

Nerves Were A Wreck. Could Not Stand The Least Noise

Miss Florence H. Perry, Courtland, Ont., writes:—"I wish to write you a short letter telling you of the help I received from the use of your Milburn's Heart and Nerve Pills. A year ago my nerves were a real bad wreck and was so nervous I could not stand the least noise. My sister had taken your pills and advised me to give them a trial. I took three boxes and saw they were helping me so I kept on taking them until I had used five boxes, and I can say in true words that I am strictly cured."

To anyone troubled with their heart or nerves we would strongly advise them to take a course of our Heart and Nerve Pills as we feel confident that they will do them a world of good.

If your druggist or dealer does not keep them, we will mail them direct on receipt of price—50c. per box or 3 boxes for \$1.25.

Purebred Registered
HOLSTEIN CATTLE
The most profitable dairy breed in size, milk, butterfat and in vitality. Send for FREE illustrated descriptive booklets. Holstein-Friesian Assn., F. L. Houghton, Sec'y, Box 127, Brattleboro, Vt.

MINSTER FARM
Holsteins and Yorkshires
R. HONEY, Brickley, Hastings St., Northumberland County, offers bull calves from R. O. P. cows, and from a son of Count Hengerveld Fayne De Kol, also breds and sows ready to mate.

Nervous Party—"The train seems to be travelling at a fearful pace, ma'am."

Elderly Female—"Yus; ain't it? My Bill's a-drivin' of the ingen, an' e' can make 'er go when 'e's got a drop o' drink in 'im."

QUESTIONS AND ANSWERS. Miscellaneous.

BUILDING LINE FENCE.

I have started to put up a new fence on the dividing line between my lot and my neighbor's. The fence is to be cedar posts and wire fencing.

1. Does it matter on which side of the posts the wire is fixed, whether my neighbor pays half the expense or not?

2. I am building the fence with the help of my sons. I would like to know how the law is regarding line fences? I know in the Old Country the law is very strict on such matters. My neighbor has said he would bear half the expense, but his word cannot be relied upon. Can I make him pay his share?

Ontario.

Ans.—1. We think not, so long as no more than half of the entire structure is placed upon his side of the boundary line.

2. Yes; but you ought to have an agreement in writing with him, otherwise you might have to begin again and call in the local fence-viewers pursuant to The Line Fences Act, as your first step in the matter. See especially Sections 3 and 4 of the Act (Revised Statutes of Ontario, 1897, Chapter 284).

HYDRAULIC RAM.

1. What would it cost to place an hydraulic ram in my stable?

2. I have a municipal drain running through my farm four feet deep, with four inches of spring water running all the time. It is twenty rods from my barn, and about six feet of fall from barn to drain. What size of pipe would it take to draw water enough for thirty head of cattle, twelve horses, and thirty sheep? What depth would pipe be under ground? What does machine, or ram, cost alone? How much per foot does piping cost?

J. C. C.
Ans.—1 and 2. It is difficult to tell from the information given whether you could install a ram in this case or not. It all depends on what fall you can get in the drive pipe. The drive pipe should not be more than from 50 to 60 feet long, and the ram will work on as low as 18 inches of fall in that pipe, but it is better to have more. If you can arrange for 18 inches or more of fall, and at the same time secure an outlet for the waste water from the ram, then you could install one.

In determining the size of ram, one must estimate the amount of water to be used. Supposing that each horse and cow would drink 5 twelve-quart pailsful of water in a day, and each sheep say 4 of a pail, then the total amount during the day would be 217½ pails, or 2,600 quarts. If you could get 3 feet of fall in the drive pipe, then a No. 2 ram would supply 3,000 quarts, but if you could get only 18 inches, a No. 3 ram would supply 2,500 quarts. The former is considerably over and the latter a shade under the amount required. However, it is never well to work too close to the limit, and consequently I would recommend a No. 3 ram, if you could get a fall of 3 feet, and a No. 4 ram if you could get a fall of 18 inches. A No. 3 would cost \$11; the drive pipe should be 1 inch, and the discharge pipe ¾ inch. A No. 4 would cost \$14, the drive pipe being 1½ inches and the discharge pipe 1 inch. The price of the pipe will depend on whether you use black or galvanized iron. The present retail prices about as follows:

Size of Pipe.	per 100 ft.	Black.	Galvanized.
¾ inch		\$2.24	\$ 3.14
1 inch		2.90	3.84
1½ inch		5.10	6.82
2 inch		8.17	11.14

It is claimed by those who have had experience with gas pipe, that the galvanized is the more economical in the long run.

The depth underground depends somewhat on the exposure. With water running continually, the pipe would probably be safe at 3 feet, unless in a particularly exposed location.

WM. H. DAY.

LAKEVIEW HOLSTEINS

Young bull, calved Sept. 3rd, 1910, sired by Count Hengerveld Fayne De Kol, and out of an untested heifer, whose dam has a 21-lb. 7-day record and an 88-lb. 30-day record. This is a very smooth bull, mostly white, and is worth while seeing. Also several younger bulls, all of which are described in catalogue, which is sent on demand.
