### The Housekeeper

Don't throw away any little pieces of soap. If you do not care to use a wire box containing the soap for washing dishes, then put them in a salt bag and use them in the boiler on wash days.

Match marks may be removed from painted walls by rubbing first with a piece of lemon, and then going over them with a damp cloth, dipped in whit-

ing.

Flat irons may be cleaned by washing soda water, dried well. and then rubbed smooth on common salt.

To prevent cheese getting dry or mouldy, wrap it in a cloth dampened with vinegar, and keep in a covered dish. To obtain a beautiful lustre on cut glass, wash in two quarts of fairly water to which one tablespoonful of turpentine has been added.

Emery powder and sweet oil, made into a paste is a good thing to have for polishing the handles on the range. When frying mush for breakfast, dip the slices into the white of an egg to

make them brown and crisp.

A pinch of salt added to a glass of A pinch of salt added to be glass of milk makes it more readily digested.

Red-bordered white crash towelling makes nice verandah chair covers, for they can be laundered with little trou-

Freckles may be cured by using dram of sal ammonia, with an ounce of German cologne, and the solution mixed with a pint of distilled water. A tea, made by pouring boiling water over sweet flagroot, will relieve worm sickness in young children.

#### A WINDSOR LADY'S APPEAL

To All Women: I will send free with full instructions, my home treatment which positively cures Leucorrhoea, Ulceration, Displacements, Falling of Womb, Painful or Innovity Womb, Painful or Irregular Periods, Uterine and Ovarian Tumors or Growths, also Hot Flushes, Nervousness, Melarcholy, Pains in the Head, Back or Bowels, Kidney and Bladder troubles, where caused by weakness peculiar to our sex. You can continue treatment at home at a cost of only about 12 cents a week. My book, "Women's Own Medical Adviser," also sent free on request. Write to-day. Address Mrs. M. Summers, Box H. 8, Windsor, Ont.

#### THE CURE FOR GRUMBLING.

(Detroit Free Press.) (Detroit Free Fress.)

The man with an income of \$1,000 a day is not likely to be religious, according to Dr. M. J. Magor, of Chicago, who has been discussing in his pulpit the old problem of the spiritual value of riches and poverty.

Doverty.

It is easy, and it is the fashion in these days, to generalize in this manner about the rich man, because some rich men make unfortunate and reckless use of wealth, to their own personal detriment. Often ruin, and to the offense and disgust of observers. This is in, line with the general custom in many quarters of persistently looking at the unpleasant things and so failing to see the other side. For there are rich men—anyone can name a dozen or two off-hand—whose revenues far exceed \$1.000 a day, who are devoted to religion and benevolence. So that it is not a matter of money but of personal inclination or character—call it which you will—that determines the religious or irreligious bias of the man. There are moneyless men who are religious or irreligious the man—not money or the lack of it—which should be considered in a problem of the kind raised by Dr. Magor.

Much of the gdumbling and discontent in the world would immediately vanish could the ordinary man adopt the plan of considering the good as well as the evil side of every question presenting itself. s easy, and it is the fashion in these

Minard's Liniment Cures Diptheria

### STONES FLOCK TOGETHER.

An English naturalist has lately given some intersting acounts of oddities found in the United States, and chief among them is the traveling stone, the size of a pea ordinarily, and yet sometimes reaching six inches in diameter. He came acress it in Nevada, where it is

most frequent.
It is really the queerest little stone in the world, for when a number of them are placed on the floor or on any level

surface and separated some distance from each other they begin to travel toward a common centre and to lie huddled together like eggs in a nest.

If a single stone is removed four or five feet from the rest it will immediately start with the greatest rapidity to join its fellows.

These stones are found oftenest where the land is very level and littig more than bare rock. Often scattered over these barren regions are little basins from a few feet to a rod in width and at the bottom of these basins the rolling stones are found.

The cause for the strange conduct is to be found in the material of which is a lodestone or a magnetic ore, which has the tendency to draw them together.

#### "FATHER'S DAY." (New York Herald.)

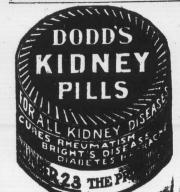

From far off Seattle comes a voice that gives us pause. The good folk there may be hopelessly distanced by the march of events and in the mental attude of the man who still is voting for Andrew Jackson. Again, they may be therees rallying to a lost cause. In any event, yesterday they celebrated as "Father's Dax."

heroes rallying to a lost cause. In any event, yesterday they celebrated as "Father's Day."
Whatever the occasion for this event, it is refreshing. It is a breath out of the nineteenth century and its predecessors. "Father's Day!" While we smile at the simplicity of our far western friends, let us not saeer; for even in this progressive east, where father is hardly enough in evidence to be marked as an exhibit, he still has a habit of coming home on Saturday night with the pay envelope, which represents not only the bacom but also slashed sheath skirts, turkey trot lessons and taxicab hire.

### A GRAND OPPCRTUNITY.

(Washington Post.) Doc Friedman says his rivals are merely jealous. The very thing-let him now discover the germ of jealousy and cure that if he can.

Love, being blind, never sees itself as others see it.

### USING WOOD-WASTE

#### Not Much Dead Loss in Lumbering Now.

Perhaps the most interesting development in the manufacture of wood products has arisen in the increasing variety of uses to which wood-waste can be put. Beginning in the forest,, the closer utilization of the various wood products can be traced through the sawmills and large wood working industries, right down to the firms working only on small

specialized lines.

The utilization of mill waste is being made increasingly possible by the devel-oping markets for odd and short lengths n lumber instead of a few assorted sizes. Many sawmills use their waste products in the manufacture of laths, mouldings, pickets, roller blinds and paving blocks. The manufacture of wood-pulp from the small waste wood now being fed to the burner is also a commercial possibility. Even sawdust has its uses, and in coun-Even sawdust has its uses, and in countries where more intensive utilization prevails it is being sucessfully mancufactured into a variety of products. Several plants have been erected in this country for its manufacture into ethyl (or grain). alcohol, sugar and briquets for fuel.

The bulletin now being issued by the Forestry Branch. Ottawa, on "The Wood-Using Industries of Ontario, throws considerable light on the utilization of wood-waste. Sash and door fac tories sell for use their short ends and trimmings for the manufacture of boxes, baskets, bobbins, butter moulds, insula tor pine, novelties, skewers, spindles, spools, stakes and woodenware. They bale their common sawdust and sell it for floor covering for the manufacture of composition, novelties, and for cleaning crews. They sell shavings for bedding packing and for drying wet land. Hick-ory and other hardwood dust is sold for smoking meats. In fact, just as the pork packers boast of using all a pig but the "squeal," so wood manufacturers will soon be able to boast of using all the wood but the bark, and even that, in the case of some woods, such as hemiock is of considerable value.

It is now commercially possible to reduce the fifty to sixty per cent. waste formerly left in the woods by lumbermen to no more than five per cent. by a combination of three well-developed hemical industries, namely, paper-making, wood-distillation (in a modifie form) and the manufacture of resin oils Practically all the valuable constituents from the stumps, tops, branches and de-fective stems which would otherwise he left to rot in the forest are thus con-

### FAMILY WORSHIP.

FAMILY WORSHIP.

(Kingston Standard.)

Hon. S. H. Blake, of Toronto, complains that family worship is practically a thing of the past in Ontarlo. And undoubtedly this is true. But we doubt if the morals of the community have suffered as a consequence of the decline of this form of worship. In some families it was looked upon more as a punishment and a torture than as a means of salvation. The tendency in the old days in a religious way was to do too much driving.

## Minard's Liniment Cures Distemper

### THOSE LOVELY CHIMES.

An American tourist was contemplating—from the outside—a quaint old chapel in one of the cathedral towns of England. In a nearby spire the chimes England. In a nearby spire the chimes began to ring. A venerable clergyman issued from the ivy-covered pile, and observing the look of rapt attention upon the stranger's face, was moved, out of the goodness of his heart, to approach and engage him in conversation appropriate to the time and the

"My friend," he began, "does not the sound of those sweet bells fall like a

benediction upon the soul?"

The American gazed at him blankly and cupped up one hand behind his ear in order to hear better.

"Which?" he inquired.

"Which?" he inquired.
The old rector raised his voice and shouted louder.
"I say that those lovely chimes seem to float down to us like a message of love and peace from on high. Do you not agree with me that theirs is a message from heaven?"

"I'm sorry," said the visitor, "but still I don't seem to get you."

The clergyman made a funnel of his hand in front of his mouth.
"I merely wished to ask you if you.

hand in front of his mouth.

"I merely wished to ask you if you, too, did not feel that the music coming from that tower yonder was truly celestial music, freighted with hope and beauty and glerious tidings?"

"Mister," explained the American, "the truth of the matter is that those during hells make so much realest."

durned bells make so much racket I can't hear a word you say."—Saturday Evening Post.

### FOR THE VACATIONIST.

The best protector a house can have is the next-door neighbor. He can fuss around and look like the proprietor. But, in any event, if no policeman goes near your place, no crook can feel sure that somebody may not walk up at any moment, insert a latchkey, and walk in. But, if a policeman is on the dob for five minutes in the twenty-four hours, the porch-climber knows exactly where he is at. When he has seen the policeman pay his regular visit, he knows the House is at his disposal for twelve, or possibly for twenty-fower, hours.

It is possitively sinful to tempt weak men into crime by a system so crude.

#### DON'T SMOKE, LADIES!

#### Here's the Reason Why You Should Not.

It seems that at last a purely physiological reason has been found why women should not smoke, apart from the very general prejudice which exists in

this country.
"Soking," says Dr. Hargrave, a
London physician, "does not have the
same effect on women that it does on and that this is really beneficial from the viewpoint of the possible infection from the foods themselves.

"But with women it is a serious con-clusion reached from many experiments that few of them need tobacco. While the proportion of men whose salivary secretions were stimulated and sterilized by smoking was very large, the proportion of women, on the other hand, was very small. Even in women who have been habitual smokers for years the action of this weed was found to be less marked, in fact, almost negligible."

So apparently Dr. Hargraves is of the pinion that women should not smoke ecause they do not need it.

#### SLEEP IN CHURCH. WAR

#### German Professor Explains the Reasons.

Do you know why sermons make you sleepy? Because you hypnotize yourself,.

says a German professor.

Have you ever wondered why it is that you do get so sleepy in church that you sometimes think you are going straight off into a Rip Van Winkle slumber?

It is because you are too attentive. It isn't because the air is bad, thesermon stupid, or anything of the kind. The more faithful and zealous you are the

more faithful and zeadous you are the selective you can get.

The reason is that you gaze too hard at the preacher and hypnotize yourself. You are so attentive that you get yourself in an unnatural state and then suddenly you find that you are hopelessly sleepy and cannot remember what you have heard. early part of the service," the professor says, "there is variety—sing, reading and so forth—but the mon itself is utterly unbroken, head and body are in one position, the same profession of the profession of the same profession and position, all

notism."
Apparently from the trend of the professor's remarks, the only conclusion we ressor's remarks, the only conclusion we can draw is that, as the more attentive one is the less he hears, it would really pay one to give less attention and learn

more.

The comfort of it all is that the professor proves that it is really not our fault if we cannot remember that text.

#### Minard's Liniment Cures Colds, Etc. SAVE RELICS OF THE PAST.

(London Advertiser.)

(London Advertiser.)

It seems a pity that in a young and growing community there should be very little regard for the historic monuments that are so closely associated with ploneer life. Canadian towns have preserved very few of them. As the community grows older and richer, the relics of the past are swept aside, and little remains connected with the past. We think mainly of the present, somewhat of the future, but the past we bury out of sight. There will come a day with us, however, as it has come to many others, when we will realize more than we do now the work of the pioneers of Canada, and relics of their trials and their successes will have a value that they do not appear no wto have. A sentimental value it may be, but none the less a high one. Then, when we want to gather them up, it will be too late.

#### WILSON GIRLS CAN SEW. (Montreal Star.)

(Montreal Star.)

Employees of one of the leading departmental stores of Washington are telling a story that illustrates the wholesome simplicity of the family of President Wilson. According to the story, the President's daughters went to the store and looked at several gowns. They were informed that a charge of \$2 was made for alterations.

"Oh, we can make any necessary alterations at home; we know how to sew," said one of the President's daughters.

# SANOL CURES GALL STONES

Quick relief is what the sufferer from gall stones begs for and longs for, and quick relief is what SANOL, the great remedy for gall stones, and all uric acid diseases, will quickly afford.

SANOL is a herbal preparation, made from the formula of a great German Scientist. It is a thoroughly scientific preparation. It may be used with perfect safety. It will quickly relieve kidney trouble and all diseases of the urinary tract.

We can send literature, including let-ters, from sufferers who can be cured, which will tell fully what SANOL is and what it will do.

SANOL relieves and cures the discased organs, and acts as an immediate strengthener of weak kidneys, ipflamed bladders and all weaknesses of a like nature. Price \$1.50 per bottle; sold by all lead-

ing druggists. THE SANOL MANUFACTURING, CO., LTD., WINNIPEG, MAN.

### HUBBY WAS WILLING.

Here is one that was contributed by Winston Churchill, the author, the other evening when the conversation turned to the servant problem, and several sad-related their difficulties with hired help. "One-morning a few weeks age," said Mr. Churchill, "papa rambled downstairs, looked around and seeing no signs of breakfast, turned questioning eyes on little wifey.

"What's the matter, Minnle,' he asked, 'don't we eat this morning?

"What's the matter, Minnie,' he asked, 'don't we eat this morning?

"The bacon has been spoiled, George,' replied wifey, in a disappointed voice, the new cook has burnt it to a crisp."

"You don't mean it!'exclaimed George, inst a little excitedly. 'Have you fired her? Have you advertised for a new one? Have you—"

"Don't talk so loud, George,' interposed the little wife, in a gentle tone. 'She might hear you. We must not be too hard on her. She is young and inexperperienced. Won't you be satisfied with a kiss for breakfast just this once?"

"All right, deaire, submissively, re-"'All right, deaire,' submissively replied the old man, 'bring her in.'"

THE PERFECT SHOE FOR SUMMER SPORTS ASK YOUR DEALER.

### Plants Trees Upside Down.

Plants Trees Upside Down.

A foreign raitway company has solved the plan of getting good shade trees in a short time, though they may be small. The trees are so arranged that after two years' time they will give as much shade as trees in the ordinary way of setting out would give that are 15 or 20 years old, says the New York Press. The company gets a small elm tree, preferably, digging this, roots and all, from the ground. The tree then is set, the top part being set into the ground, and the roots are left in the air.

The tree then grows, forms roots on what originally was the top of a tree, and the original roots that now take the place of the branches begin to leak out and form a complete foliage very quickly. Beautiful specimens of such inverted trees are to be seen by the fountains in Kensington Gardens, London.

#### FOOLING WITH FIREARMS. (Ottawa Free Press.)

The foolish practice of encouraging promiscuous use of firearms as if they were popguns—and the Collingwood affair is a good example of it—is to blame were possessed as a good example of the same standard in the fair is a good example of the same standard in the From the city dweller's standpoint the From the city dweller's standpoint the 22-calibre rifle seems to be more deadly than the elephant gun. Its small calibre deceives one as to its power to maim deceives one as to its power to maim deceives one as to its power to maim or kill, and the major cities are caused by it

#### LIQUIFIED GASES AS EX-PLOSIVES.

Liquid air, and more especially liquid oxygen, are being experimented on in Germany as mine explosives, reports the Engineering and iMning Journal. The latter, mixed with aluminum powder, and detonated, forms an explosive about 2 1-2 times as powerful as black powder, from which there can be no deleterious fumes, as the only products of an explosion are oxygen and alumina.

### THE COSTLY RAT.

#### He Wastes Millions Every Single Day.

It has recently been estimated by a French statistician that \$1,000,000 worth of food a day is wasted on rats in Great Britain alone.

In other countries the expense runs equally high, and even higher. Every rat in France costs 2 cents a day for his keep.

keep.

In England a rat costs from 1-2 a cent to 5 cents a day to the person upon whose property it preys, and there are 40,000,000 rats in the British isles.

40,000,000 rats in the British isles.

In our country there are more rats than men, women and children, and doubtless their appetite is just as expensive here. In India, however, a country least able to bear the burden of supporting these pests, they are four times as numerous as the population, and each rat consumes on an average 3 cents' worth of food a day.

day.

Not long ago an international union was organized in France to rid the world of these unwelcome creatures.

The rat commits another sin besides impoverishing the country. He carries disease, and it is probable, because he is a thief, that he finally will be exterminated.

There is a race war going on between rats themselves which will help solve the problem. The black rat is being driven out by the gray rat. The black rat is a much greater nuisance than the gray. All along the Atlantic coast he has been driven out, and only the gray rat now is found.

Perhaps if the war between the fair race and the dark be kept up they may exterminate each other.

#### **BABY'S OWN TABLETS** HIGHLY RECOMMENDED

No medicine for little ones is so highly ecommended as is Baby's Own Tablets They are guaranteed by a Government analyst to be absolutely safe, and be-sides that thousands of mothers throughout the land praise them as the only sure cure for childhood ailments. Con-cerning them Mrs. Edward McDonald, Douglastown, Que., says: "I can highly recommend Baby's Own Tablets to any mother who has a baby suffering from Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

CAROLINE COE'S BEAN SOUP

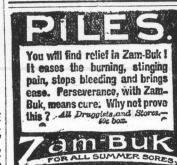

The day before I had served this homely soup I had boiled a tresh beef tongue. I kept the stock, turned it into a dish to cool, cook every bit of fat of the top. To three quarts of stock use twe-thirds of a cup of dry navy beans.

Soak the beans for an hour in clear cold water, then put them into the cold stock. Allow this to set near the fire or on the back of a range, for an hour. When ready to put on the fire, put in tow slices from the middle of the onion. A laurel leaf or sprig of thyme, one tiny pepper pod. Allow all to come to a boil slowly. When boiling reduce gas or gasoline flame or if on stove or range set back to simply simmer for the next few hours. Once in a while you must stir it all up well from the bottom of the kettle. An asbestos mat, price five cents, is most valuable to keep this soup from sticking. Place between kettle and flame.

When ready to serve turn out into a CAROLINE COE'S BEAN SOUP flame.

When ready to serve turn out into a soun strainer. Mash onion and bean

When ready to serve turn out into a soup strainer. Mash onion and beans as much as you can through the strainer. This stock should be reduced to about two quarts. Salt to taste and put back over a slow fire to keep hot. Now take one egg, break into bowl with a pinch of salt, one tablespoon of cold water, a dash of celery salt, one-fourth teaspoon of baking powder and dried bread crumbs enough to make a stiff paste that you can roll into bails. Drop these into boiling soup and allow to boil three minutes and serve.

#### American Army Has Adopted a New Model.

New Model.

The difference between a straight and curved sword may seem a negligible matter, but it has determined the fate of nations. Therefore, the recent adoption of a new sword model for the United States army, a weapon straight, double-edged, and designed for both cutting and thrusting, is a matter of more than technical interest, more than the hobby of officers charged not infrequently with changing types of weapons with little cause and much fickleness.

The new weapon, a straight-bladed speel, was adopted after the most modern practice of European fighting nations had been carefully studied. The mounted officers and men of the United States army are placed on equal terms with the fighting men of other first-rate powers. For more than fifty years the United States have used a curved saber for its cavalry men, a weapon praised and offense, and ridiculed as fit only to split bacon oper a slow fire.

The controversy is as old as the sword itself. The world has turned again to the straight blade, and the United States is getting in line.

The policy of the United States to maintain only a small standing army, with practically no experienced reserve, was one of the determining factors in changing the shape of the army sword.

When a reoky gets into the saddle his impulse is to use the sword for thrusting. He thrusts instinctively. In time of war the United States to maintain only a small standing army, with practically no experienced reserve, was one of the determining factors in changing the shape of the army sword.

When a reoky gets into the saddle his impulse is to use the sword for thrusting. He thrusts instinctively. In time of war the United States would fight a large part of its land engagements with the untrained recruit. He must have a weapon which he can use handily and without too much training. Later, with experience, he will learn to cut. The straight, two-edged blade is available for both practices; the curved steel is a cutting weapon of twenty centuries. The short sword of Rome was every ear

### JANE ADDAMS AS MAYOR.

(Buffalo Times.) One of the first fruits of Suffrage In Illinois is the suggestion of Jane Addams for Mayor of Chicago, sounds funny, we have to laugh when we think o it. But we can't deny a belief that such a consummation would shoot some hop into the swordarm of the Goddess of Justice.

#### NEW YORK AND CHICAGO. (Detroit Free Press.)

We're afraid a proper comparison of the respective virtues of New York and Chicago would be a goo ddeal like a com-parison of the glories of the hot and cold sections of Milton's hell.
