CHRISTMAS

The Advance goes out this week on Christmas Day, and shares with its many readers the spirit of peace and goodwill which are inseparable from the great festival in all Christian lands.

Whatever may be the conditions prevailing in communities, whether the people are or are not united in matter, the spirit of peace and goodwill is the same.

The spirit of peace and goodwill is the same.

Further add to their plant by installing cardboard making machinery, thus utilizing the mill by-product. Messrs. Coaling & Co. are in-day using practically all the mill waste. Their box machinery takes the large waste, converting it into a saleable product, and now the new invention will do the same for the small waste. They are the pioneers in Canada in this utilizing what has formerly been burned up, and are to-day giving steady employment to several large crews in their different mills and enterprises run in connection therewith. Mr. George S. Coaling is an energetic, hard-working business man, who has worked hard to firmly establish the big business that is under the management of his firm. He has had his ventures into the regions of the patent office may meet with success.

Experience of a Weekly Paper.

The St. John Freeman published on Saturday last, the announcement that with its issue of 27th instant it would cease to exist under its present management, or, indeed any management unless, in the meantime, some good Samaritan or speculator indicated his willingness to purchase and publish it. The paper has evidently been maintained at a personal sacrifice on the part of its publishers, for it says—

"To the general public, who have in many ways lent us assistance and assistance, we deem it but fair to explain that we were by a combination of circumstances, and not by any want of energy or ability on the part of the publishers, unable to carry out our program of publishing a paper of the highest quality and interest, and we are sorry to have to announce that we are unable to do so."

The publishers, no doubt, have learned, at some cost to themselves, that if there are not too many papers in St. John—there really are in some other centres of the province, and that the public will not support a paper which is not of the highest quality and interest, and we are sorry to have to announce that we are unable to do so."

The publishers, no doubt, have learned, at some cost to themselves, that if there are not too many papers in St. John—there really are in some other centres of the province, and that the public will not support a paper which is not of the highest quality and interest, and we are sorry to have to announce that we are unable to do so."

and age. Drivers, carriage horses and saddle horses will largely according to type, and will run from \$125 to \$200.

WHAT THE WEST CAN OFFER.

In Manitoba and the farming sections of the Northwest Territories there has been and will be next spring a good demand for horse and mule power.

Of all the various classes, the West, viz.—the western portion of the Territories and the interior of British Columbia—can supply comparatively

few over the 1000 lb. limit, the few horses that are available being not much more than will supply local demands. But of horses about that weight there are large numbers of useful, hardy horses with excellent bone, which at present prices will pay to ship but the market must be overdone at any one time.

Ontario and Manitoba a large number of Western ponies of a very good class have been shipped. These shipments have been made by the Western mule and horse and have had the Ontario man in particular to believe that there is nothing better in the West than

THE OYSTERMAN BROCHURE STOCK.

and at the present time it is not bid anything branded, beyond what he considers a bargain, because he thinks his purchase is bound to give him more trouble than local stock. Graded heavy horses are not more difficult to break than the Eastern horse, and the breed is seldom conspicuous except to be called a bluish. It is a matter of surprise to a Western man to hear it remarked upon as a bluish and a mark of weakness in the Eastern man would consider for a moment that a horse raised in the West could not be broken, he might look upon it as less defective.

In regard to harness, endurance and bone, the Western horse is equal to the Eastern, and once broken he is as gentle as any. In our recent shipment of Western horses to Toronto, people came to the stables and looked at the horses with amazement, and while not criticizing the man who had sold the stock, the fact remains that the horses took the treatment with equanimity.

BROKEN HORSES.

The question of whether or not the horse should be broken brings up a number of points. In Manitoba and the Territories some people are suspicious of broken horses, as they know that the horse rancher as a rule breaks his horse, and they think there may be something wrong with anything broken that is offered for sale. A fact which will much better than one out of condition. If the horse is to be broken it must be done when they come to be shipped to the market as quickly as possible, for it may mean a difference of \$20 per head. In handling a bunch of horses it is necessary, in order to keep down expenses and to prevent loss of condition, to put them on the market as quickly as possible, for the time they have their pasture, as every extra day means loss of money.

TRANSPORTATION IMPROVEMENTS NEEDED.

The accommodation on the C. P. R. is none too good, the condition of some of the yards along the line being bad, and the service of the Calgary division. Many of the Calgary stock trains make good time and are handled well and quickly as a rule. The C. P. R. authorities have always shown a disposition to assist the live stock men in every way possible, and it is not without doubt, made immediately to handle this new line of trade. Cheaper hay should be provided at most of the leading points. \$18 to \$20 per ton is too much to charge for hay and it is not necessary to have a large purchase their own. There is every reason to expect that the trade in horses will continue and grow.

THE WEST CAN RAISE HORSES CHEAPER THAN THE EAST.

and of good quality. For this reason the West can look forward to the profitable export of horses, as well as beef, but it is probable that the Eastern dealer will do the breaking and educating and he will find the profitable markets for the best of these horses, which are thoroughly broken in the West and the East and the Old Country. This will leave to the rancher the business of raising horses, supplying his local market and making regular shipments to some extent to the Eastern market. In the West the aim should be to grow a better and heavier class of horses. The draft breeds are the safest, i. e.: the Clydes, and Shires, starting with a 1500 lb. sire and using a mare of the same weight as the sire, and in order to avoid too violent crosses, the foals should be weaned and fed the first winter, as this will improve their size and will make them quieter and easier to handle. They will also pay to halter-break them the first winter.

In short, taking into consideration the present prices, horse raising should justify the adoption of Western methods. Good horses will always sell in preference to poor ones and good ones cost but little more to raise, practically only the difference in the service life of the horse.

F. W. HOBSON, Live Stock Commissioner.

NEWS AND NOTES.

It is the intention of Hon. John Costigan to present to parliament next session a resolution reaffirming Canada's sympathy with the Irish cause.

A despatch of Saturday from Sydney says—Two children of Stephen McInnes, the publisher, were sent through the ice in the night of their home to-day. Their mother notified them and went to their assistance, and she also perished. The three bodies were carried under the ice.

The Scottish currier left Liverpool on the Bavaria on Thursday last. The team were the guests at dinner of the Liverpool Club on Wednesday night. A despatch says there were over 200 candidates for membership, out of which Rev. John Kerr, the chaplain of Royal Caledonian Club, has chosen an unduly small one.

Rhodes, Curry & Company, Amherst, have just received a contract from the C. P. R. to build 100 refrigerator cars, 10 first-class coaches and 300 2nd class, and are now completing the last 300 of a 1,100 order for box cars, also two first-class coaches for the I. C. R.

A kiss is a peculiar proposition. Of no use to one, yet absolute bliss to two. The young man who is for getting, the young man has to stand it, and the old man has to buy it. The baby's right, the lover's privilege, the hypocrite's mask. To a young girl, faith, to a married woman, hope, and to an old maid, charity.—Baltimore American.

The average grain crop gathered in Finland is valued at \$20,000,000. The estimated value of the 1902 crop is \$20,000,000. Potatoes and beans generally have failed, and the potato crop has not been gathered. The hay has rotted or been swept away by floods. So complete was the failure of vegetation

that dead birds by the hundred have been found in the forests. The present crop failure is the worst that has been experienced for the last fifty years. It is hoped, however, that better methods of commutation will facilitate the work of relief and avoid wholesale deaths by hunger and typhoid. There are all told about 300 parishes in Finland; 198 of these parishes are nearly destitute. The agricultural board has received reports from 140 of the 198 parishes, showing that 106 have food supplies which will suffice until Christmas.

You Can Always Believe a Sportsman.

They all say that the "Lionel" is the best. It is the size must be true. Try a bottle, anyway, and see for yourself.

A Great New Brunswick.

Dr. Parkin, who is engaged in devising a complete scheme for the working out of the great Rhodes scholarships trust, is touring the Empire with the view of obtaining information on which to base the plan he is to submit. He was in Nova Scotia last week and held a conference at Sackville as he came west, visited Fredericton where he was once a student at the U. N. B., and subsequently, principal of the Collegiate School. He went thence to Toronto, it is doubtful if any other native of New Brunswick has, by sheer intellectual force, ever broken through the barrier of the Atlantic and secured for himself such flattering recognition as Dr. Parkin has done. The Herald gives a brief biographical sketch of his life, which incidentally suggests that the popular expectation connected with the number thirteen, in the matter of children, at all events, is not well founded. The Herald says: "Dr. George R. Parkin is the youngest of the thirteen children of Dr. Parkin, a student at the U. N. B., in the year 1846. He studied in the local schools until he attained the age of sixteen years, when he went to
