

Squeeze juice onto a  
zinc plate - to get some  
of the acid from the metal  
put out in sun and let  
it dry until about as  
thick as tar put in  
tight bottle if skin is  
not broken put a drop  
of Chloride of potash or  
lye to break skin then  
apply sorrel on Cancer  
covering with thin coat  
keep up applications
