

POOR DOCUMENT MAY 20 1925

THE EVENING TIMES AND STAR, ST. JOHN, N. B., THURSDAY, MAY 17, 1925

Premier's Call To Service Of Province and Strengthening Of The Entente Cordiale

(Concluded from preceding page)
"God fulfills Himself in many ways,
Least one good custom should corrupt
the world."

The First.

The University of Glasgow in Scotland lays claim and rightly so, to the first laboratory in Chemistry as it is also the first institution to give laboratory instruction in Physics. In 1846 Lord Kelvin invited some of his students to aid him in his original researches. The Physical Laboratory used for a great many years was a disused wine cellar in the old University buildings. The interest of the students was so excited and kept alive by constant intercourse with the guiding spirit of the place that the laboratory corps as it was called divided into two squads, one working by day and the other by night. Working conditions were altogether too crowded and equipment lacking. It must have been Your Honour, something like our Physics Laboratory at the University during the past year, where it became necessary at times for one group of students to steal, in a friendly way, instruments from another group in order that they might complete their experiments.

Men of vision ever leave monuments to mark their path. Not only is this true of those who have laid the foundations of all knowledge, but it is true of the institutions by which that knowledge has been advanced. It is true and has a special significance today as we remember the founders of our own University.

On the south wall of the Arts Building at the University is a letter preserved under glass and marked, "The Gern of the University of New Brunswick." This letter written and signed by Dr. William Paine as well as by other gentlemen petitioned Governor Carleton to consider and take steps toward the establishment of a school of liberal Arts and Sciences. The letter received favorable consideration. From this date, 1786, others have followed until we have today erected from this first foundation an edifice which fulfills, at least to some extent, the needs in the vision of its early founders; a structure so solidly built and supplying the educational needs of this province such that the representatives of the people have recently decided it could not be successfully torn down and rebuilt in our neighboring province.

The Future.

But we must not live in the past. The achievements and ideas of those who are gone should create a greater enthusiasm for the future. The great scholar and philosopher, Isaac Newton, said on one occasion, "I do not know what I may appear to the world, but to myself I seem to have been only like a boy playing on the seashore, and diverting myself in now and then finding a smoother pebble or a prettier shell than ordinary, whilst the great ocean of truth lay all undiscovered before me." It is true we have wandered a little farther along the shore and have found some of the rivers of knowledge merge and their waters mingle as they form one vast sea. The advance of knowledge has been quickened as the accumulated facts and experience in another branch of knowledge have come to a master in science without understanding something of biology and economics? We are still, however, circumscribed by a small horizon. It is an age when the wonders of that subtle, instantaneous agent, electricity, are just beginning to find application. In the future lies the solution for the complete control and prevention of disease, for a more perfect understanding of the all-pervading ether, which transmits light and electromagnetic waves, and for the great problem of modern physics—the liberation of the energy contained in the atomic system of all matter.

Surely if those who have been the fathers of our University could return, their voices would be heard pleading for a greater university still. Who knows but that they may still exert a kindly influence for good? Let us not smile too broadly at the visions of Conan Doyle and Sir Oliver Lodge when we remember past history.

Under unwaried patience and great effort by our Chancellor and those associated with him in the University of Affairs, we are to have a new building; to serve not only as a proud and sacred memory to the Honored Dead, but to give greater opportunity to the departments of Physics and Chemistry. Will future generations look back to this time as the beginning of an era of achievement? Let us be optimistic.

"Slowly comes a hungry people, as a lion creeping nigher
Glances at one that nods and winks
Behind a slowly dying fire,
Yet I doubt not though the ages
Increase purpose runs,
And the thoughts of men are widened
With the process of the sun."

The Valedictory.

The valedictory by C. Miles Burpee was as follows:

With the completion of today's Entente cordiale, there comes the close of another chapter in the history of our Alma Mater. The close of a fantastic chapter of the unwritten records of the hopes, the failures, the aspirations and the realizations of the several members of this, the ninety-fifth graduating class of the University.

As the youngest students of that greater University—The World—we

NOTICE OF MEETING.

The annual meeting of the Island Lake Fish and Game Club at the residence of E. N. Harrington, tonight at 8 o'clock sharp. E. N. Harrington, secretary.

YOU'LL LIKE IT.

If it's flavor you like most in tea you'll find Red Rose Orange Pekoe tea is by far the best you ever tasted—genuine Orange Pekoe grown on the finest Eastern gardens in the season when quality is at its best. 1/2 lb. packages 40c; sample packages, 10c.

realization of the benefits afforded in this particular often comes too late.

The mock trial and the sessions of mock parliament were carried on as usual and the college orchestra was also a feature of the year.

Athletic activities in the form of basketball were carried on by the young lady students together with the first of a series of intercollegiate debates.

While others of the ladies' societies report an active and profitable year.

Considerable might be said of the various student activities, but time will not permit. Of the various social events, one need not repeat the accounts excepting to add that considerable credit is due the young ladies for their interest and invaluable aid in bringing about the social undertakings to a successful conclusion.

Memorial Building Assured.

The action of the provincial government in connection with the proposed amalgamation of Maritime universities is laudable; for this, together with the grant of \$50,000 towards the erection of a memorial building, is indeed an assurance of the future prosperity and expansion of the provincial university.

At last New Brunswick has a government which is fully in sympathy with the development of the highest state institution of learning.

Fire Protection.

Undoubtedly the construction of the new building will be commenced in the near future. In this connection it is to be hoped that the plans will include the installation of a suitable means of fire protection. As present the University buildings with their equipment represent an investment of approximately half a million dollars, and excepted for a small chemical fire extinguishers there is absolutely no means of protection from fire hazard.

If at the present time an outbreak of fire should occur and it attained any size, the result would be the total destruction of the institution and a loss from which the University of New Brunswick would never recover.

Expansion.

The erection of the Memorial building will herald the expansion of the science courses; the establishment of a much needed hydraulic laboratory, the enlargement of the departments of Chemistry, Physics, and the Mechanical laboratory. Even at the present time the professor of Physics and Electrical Engineering is greatly hampered by having too much work thrust upon him as the sole instructor for these departments. It is plainly evident that there is a need of a general revision of the curriculum in this department.

Civil Engineering.

It is no secret that during the past few years the efficiency of the Civil Engineering course of the University has been greatly increased, together with a corresponding elevation of standard. However, it is felt that there is a need of a general revision of the course to meet present day conditions.

For, today, the engineer knows enough to know that he cannot know it all and therefore employs men who are experts in each of the branches of the profession that he may have occasion to use. In America more emphasis is being placed upon concentration of subjects and subjects are less scattered ones. The graduate engineer must be more highly educated in his own branch of the profession.

Of the Faculty, we desire to express our appreciation for your many efforts exercised on our behalf. We thank you for your patience and kind efforts in leading us to think for ourselves. In bidding you adieu, we shall carry away only the most pleasant memories and wish you success in your future work.

To the citizens of Fredericton, we extend our hearty thanks for the many tokens of thoughtfulness and kindness which we have received from you. You have entertained us in your homes and welcomed us to your churches; withal, you have made our stay in this beautiful city a pleasant one, and when you hear the roar of the cannon from yonder hill in the early morning hours, remember that it is surely the final salute of the class of 1925.

To the Undergraduates—we have worked together and accepted defeat cheerfully—you have seen and heard us have erred; seek to rectify it if you can. Keep up the old customs, sing the old songs, and "play the game."

Mr. Chancellor, Gentlemen of the Faculty, Citizens of Fredericton and Friends—Farewell.

Yesterday's Events.

Commemorative exercises at the University of New Brunswick were largely attended yesterday afternoon at which two excellent addresses were heard, one by Sir George E. Foster of Ottawa, representing the class of 1868, and the other by Rev. Dr. E. M. Kierstead of McMaster University, Toronto, representing the class of 1873.

Dr. Kierstead took as his subject the biographical sketch of the late Sir George E. Foster, and gave a general line and gave advice as to future progress of the provincial grant. Chief Justice Hazen had been invited to speak, but was unable to attend on account of court business. At the conclusion of the exercises the annual meetings of the Associated Alumni and Alumnæ Society were held.

Alumni Meeting.

The Associated Alumni had a large attendance at their annual meeting which was held in the university library. T. J. Hughes, of Fredericton, president, presided at the meeting. The report was read by Dr. R. M. Raymond, of New York.

The election of members on the university senate resulted in the choice of C. M. Steeves and B. M. Hill, of Fredericton.

Officers were elected as follows: President, P. J. Hughes, B. A., K. C.; Vice-president, W. V. S. McNeil, M. A.; H. H. Hagerman, M. A.; W. D. Rankin, B. A., M. D.; secretary and treasurer, H. V. B. Briggs, B. A., LL.D.; members of council, William Brodie, M. A.; C. D. Richards, B. A., M. P.; J. B. Briggs, B. A., M. D.; C. M. Steeves, M. S. C.; J. B. McNeil, B. A., B. C. L.; E. C. Weyman, B. A., LL.B.; B. H. H. B. S. C.

Alumnæ Meeting.

The Alumnæ society met at the residence of Mrs. H. F. McLeod. Routine business was transacted largely. The attendance was large and representative.

The election of a representative to the senate resulted in the choice of Miss Grace Fleming, B. A., of St. John.

It was decided that Mrs. Frank Baird shall present the society's scholarship to John H. Bond, of St. John.

Officers were re-elected as follows: President, Miss Louise Kingdon; vice-presidents, Mrs. J. B. Crocker and Miss Helmer Anderson; secretary-treasurer, Miss George H. Fleming; assistant secretary, Miss Sarah L. Thompson; members of council, Miss Margaret Adams, Miss Barbara K. Dobson, Mrs. I. R. Wolff, Miss Mildred Sterling, Mrs. Burdette W. Harrison.

Reunion Dinner.

The Alumni Society of the University of New Brunswick held a reunion dinner last night in the vestry of the Methodist church. P. J. Hughes, president of the association, presided. Among the guests of honor were: Sir George E. Foster, Dr. Thomas Walker, of St. John, the oldest graduate present, Dr. E. M. Kierstead, of Toronto, Dr. P. C. Keegan, of Van Buren, and Dr. W. S. Carter. Mr. Hughes acted as toastmaster.

The toast to the Alma Mater was coupled with the names of Dr. Walker, Dr. Carter, Mrs. H. F. McNeil, Miss Eliza Hunter, and Chancellor C. O. Jones. Dr. Walker, during his reply, said that he was proud to be a graduate of the university except one, his brother-in-law, J. A. Wright, resident in the southern United States.

Dr. Walker was graduated in 1889 and Mr. Wright in 1885.

Chancellor Jones announced that the Best Good for Constipation, he received \$40,000 in cash in addition to \$25,000 from the city of Fredericton and \$50,000 from the province. The cornerstone of the building would be laid at a separate ceremony during the summer at which it was probable that the Governor-General would be asked to officiate.

"Costly" habit as they

purse can buy.

"For the apparel oft proclaims the man."

It works both ways.

You never put on a fine becoming new suit

without feeling that you are a little smarter for it, and

felt like living up to it, and

in that way working harder to be able to keep up

with your improved appearance. Therefore the effect on yourself is beneficial.

And these ready suits of ours enable one to dress well at moderate cost.

\$24.50 to \$45 afford a selection which for style, tailoring and quality is really superior to anything hitherto.
