which hay and straw had to be cut and grain had to be ground. You will thus easily see that we had a considerable task to accomplish; but your "IDEAL" Windmill and "MAPLE LEAF" Grinder were equal to the emergency, and we consider that in the first year of our having it, it will pay its cost, compared to our having been obliged, if we had not purchased it, to have used horse power or engine power.

THE CELEBRATED

## "MAPLE LEAF GRINDER"

Made in two sizes:  
No. 1 SENIOR HAS 10-IN. REVERSIBLE AND SINGLE BURS  
No. 2 JUNIOR HAS 8-IN. SINGLE BURS.

Both Grinders have relief springs, ball bearing plates, shake feed, and grind fine and fast. Send for circulars and mention this paper.
