PRINTING PRESS...

WHY PROGRESSIVE, FAR-SEEING, PUSHING PRINTERS BUY MIEHLE PRINTING PRESSES:

- BECAUSE.. They make money enough for their users, by excess of product over any other single cylinder presses made, to pay their cost in three years.
- BECAUSE.. They do the finest grades of printing at greater speeds than can be obtained from any other presses.
- BECAUSE.. They will not disturb your building by plunging and shifting on the floor, thereby endangering the lives of tenants.
- BECAUSE.. They will run with much less power than other presses, and give a much longer life to your type and plates.
- BECAUSE.. They will not annoy you with noise, rumbling, bumping, grinding, banging and other disagreeable tendencies predominant in other presses.
- BECAUSE.. They will not wear out your patience by frequent breaks and their attendant machinists' bills.
- BECAUSE.. All that we claim as to speed and lasting qualities are the results of admirable—PATENTED—and tried mechanical movements and superior workmanship.

SEND FOR REVISED CATALOGUE OF 1895.

The following are a few progressive, far-seeing, pushing printers who are using Miehle Presses, and find them a most profitable investment, as the number each concern has will testify:
