CAMPBELLITON, N. B., May 17 .-Mrs. Richard, milliner, has assigned to J. B. Leblanc of the London House Wholesale, the largest creditor. The estate will possibly pay 35 cents on

ST. ANDREWS, N. B., May 16.-J. Fred Harvey, the popular manager of the Algonquin, arrived here yesterday by C. P. R., to look over the hotel and arrange for the work of the coming season, which he anticipates will be one of the best in the history of the hotel, which will be open for the reception of guests July 1st next. Mr. Harvey registered at Kennedy's, and will drive down to St. Stephen today

and from thence return to Boston. Mrs. Likely, daughter of the late Thomas Wilson of Chamcook, with her daughter, is staying at Miss Lucy

Sprague's. Angus Fisher died on Sunday last at his residence, Oven Head, near the mouth of the Magaudavic river, from the result of injuries received by accidentally falling over a wharf at Eastport the week before last.

ous injury.

MAUGERVILLE, Sunbury Co., May 15.-Owing to the freshet the roads and bridges are left in a wretched condition. The bridges, previously dilapidated by sheer neglect, are now un-safe to cross. The condition was exemplified by the sad drowning accident which occurred at Sterling Creek

Edmund Kingston, an aged resident of Geary, was found dead recently in the highway road near his home, where he had mired and perished before help came,

Charles H. White of Oromocto had one of his legs fractured below the knee a short time since while helping to moor a large scow at Oromocto wharf.

Much of the land that was inundated is too wet for cropping yet, and very little has been done by the farmers

Mr. and Mrs. A. R. Miles have re-

turned from a pleasant trip to Digby. The verity of certain statements made by your correspondent in a reeent issue of the Sun, respecting the grit post office here and phalanx of non-resident officials, seems to have excited the churlish and babbling proclivities of the Fredericton Herald, which is always ready to please its imps for a pittance. Its vagaries are not to be taken seriously. But for the further benefit of the great Vishnu,

your correspondent can safely say that had the late Postmaster Shields been a markstable commodity and renounced the ownership of himself, as some have done, no non-resident postal officials would have been foisted upon an intelligent community, and the post office would have still remained in the Shields family, where it had been from grandsire to grandson, and where the late Inspector King said was the most fitting and central place for it, established as it had been there over forty years ago. And, also, your correspondent might have been still enjoying those perquisites so envied and coveted by all "floppers," and which had been enjoyed by your correspondent long before the egoist of the Herald besmirched himself with

grit rouge. Fred Magowan of Fredericton has recently returned to clerk and keep accounts for Emery Sewell, after an absence of nearly seven months. Mr. Magowan has not been appointed as assistant postmaster, as the Herald would lead the public to suppose. Neither has he been in the place for the time above mentioned. An inde-pendent liberal reader and subscriber of the Daily Telegraph told your cor-respondent that he had become dis-gustel with the blased and one-sided editorials and reports of political events dished up for the readers of that paper. He further said that he was going to drop the Telegraph and take the Sun. The gentleman referred

day, May 21st. SUSSEX, May 20.—A joint meeting of the Sussex and Studholm agricultural society, the Sussex board of trade and the exhibition building association was held in the board of trade rooms last night. Major Campbell presided and Silas C. McCully acted as secretary. It was decided to hold a four days' exhibition on the 3rd, 4th, 5th and 6th of October. The meeting was quite large and composed of the leading men of the place, which assured beyond a doubt success and an improvement of last year's meeting. The race track committee were also present and reported that enough stock had been sub-scribed to warrant their going on building a new track adjacent to the exhibition building. A new agricul-tural building is to be built to be used mainly for the exhibition of agricultural implements. The present building was found too small last year for these purposes. It is also proposed to erect suitable stalls and sheds for the accommodation of live stock. The management committee is compos of S. H. White, W. B. McKay, Ora P. King, W. W. Hubbard, Titus Barnes, Stephen B. Weldon, G. McLeod, Geo. H. Barnes, Frank W. Lansdown, E.

TRADE EXPANSION IN UNITED BRIT-ISH AMERICA.

Sir-Nothing is more phenomenal than the rade expansion of progressive nations. This novement has taken the form in Europe of ommercial treaties, in Asia of "spheres of niterest," and occupation, in Africa of abortion, and on the Atlantic and Pacific of onquest, until the most desirable regions have been occupied.

says Frederick Greenwood. "And now it has almost come to this, that for every mile of good unappropriated trade territory there is a claimant ready, with his guns. New markets have now to be fought for. Nations that need them must go armed into the diplomatic conflict. Competitors for new markets must spend enormously."

Markets the Great Essentials.

Thus events clearly show that markets are the great essentials for industrial expansion and to that end progressive nations are bending their energies for territorial enlargement. It must be apparent to the ordinary observer that growth lies along the trend of productive industry in the direction of manufactures, and owing to the farm ceasing to attract the labor which it once did, it is absolutely necessary to turn our attention to providing mechanical employment in order that the large exodus from Canada to the United States for industrial pursuits may be averted. To do this successfully we must have markets as outlets for our manufactories. The almost universally hostile tariffs which are being extended to "spheres of influence" and absorbed territories, and also our slow growth owing to emigration, makes the outlook indeed unpromising for Canadian industry.

The West Indian Situation. Markets the Great Essentials.

The West Indian Situation The extension of the American tariff and

The extension of the American tarif and coasting laws around Cuba and Porto Rico will cause dissatisfaction in the British West India possessions, and will be a considerable loss to Canadian commerce and shipping, particularly that of the maritime provinces; and if reciprocity between the British West Indies and the United States is consummated our present important trade with them may soon become a thing of the past. The situaticu in the West Indies never was so embarrassing as it is at present, and considering nationality and community of interest with our sister colonies, we cannot allord to be disinterested spectators. England has always been the chief market for their cane sugar, but the increasing bounties since 1890 on bec. sugar, amounting to from £4 14s. to £2 5s. 6d. from France and Russia, from 20s. to 40s. from Belgium, Germany, Austria and Holland per ton, have comparatively driven the West Indian product from the English market.

The royal commission on the West India commercial troubles states. In 1896, Germany doubled her bounties, raid the effect of this policy upon the West Indies was that from prosperity the islands sapk into misery. "The West Indies is threatened with such a reduction of industry in the immediate result would be a great want of employment, causing the people to be withcut means of purchasing immediate articles of food or of paying taxes, the planters would be ruined, the laboring classes would suffer privations and probably become discontenied and restless, and the revenue would be so crippled as to render it impossible to carry on the government."

Find Relief in Canada.

When the chairman, Sir Henry Norman, could write thus, the situation in the West Indies may be imagined. The very cause that brought on the crisis in Cuba, the fall in prices of sugar, amounting to 4s. per cwt. from 1893 to 1895, accounts for the present trouble. Where can they get relief? The mother country is not liable to change her long established trade policy to offset the many bounty fed industries springing up in different countries. The free admission of Cuba and Porto Rico, Sandwich and Philippine Island sugars and fruits into the United States will likely so glut the American markets as to put reciprocal assistance from that quarter out of the question. Would not federation with Canada solve this trouble? Commercially and industrially these two countries fit perfectly together, the products of the two being very dissimilar, affording a splendid opportunity for exchange of commodities. Never before in Canada's history has such excellent possibilities opened up to her on trade lines. The extent of commercial activity, expansion and development that would take place in the West Indies, Newfoundland and Canada by confederation of all the North American colonies can scarcely be estimated.

We have all the advantages of position, all the advantages of the good will and support of the mether country. Confederation, with suitable representative local self-government, would make for greater contentment in these islands, and with parliamentary representation of all British America at Ottawa. Would come a very considerable measure of relief to Downing street. It is only when considered in the broad light of its ultimate effect upon the welfare and conservation of these colonies, and the facilitating of preferential trade and the commerce of the empire, and the grouping and cor solidating of imperial interests throughout the world, and thus lessening the complexity of the imperial government in London, that the vital importance of such a federation can be fairly appreciated and grasped.

W. S. Troop, the proprietor of the new summer hotel which is being er-ected at Digby, is in town purchasing furniture for the house, which will be called the Manhatton. It is a four story wooden structure of good appearance and will be well equipped throughout. There are 62 sle rooms in the house, a spacious dining hall and a very pleasant office. There will be salt water baths on every
