

THE SMITH CONCRETE MIXER

GENERAL DESIGN

The Smith Mixture is designed to effect a uniformly thorough mixture of material in the shortest possible time. The working parts are arranged in such a way that strain and wear are reduced to a minimum.

WORKMANSHIP

The most careful attention is given to every detail and we are confident that our product will bear the closest examination.

WHAT IT IS SUITED FOR

The Smith Mixer, being made in several sizes and many styles, is adapted to all classes of concrete work. We design and construct special outfits when necessary.

WHAT IT HAS DONE

The Smith Mixer has mixed concrete on practically every important concrete contract in Canada, and has never been known to fail. We would like to refer you to the users of the Smith.

OUR GUARANTEE

Is behind every machine sold, and we believe that our machines are capable of doing more than we claim for them.

THE ABOVE STATEMENTS

are general; we want you to communicate with us for details.
