Doors open at 7 o'clock; Entertainment to commence at 7:30.

LETTER FROM REV. DR. ORRISTON TO MR. A. B. KENT.—I retain a very pleasant recollection of the amusing and instructive Lectures I heard you deliver several years ago on Experimental philosophy, and in your hand such subjects are not hard to prove as instructive and profitable as they are pleasing and popular.—Wm. ORRISTON.

Familiar in style and abundantly illustrated by experiments, they are specially adapted to awaken the attention of the young to the various phenomena of nature.—H. BURNET, Rector of Clarke.

Prof. Kent's lecture on Magnetism and Electricity elicited much interest and attention, and I commend the whole as calculated to benefit and awaken an interest in the wonderful works of nature.—H. B. OSLER, Incumbent of St. Mary's, Lloydstown.

Mr. Kent is well received wherever he lectures—the practical nature of his exhibition and the vast amount of information he gives being the best guarantee of his popularity.—GEORGETOWN HERALD.

Numerous testimonials from Clergy, School Inspectors and Teachers, the Press and prominent citizens throughout Ontario could be given if space permitted, all speaking in highest terms of the excellence of Mr. Kent's entertainment.

THE STATESMAN STEAM PRINTING HOUSE, BOWMANVILLE.
