FARM CONDITIONS

As Reported Up to Tuesday, April 6th.

The following is a summary of reports made by agricultural representatives to the Ontario Department of Agriculture:

The strong, keen winds prevailing during the latter part of the week have been somewhat trying to fall wheat, which is looking a little brown; but the roots of the plants are said to be strong, and a vigorous growth is expected with the first warm rain. Up to date there has been less heaving than usual of either fall wheat or clover. The latter crop is doing well where there was a good

catch last season, which, however, was not general.

Maple syrup is selling at from \$3 to \$4 a gallon. The run of sap so far has been comparatively light.

Hay, owing to the scarcity of straw, keeps up its price, the price per ton from \$17.50 to \$19 a ton.

Hogs are being marketed slowly at from \$17.50 to \$18 a ton.

Many cattle are selling in an unfinished condition, owing to the scarcity of grain and the high price of mill feeds. Young beef animals, however, are in good demand, vealers selling at from 12 to 17 cents a pound.

Many dairy cows are coming in this season earlier than usual.

Horses range in value from \$120 to \$300, according to weight.

Auction sales are frequent in many counties, and surprisingly high prices are being paid for machinery and live stock.

The Stronger Sex.

The United States Census Bureau has taken the trouble to inquire into the subject of longevity and has reached the conclusion that the age of 106 is possible for a human being, but that no man or woman has ever seen his or her 107th birthday, all stories to the contrary notwithstanding.

In point of longevity, women are far ahead of men, generally speaking. They are more desistant to diseases and they live longer.

Out of 1,000 girls born into the world, 750 live to reach the marriageable age of 18. Out of 1,000 boys, only 700 survive that long—an excess of 50 male deaths. Of the boys, 250 will live to be 69 years old, but 250 of the girls will safely pass their 72nd birthday.

Five boys (nearly) die for every four girls in the first month of life. Out of 1,000 female babies born in 1918, half will be living in 1976.

And yet women are called the "weaker sex." So they are, muscularly, but it is manifest that they are the stronger sex constitutionally. They possess what biologists term greater "viability"—a superior ability to survive.

Why nature so arranges matters is beyond explaining. Apparently she tries to make up for it to some extent by bringing into the world 1,013 girl babies to every 1,000 girl babies. But it is not enough. So much more hardy are the girl babies that they are actually a majority before the second year of life is reached.

How the Months Were Named.

January gets its name from Janus; February from Februa—purification—a Sabine word; March from Mars; April from aperio—open; May from Maia, goddess of growth; June from Junius; July from Julius; August from Augustus; September from septem—seven; October from octo—eight; November from novem—nine; December from decem—ten.

WORTH KNOWING.

System in housecraft makes leisure for the housewife a certainty, however large in the house. Have hanging in the kitchen a slate containing scheme of duties and timetable for performance of same. Thus will muddle be avoided. Herewith is a sample chart which works well in one house:

Monday—Washing.
Tuesday—Ironing and airing of clothes.
Wednesday—Cleaning of bedrooms.
Thursday—Sewing.
Friday—Cleaning of downstairs rooms.
Saturday—Ditto and shopping.
Tea leaves. Don't throw tea leaves away. Collect a week's leaves in a pail. Then pour over them one quart of boiling water, and leave for one hour. Strain and bottle the brown liquid. This is a splendid gloss-maker. If used with a soft piece of

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. Miss E. L. Doxey, graduate nurse, of 3220 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

flannel on mirrors, glasses or windows it makes them shine like crystal. It is a very good cleaner also for varnished wood and doors and furniture; also for linoleum. Only a little should be put on the flannel, but it cleans linoleum better than water, and if afterward polished with a soft duster it gives a polish like beeswax.

Keep an open mind for every fresh suggestion and invention, but use brains to adapt it to your own house and household. There is no royal road to labor saving; the capable woman must, and will, work out her own salvation.

In the household borax is one of the most useful articles, and should always be kept handy. Particularly useful is it for keeping meat, fish or other perishables fresh for any length of time. Water is rendered softer for washing by having a small quantity of borax dissolved in it. Borax in the garden is a splendid agent. If dissolved in hot water in the proportion of one pennyworth to a pint of water, and allowed to cool, it will kill green flies on roses and plants, and when applied to apple trees suffering from bright proves most effective. Borax well sprinkled in the kitchen is also effective in banishing black beetles.

For cleaning windows, mirrors and lamp glasses use borax instead of soda. A little borax added to black lead makes it give brighter lustre with less labor.

Chivalrous Private.

The wife of a wounded soldier was given a permit to France, to see him before he died, says the London (England) Morning Post. The funeral was on a wet, cold day. At the graveside the chaplain whispered to the woman "Now go and offer up a prayer." "Then I must kneel," she said. "No never mind kneeling; just stand," he whispered again. But a Tommy understood her distress, slipped off his coat, rolled it pillow-fashion, and laid it for her on the sodden ground, so she knelt and was comforted.

UNANSWERABLE.

(Argonaut.) A furrier was selling a coat to a woman customer. "Yes, ma'am," he said. "I guarantee this to be genuine skunk fur that will wear for years." "But suppose I get it wet in the rain?" asked the woman. "What effect will the water have on it? What will happen to it then? Won't it spoil?" "Madam," answered the furrier, "I have only one answer. Did you ever hear of a skunk carrying an umbrella?"

ONE REASON SOUNDS REASONABLE.

(Portland Press.) Why ice will be high: It was too thick to cut. The snow was too deep. It was too heavy to handle. It was too cold to work out of doors. The dealers need no more.

Picking Out a Hotel.

When I choose a hotel, I consider a number of things. I do not like a too cheaply kept one, for the biggest one I have stayed in was a first class hotel, but it was not a good one. The kitchen was almost dark and the food was not good.

The Walker House in Toronto is an exception. I have stayed there, and it is a beautiful one. It is a beautiful one. It is a beautiful one. It is a beautiful one.

Keeping Flowers With Sugar.

It is reported that two professors of a school of agriculture have made some interesting experiments in prolonging the lives of cut flowers. One hundred different flowers were used in the experiments, and it was found that sugar helped to keep most of them fresh, but positively injurious to lilies and sweet peas. It hastened the opening of roses and orchids, but did not affect tulips, daisies or caryanthemums.

Experiments were made with small quantities of chloral, ether, glycerine, alcohol, lime-water and ammonia salts, each of which served to lengthen the lives of various flowers. Some of the flowers kept in sugar and water lived four times as long as they ordinarily would.

The sugar does not have exactly equal effect on the different flowers. Carnations seem to like a 15 per cent. solution and roses do better in a solution of from 5 to 10 per cent.
