M. Ft. pil. Sig.: One pill three times a day.—*Watkins.*

INDELIBLE BLACK

PATENTED MARCH 25, 1890

THE TWIN, HALF-MINUTE, BARRY SCALE CLINICAL THERMOMETER

Simple to Understand, and Easy to Read

It gives the practitioner at a glance the amount of his patient's fever, expressed in degrees and parts thereof. It answers the question briefly: How many degrees of fever have I got? And in place of saying 90, 100, 102, etc., we have it expressed in figures, from normal (o) 1, 2, 3, 4, etc., degrees of fever. A trial of this instrument will prove its importance. Twin instrument. Standard accuracy certified. Price, in rubber case, twin, plain, \$1.75; twin lens, \$2.00.
