It has been demonstrated that while the silver sentiment was not triumphant at the polls it is very strong among the It is reasonable to expect therefore that the McKinley administration will seek to interest other nations in behalf of a wider recognition of silver as a money metal.

The immediate effect of McKinley's election will be to release capital from the bondage of fear and distrust in which it has so long been held and give renewed activity to American industries.

This very increase of the general business of the country will have a most that produce these metals. We think it much the best to take a hopeful view of the situation. The American people are tired of inactivity and almost any settled | Co., \$1. policy would be better than the uncertainties which have threatened the country for so many months.

EDITORIAL NOTES.

Description of the Property.

The company owns the Annie Fraction and the Comet No. 2 mineral claims. The Annie Fraction is situated between the California, Sau Francisco and Black Bear, the latter. of which is the property of the great Le Roi Mining & Smelting company and is the first western extension of the Le Roi mine. The vein of the Le Roi can be traced through the Annie Fraction and men at work on this property have tapped an ore chute at a depth of 40 feet from which assays gave returns of from \$14 to \$20.

The Comet No. 2 is a full claim, 1500 feet square, and lies about three miles north of Rossland. It has two strong well-defined ledges running through it. A prospecting shaft now down to feet shows nothing but vein matter the whole mass being well diffused with copper and iron pyrites. Assays averaging \$6 to \$8 have been obtained from this showing.

Shares.

The entire capital stock of the company excepting treasury shares has been pooled and placed in the hands of W. T. Oliver, manager of the Bank of British North America in Rossland as trustee. The company now offers 50,000 shares of treasury stock at the low price of
