Calvin Church Services. The Rev Robert Wilson, of St. Stephen, occupied the pulpit of Calvin Church yesterday morning and delivered a very profound and instructive discourse from the words "The glorious gospel of the blessed God." Mr. Wilson is a venerable servant of his Master, and retains the good old orthodoxy and style of the olden time. The Rev. G. S. Campbell, of New Jersey,

preached an admirable sermon in the afternoon from the text, " Put on the whole armour of God," &c. The discourse was eminently practical, abounding in vivid illustration and containing many beautiful passages. The audience at each service was large.

Northern Pacific Railroad,

Company's First Mortgage Land Grant Sinking Fund 7-30 Gold Bonds.

JAY COOKE & CO., PHILADELPHIA, Fiscal Agents for the Company

THE Road, commencing at the head of Lake Superior, is to run to the Pacific past, where it will have two termini, -- one at Portland, Oregon, the other at Puget Sound, in Washington Territory.

The first 100 miles, along the line, west from the Lake to the Mississippi, is a Lumber and Mineral district, with abundant Water Power.

The next 350 miles, to the Missouri River crossing the Red River Valley and Eastern Dakota, is a well-watered Prairie country: for

nearly the entire distance the soil is very superior, equal to the best in any land. (On this section track-laying is proceeding at the rate of three miles per day.) In October, the road will e opened for traffic to the Missouri Riverwhere it will connect with steamers running 1,000 miles further west, to Fort Benton. As many as 33 steamers have been employed in a single season to accommodate the trade of these upper waters. Commencing about where the line crosses, Lignite coal has been traced, in beds from 2 to 7 feet thick, for 600 miles up the

Miscouri. The mauvais terre or "bad lands," so-called, through which some of the exploratory lines were traced, are not found on the line finally adopted. Trains have been running egularly for six months to Red River; they there connect with steamers running north to Manitoba. A branch road, now building along Red River Valley, will also connect the trunk line with Manitoba. 30,000 emigrants are said to have settled on the Company's land in thi

valley last season.

Exclusive of the 517 miles of trunk lin nearly completed, 836 miles are being finally located and prepared for contract: this includes 225 miles extending from the Missouri along th valleys of the Heart River and Guldives Cree to the crossing of the Yellowstone, in Easter Montana; much of this section is prairie, simi ar to that east of the Missouri: the remainde is adapted for grazing. Coal outcrops over a large part of this district—a bed 14 feet thick,

said to be of excellent quality, is exposed on the Little Missouri.

The Yellowstone Valley is 400 miles long by 150 wide; the road will run nearly the whole length, and is now being located along it. ere, as well as east and west of this section cattle graze the year round without housing Coal beds, similar to those, of the Missouri, are found all along the Yellowstone and on some of its tributaries. Gold has been discovered in

The Rocky Mountain section, about 300 miles long, crossing Western Montana and Northern Idaho, is a Mineral and Agricultural region; the numerous extensive valleys of this locality are exceedingly fertile, equaling any part of the Continent in the quantity and quality of their agricultural productions. In the yield of Gold Montana now is second only to California. Montana last year paid for freight about \$4,000,000; the Government transportation for the Forts of the Upper Missouri amounted to nearly as much

ket in San Francisco; it is used in the Asia steamships and for other purposes. Puget Sound, with its 1800 miles of coast line and bold shores, has no equal as a harbor in the world, except in the British possession to it

north.

The newspaper items about Indians, and damage from them to the road, are attributed by the Company to frontier speculators, who wish to see Government money spent in their vicinity and to their advantage. There is no opposition from the Indians on any part of the

The latitude of the western terminus of the Northern and Dominion Roads give them to the ports in Asia an advantage over the Union and Central of 800 miles. elevation in crossing the Rocky Mountains of the Union and Central is 8235 feet, on the North-

I am authorized to sell North Pacific 7-30's at par and accrued interest in United States currency: at which rate they will yield the Provincial invester over 8 per cent. The bonds and interest are both payable in Gold, and are free from United States tax. The Company's enormous land grant of nearly 23,000 acres per mile of road, which with the track, &c., is bound by the loan, should render these bonds one of the safest of investments, sure to rise much above par in market value on the completion of the road, and the closing of the loan. The process of redeeming and cancelling the bonds has already begun, as these securities are now being received in payment for the Company's Lands Official returns show that 26 leading Lands Grant Railways in the United States have sold their lands at an everage of \$7.04 per acre Should the Northern Pacific Company realize the low estimate of only \$4 per acre, the proceeds of their grant would more than twice pay the cost of building and equipping their road.

A pamphlet with maps prepared and issued by the subscriber, fully descriptive of the Road Bonds, Land &c., can be had on application. I am authorized to sell North Pacific 7-30's at
