

POWERFUL Astringent and Hemostatic

Invaluable in Hay Fever.

SOLUTION ADRENALIN CHLORIDE, introduced by us in 1900, has won more encomiums from the medical profession than have been accorded (with possibly a single exception) to any other remedial discovery in the last quarter of a century. The marked favor of its reception is due to its wonderful potency, its freedom from untoward effect, and its wide range of therapeutic applicability.

Solution Adrenalin Chloride is of great value in Surgery of the Eye, Ear, Nose, Throat, etc., Hay Fever, Asthma, Coryza, Rhinitis, Epistaxis, Conjunctivitis, Iritis, and a long line of other diseases and conditions.

Supplied in ounce vials.

WRITE FOR LITERATURE ON HAY FEVER.

5 SECONDS BY THE WATCH!

THE insoluble hypodermic tablet is an unsafe agent. No physician of standing can afford the risk of reputation involved in the use of such a tablet, which is an insufferable nuisance at best and worse than worthless in an emergency.

Parke, Davis & Co.'s Hypodermic Tablets dissolve freely and fully, forming a clear solution, without residue. If you have the slightest doubt of it, drop one into a syringe half filled with lukewarm water and shake vigorously. In five seconds (or less) it will have dissolved completely.

NOTE.—Our hypodermic tablet vials contain 25 tablets—not 20, as supplied by some other manufacturers.

ALWAYS SPECIFY "P., D. & CO." WHEN ORDERING.
