How we strained them; how we taxed them with overwork; and then, because they were tired we rubbed them to make irritation worse. **DIED IN VANCOUVER.**

An old Kent boy, William Stannard, son of Mr. George Stannard, of Raleigh, died in Vancouver, B. C., on Dec. 10. His remains were interred there, with full military honors, deceased having been an honored member of the military corps there. Describing the funeral a Vancouver paper says:—While Canadian soldiers may to-day be giving up their life's blood fighting for their country, their brother soldiers in Vancouver this afternoon paid their last tribute of respect to one of their number in the person of Private William Stannard, of No. 3 Company, Sixth Regiment, The Fusiliers.

The funeral took place from the Center & Hanna's parlors at 2:30 o'clock, and was attended by a large turn-out of the Sixth Regiment. The pall-bearers were chosen from the members of No. 3 Company, as was also the firing party. The regimental band was in attendance and played the Dead March in Saul, with beautiful effect. The service at the undertakers' and at the grave was conducted by the Rev. H. Fiennes-Clinton, of St. James' church.

**UNLIMITED FUEL SUPPLY.**

J. L. Scott journeyed to Wallaceburg Friday for the purpose of investigating the great fuel beds in that vicinity. In company with one of D. A. Gordon's men he examined the peat in the Big Plains, about two miles from Wallaceburg. He found unlimited quantities of the new fuel in the crude state, and reports that it is of excellent quality. It is not, however, nearly as deep as that at the Eau.

For fuel purposes, Mr. Scott also ascertained that there were large deposits of the turf on St. Anne's Island and along Running Creek, which is within half a mile of Wallaceburg.

D. A. Gordon is taking a great interest in the peat fuel question. For, if the fuel is suitable, he intends to use it in the glass works, where they consume 8,000 tons of soft coal annually.

If the turf from the vicinity of the "Burg" can be used, Mr. Gordon is contemplating erecting a plant for the manufacture of this fuel.

Corticelli Skirt Protector is all wool and the wool is selected for its elasticity, fineness and softness. It has a porous, elastic weave. It will not chafe the finest shoes. It is better than any other Skirt Protector because there is no cotton in it. Any "binding" with cotton in it will shrink and pucker the skirt. When the pile wears off it will wear the gloss off your shoes. Corticelli Protector will outwear the skirt. Sewed on flat, not turned over—The genuine is labelled
