#### CHICAGO REPORTS **BIG WHEAT SALES**

Market Attained Strength-Provisions Went Into Decline.

Canadian Press Despatch.
CHICAGO, Oct. 21.—Huge export sales at rising prices communicated to the wheat market today an appearance of great strength. The finish, altho somewhat unsettled, ranged from 1%c to 1%c net higher. Corn closed %c up, and oats with a gain of 1c to 1%c. In provisions the outcome was 21/2c to 71/2c decline.

Chicago were taking wheat hand over tist, and there were despatches from the seaboard, Duluth and Kansas City, all telling of persistent foreign buying. Disturbing action by the Turkish Government in regard to the movements of the Anglo-French Mediterranean fleet tended also to lift prices higher.

Estimates were current that 59 per cent. of the farm surplus in the leading wheat states, exclusive of North Dakota, had already been sent to market.

Unabatted demand from the seaboard put backbone into quotations for oats.

Provisions averaged lower, influenced mainly by a break in the hog market.

loads, comprising 714 cattle, 1808 hogs, 2015 sheep and lambs, and 158 calves.

As usual there were a few good cattle with many of the common half finished and medium classes on sale.

The run of 714 cattle, added to the many left over from the two previous days, made a supply greater than the demand called for. Trade was accordingly slow and prices lower.

The top price paid this week was \$8.15, and that for a load of just such cattle as \$9 to \$9.25 was paid for some two or three weeks ago.

We saw a bunch of good steers sold for \$7.25 yesterday that would have sold for \$8.25, ten days ago, and all other cattle were selling in proportion excepting canners, cows, and bulls, which seemed to about hold their own.

Stockers and feeders were slow of sale at lower values in sympathy with the fat cattle prices.

Milkers and springers were reported to be selling at a little lower prices.

Veal calves, sheep and lambs were about steady.

One feature of the situation is the requirement that the goods must be delivered to the British authorities by Feb. 1. With certain mills already stocked up with orders for the Canadian contingent, this will present some difficulties, but on the whole the manufacturers are keen after business and quite prepared to undertake delivery in the required time.

There is every indication that the tremendous volume of business generated by the war will keep Canadian industries operating at full speed this winter, and ensures the prosperity and stability of trade in all lines.

Invest in a Gas and Oil

In the

New Gas and Oil Field Near Tillsonburg. Western Ontario

Participating Lease

Less than 100 miles from Toronto, where the EUREKA GAS AND OIL DEVELOPMENT SYNDI-CATE are now offering participating leases.

Only \$15 Per Lease

Owning your own lease and also participating in the profits of the Eureka Gas and Oil Development Syndicate's wells.

Large, flowing gas wells, supplying all the surrounding towns, are now being operated by the Dominion Gas and Oil Co. and the Medina Co.—flowing wells also at Delhi. In fact, the Eureka Syndicate's properties are surrounded, so to speak, with flowing gas and oil wells.

THE EUREKA GAS & OIL DEVELOPMENT SYNDICATE are now offering for sale 521 acres of selected gas and oil land, on which they guarantee to drill one well on every ten acres, as sold, making altogether 53 wells. Syndicate's property will be sold in ten-acre sections, but every lease-holder participates in whole 521 acres.

There will be two wells, one now a producer, on first ten acres now being offered, in the profits of which every person or leaseholder will share pro rata.

For example, you buy one or more leases, costing you \$15 per lease, of the first ten acres now offered. You can operate or sell your lease independently of the syndicate, but whether you operate or not you share pro rata in the profits of two wells, one already drilled, showing over 400 feet of high-grade oil. The second well, either gas or oil, will be drilled when the leases on the ten acres are sold. Any leaseholder will also be entitled to share in the profits of one well on each of the remaining ten acres as sold of the whole 521 acres.

Making altogether 53 wells in which lease holders will participate in the profits.

#### **Big Possible Profits**

PROFITS—One gas well, producing only one million feet of gas per day (a conservative estimate), will yield a net profit of about \$100 per day for 365 days in the year, which will show a return to leaseholders of over 100 per cent. per annum. A twenty-barrel oil well will net about \$40 per day for 365 days of the year; also giving a big dividend return.

Think what a 1,000 or a 5,000-barrel well a day would return! Petrolea produced many big wells, one yielding as much as 7,000 barrels per day, and numerous others, which returned from 500 to 6,000 barrels per day. (From Government report.) The possibilities of the Tillsonburg oil and gas field, according to experts, are even better than Petrolea's, as the Tillsonburg oil pay streak runs from 20 to 30 feet in thickness, as compared with 2 to 7 feet in Petrolea.
