

Schumacher Feed for Hogs

This is the season of the year when you are confronted with the problem of selecting the feed you are going to use for your spring pigs. If you are to obtain the very best results from your feeding, care must be taken to secure that feed which will provide the most nourishment and growing powers. You may possibly have been a feeder of Middlings or other such feed and have obtained fairly good results. Would you be willing to give another feed a fair trial, which can be had at a lower price and which will give you better satisfaction. SCHUMACHER FEED (corn, oats and barley) is without doubt the best hog feed that is to be had to-day, price considered. Read the letter we received from one of the most prominent feeders in the Eastern townships.

The Quaker Oats Company, Peterboro, Ont.:

Ulverton, Quebec, March 8th, 1911.

Dear Sirs,—I have used large quantities of SCHUMACHER FEED the past three years for hogs, and recently fed six spring pigs on Middlings until they were four months old, then on SCHUMACHER, killing them at ten months, and they dressed four hundred pounds each.

Yours truly,

(Signed) A. ELLIOTT.

P. S.—I now have eight fall pigs six months old, fed entirely on SCHUMACHER that will dress two hundred pounds each.

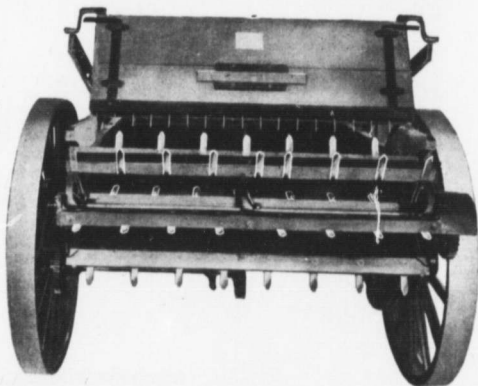

We give you the above just as we received it. You may think the weights mentioned are excessive but we have every reason to believe they are correct. It looks to us that SCHUMACHER FEED was so good that the six pigs could not help but make real hogs of themselves.

It's worth a trial. Ask your dealer for some to-day?

THE QUAKER OATS CO., Peterboro, Ont.

THE KEMP MANURE SPREADER
