

DEEDS OF KINDNESS.
Suppose the little cowardly
Should hang in golden awe,
And say, "I'm such a tiny flower,
I'd better not grow up,
How many a weary traveler
Would miss its fragrant smell!
How many a little child would grieve
To lose it from the dell!"
Suppose the listening dew-drops
Upon the grass should say,
"What can a little dew-drop do?
I'd better not away!
The blades on which I rest,
Before the day was done,
Without a drop to moisten it,
Would wither in the sun."
Suppose the little breezes,
Upon a summer day,
Should think themselves too small to cool
The traveler on his way;
Who would not miss the smallest
And softest ones that blow,
And think they make a great mistake
If they were taking no rest!

How many deeds of kindness
A little child may do,
Although it has so little strength,
And little wisdom too!
It wants a loving heart,
Much more than strength, to prove
How many things a child may do
For others by its love.

TRIP LIGHTLY.
Trip lightly over trouble,
Trip lightly over wrong,
We only make grief double
By dwelling on it long.
Why clasp your hand so tightly?
Why sigh over losses dead?
Why cling to forms unloving?
Why not to joy instead?
Trip lightly over sorrow—
Though this day may be dark,
The sun may shine to-morrow,
And gladly sing the lark;
For hope has not departed,
Though none may have left;
Then never be down-hearted,
But look for joy instead!

How many deeds of kindness
A little child may do,
Although it has so little strength,
And little wisdom too!
It wants a loving heart,
Much more than strength, to prove
How many things a child may do
For others by its love.

THE BED OF THE ATLANTIC.
Soundings in the Atlantic, according to
All the Year Round, have revealed the fact
that at least two hundred miles from the
coast of Ireland, the water is still
shallow; or, in other words, that there is
another Ireland only waiting to be raised—
thus reversing the famous panacea for keep-
ing the country quiet. It is just beyond
this that the true Atlantic begins, the gulf
suddenly sinking 9,000 feet. Thus Ireland
may one day have for its high as the
Alps. The whole floor of the Atlantic is
paved with a soft, sticky substance, called
ooze, nine tenths consisting of very minute
animals, many of them mere lumps of jelly,
and thousands of which could float with ease
in a drop of water; some resembling toothed
wheels; others bundles of spines or threads
shooting from a little globe. Some, how-
ever, are endowed with the property of sep-
arating flint from the sea water—which is
more than every chemist could do; and
there are hundreds of square miles covered
with the skeletons of these little creatures.
Part of this ooze is doubtless from the clouds
of rain dust which rise from the vast steppes
of South America, which, with masses as
dark as the sun and make the animals fly to
shelter, and which, after sweeping like a
sneezing over the country, lose themselves in
the "steep Atlantic." No bones have been
found of the larger animals, so that the
kraken or sea-serpent might sleep their last
sleep, and leave not a bone or a vertebra to
tell the tale. But a snail or an anchor, not a
block or strand, nor a coin or a keystone
has been found to testify of the countless
gallant ships and more gallant men who have
gone down amid the pitiless waves.

HOW TO CLEAN FURS.
This is a subject of so much interest to all
our lady readers, (and gentlemen too, in the
direction of their pockets,) that we give the
following directions, in full, from the House-
hold Journal, which says it will "make old
furs look as good as new."
Strip the fur articles of their stuffing and
binding, and lay them out as nearly flat as pos-
sible; then brush them well with a stiff
clothes brush; if there be any moth-eaten
places, cut them out and replace them by bits
of fur to match. Furs, when old, look much
better after being stretched, which is done as
follows:—Dissolve three ounces of salt in a
pint of soft water; with this sponge the in-
side of the skin until it becomes thoroughly
wet; be careful not to wet the fur; lay it
on a board with the fur side downward,
stretch it as much as it will bear, to the re-
quired shape, and fasten it with small tacks
until dry. If required to dry soon, the skin
may be placed about a foot from the stove
or grate. Sable, chinchilla, squirrel, fish, &c.,
may be cleaned thus: Warm a quantity of
soda in a pan, stirring it well, so that it may
not burn; when well warmed, rub it thor-
oughly into the fur, against the grain, then
shake it out; repeat this process several
times, then shake the fur, and give it a good
brushing. Flour, well rubbed into these
furs, will clean them, but not so well as the
soda bran.

Ermine and other light furs may also be
cleaned with flour. If they are very much
soiled proceed as follows:—Lay the fur on a
table, and rub it well with bran moistened
with warm water; rub it until quite dry,
and afterwards rub it with dry bran.
The wet bran should be rubbed on with a piece of
sponge, and the dry bran rubbed on with a
brush. Finish by rubbing well with magnesia or
stiff book-muslin. Swansdown may be washed
thus:—Make a strong lather of white
soap and warm water; (merely luke warm,
as if hot it will shrink the skin of the swans-
down.) through this lather shake and
squeeze the swansdown well, but do not
squeeze it. Do the same through a second lukewarm
lather, and repeat the process till the article
looks white and clean. Then rinse it through
two waters (the first lukewarm, the second
cold), squeezing it carefully, shake it out
and dry it in the sun, or by the fire holding
it in your hands and shaking it constantly
to prevent it drying with a matted, rough
appearance. If properly washed and dried
according to these directions, the swansdown
will be almost as soft and white as when new.
Should the swansdown be but slightly soiled,
do not wash it, but cleanse it thus:—Poultice
sift it through a fine sieve, and then heat
it over the fire. When the powder is quite
warm, (but not burning hot,) lay the swans-
down in a large, clean metal pan (also heated,
and) sift the powder over it as through a
sieve, turning the swansdown about, and
sifting the powder is distributed well
through it. Repeat this process until the
swansdown looks very white, then take it
out of the pan, and shake off the loose powder.

Lord Byron described a party with
which he dined, as follows: "It was first
silent, then talky, then argumentative, then
disputations, then unintelligible, then dis-
agreeable, then inarticulate, then drunk."

We have heard of taking for bread and
receiving a stone, but a gentleman may be
considered still worse treated when he
sakes for a lady's hand and receives her
father's foot!

**DEPRESSING ACCIDENT AT RIVER
QUAIL.**—A shocking accident hap-
pened on last Saturday morning, on the River
Quail section of the Grand Trunk Railway,
near River Quail. Four men were employ-
ed in clearing away snow from a cutting in
which it had drifted to the depth of fifteen
or twenty feet, when the train, which they
evidently had not heard, owing probably to
the storm, came upon them and not only
killed them but horribly mangled their
bodies. It is thought that no blame attaches
to the engine driver or conductor; but a very
general desire exists that the Railway author-
ities should do something for the families of
the unfortunate men, and we have little
doubt they will.—Advertiser.

**REPORT OF RAILWAY
COMMITTEE.**
To the Warden and Council of the United
Counties of Lanark and Renfrew in Ses-
sion assembled.

Your Railway Committee to whom was refer-
red the proposition on the part of the Brookville and Ot-
tawa Railway Company, that they be allowed
to issue preferential bonds of that Company
to the extent of £100,000, beg leave to report
as follows:

1st. That the Company place in the hands
of your Treasurer £5,000 of present Com-
pany's bonds, as collateral security, for the
payment of the interest of last year due to
the Government by these Counties on the Mu-
nicipal Loan Fund, to be surrendered on the
payment thereof.

2nd. That the total surplus earnings of the
Road, over and above the actual running
expenses and necessary repairs, be used for
the purpose of paying said interest, and that
the amount of such surplus earnings be paid
monthly to the Treasurer of these Counties.
3rd. To be inserted in the amended Act
that the proceeds of £70,000 of the pre-
ferred bonds to be issued as prayed for,
shall be set apart for the extension and com-
pletion of the Road to Roddy's Bay, and the
purchase of the necessary rolling stock for
the proper working of the Road, and that the
Company shall have no right to expend such
proceeds for any other purpose whatsoever;
4th. That in addition to such provision
it is to be understood that estimates shall be
made monthly of the work done, by Mr.
Brooks, the present Company's Engineer,
or some other Engineer to be approved of
by this Council, and that upon such estimates
the proceeds of the aforesaid bonds shall be
paid out for the purposes specified.

5th. That the balance now due the various
Contractors, the payment of whose contracts
was guaranteed by the members of the
Board of Direction who represented this
Council, shall be paid out of the proceeds
of the remaining bonds, not to exceed £15,
000.

6th. That £10,000 of the said preferred
bonds be placed in the hands of the
Treasurer of these Counties, with power to
sell the same for the payment of the interest
due by these Counties to the Government,
unless the same shall be paid by the Railway
Company; and if so paid by them, then an
amount of bonds equal to the interest so paid
be refunded to the Company.

7th. That the Company give their pledge
to this Council that they will pay to this
Municipality the amount of Clergy Reserve
monies now retained, or that may hereafter
be retained, by the Government in conse-
quence of any default of the Company; and
that the Company pay annually to the
Treasurer of these Counties interest at the
rate of five per cent per annum on the sum
so retained, and lodge with the Treasurer
aforesaid bonds of the Company as collateral
security until the amount of principal and
interest be paid.

8th. And your Committee would further
recommend that a Memorial to the Legisla-
ture, praying for the extension of the said £100,
000 of preferential bonds, be adopted
upon the foregoing conditions being complied
with.

All of which are respectfully submitted.
Jas C Foster, Chairman.
Jas Gould,
T J French,
A McArthur,
N Burwash,
John Murray,
Adopted, subject to the approval of the rate-
payers.
D. G.
To the President and Directors of the Brook-
ville and Ottawa Railway Company.
GENTLEMEN—
The following Report of the various de-
partments of the Road for the year ending
31st December, 1860, is respectfully sub-
mitted.

I am also enabled to state that, of the
35,956 Passengers who have travelled on the
Road, not one of them received the slightest
injury.

The quantity of Lumber carried has been
much less than was expected, but the receipts
from Passengers and Merchandise show very
favorable returns, and will undoubtedly con-
tribute to increase.

The quantity of Lumber to carry this year
will double that of last; and now that we
have a connection with the St. Lawrence,
we may fairly expect a large portion of the
Freight which last year went by the Rideau
Canal.

I would beg to state that from the want
of a sufficient number of Engines, our re-
pairs of Rolling Stock costs more than it
otherwise would, from the fact that we are
unable to give the Engines a thorough over-
hauling when required.

I consider it actually necessary that at
least one more should be put upon the Road
the present year, in order to enable us to do
the business that offers.

The want of Water Supply at Smith's
Falls and Franktown, is a cause of consid-
erable detention to the Trains in Winter, as
it is not unusual that it is necessary to run
five or six miles expressly for water.

Were there Tanks at these places, the
men at the Stations could do the pumping,
and therefore save the expense of keeping a
man at the Montague Ballast Pit.

A statement of the various works neces-
sary to be done during the present year, with
the estimated cost of the same is hereby ap-
pended.

I have the honor to be, Gentlemen,
Your obedient servant,
A. Brooks,
Engineer and Acting Supt.
Superintendent's Office,
B. & O. R.

JAMES H. WYLLIE
Almonte, June 18, 1860. 41st

FOR SALE OR TO LEASE for a term
of Years.
THAT Valuable Property, in the Town-
ship of Ramsay, known as "Woodside
Mills," consisting of a FLOUR MILL with
two runs of BURR STONES, a Superior
SMUT MACHINE, an OATMEAL
MILL, with two runs of Stones, one of
which is a Burr.
The Mill is three and a half Stories high,
and most substantially built. There are al-
so on the premises a KILN, capable of dry-
ing from 120 to 200 Bushels of Oats at a time,
a Frame House, for a Miller, a Blacksmith's
Shop, with tools complete, two Stone Houses
and Out buildings, with Stabling for eleven
horses, Haystacks, Sheds, Cooch Houses, &c.
There are 200 acres of Land, about 80 of
which are under cultivation. As there are
other water privileges on the premises, fur-
nishing an abundance of water power, a large
amount of machinery could be erected in ad-
dition to that in operation.
For further particulars, apply to the Sub-
scribers on the premises.
WILLIAM BAIRD,
JOHN BAIRD,
Ramsay, 20th April, 1860. 33rd

WORKS, GORE STREET, PERTH.
The Subscriber returns thanks for the
liberal support he has had from the
public, since he commenced business. He
will still warrant all work done at his Shop
equal to any in the Province.
10 per cent will be taken off the General
price for all work taken from the Shop by
the parties purchasing.
Orders in his line with MR. POOLE, of
Carleton Place, will be strictly attended to.
May 10, 1859. 35

LAND SURVEYING.
A NEW SYSTEM.
The Subscriber is provided with the best adapted
and most accurate instruments ever used in the
Survey of Land, and will undertake Surveying
in every part of the Counties of Lanark, Renfrew,
Carleton and Russell, as well as in the adjoining
Counties, at very low charges.
For Sale Lines by the meridian very accurately
drawn, a uniform charge will be made as follows:
1st.—For not over half a mile \$10.00, not over a
mile \$12.00, not over 1 1/2 miles \$15.00, and
while less accuracy required, lower charges. No
fees charged, when required. All true and
Letters, describing exactly the survey to be made
and addressed Perth, C. W. will receive prompt at-
tention.
JOHN M. O'CONNELL,
P. L. Surveyor.
Perth, May 3rd, 1858.

JOSEPH DAVIES.
DEALER AND MANUFACTURER IN
AMERICAN and ITALIAN MARBLE,
MONUMENTS, TABLES, HEAD STONES,
HEARTH STONES, and CHURCHY TABLES.
Executed with neatness and despatch at his
WORKS, GORE STREET, PERTH.
