Reading Makes a Deal to Use the Erie to Buffale and Send Coal to Canada. PHILADELPHIA, May 21.—Under orders of the Board of Managers of the Reading Rail-road surveys are now being made for a line to connect the Reading system at Williams-port with the Erie at Erwin, a few miles west of Corning on the main line of the latter road. About 30 miles of the Erie's Tioga branch (from Blossburg to Lawrence-ville) will be used to make the connection. It is understood that the Erie will build the road from Lawrenceville to Erwin, a distance of 9 miles, and that the line from Williamsport to Blossburg will be built jointly by the Reading and the Erie. This will give the Reading a line from its mines to Buffalo 87 miles shorter than its present route via the Fallbrook and New York Central, putting the Reading coal into Buffalo on a shorter line than any other except one—the Delawara, Lackawanna & Western—which is the same length.

The Eric Road is used from Lawrenceville also to make a connection with the Elmira, Cortland & Northern Railroad, which stretches out of the north 140 miles to Camden on the Rome, Watertown & Ogdensburg Railroad, which it is reported is already operated favorably to the Reading, at which point a large and constantly increasing anthracite coal tonnage is distributed.

It is said that President Corbin is not

satisfied with this terminus at Camden and that he has it in contemplation to extend the route from Camden to Watertown and thence to Morristown, the terminus of the Reme Watertown and Ogdensburg, where, as well as at Ogdenburg, ferry connections are established with the Canadian Pacific. An extension of five or six miles from Morristown to Ogdensburg will bring the route to a connection with the Central Vermont system, Through these connections Reading coal can be distributed along the entire lines of these two systems where at present it is entirely shut out. The connection with the Canadian Pacific will put Reading coal into the large Jno Clark, of the 17th con., Grey, who was over to Michigan three or four weeks ago looking for work, has returned on which places the consumption of anthracite account of the account of coal is on the increase, with every prospec that it will develop in the near future into large demand. President Corbin, accom panied by a surveyor, is now on the ground investigating this route in person.

> In the Hotel Business. WINNIPEC, May 21.—It is reported that the Canadian Pacific Railway has purchased the Clarendon Hotel here for \$80,000, and will fit it up in elegant form. The step is doubtless prompted by the fact that the Northern Pacific is building a mammoth hotel in connection with their station here the object being to capture all southern

gang of men putting in the plant for a range of six trap nets. The tug Ds. patch, of Goderich, is doing the work. They expect to be able to make the first It is also stated that Stewart Tupper, act ing for the Hudson's Bay Railway, has pur chased 60 acres of land in this city to be used as terminal grounds for the company. The belief is general here that the latter company has made such arrangements with the Domin-ion Government as will enable it to go on with the construction this year.

> Government Aid for the H. B. R.R. OTTAWA, May 21.—It is understood the Government has decided to grant substantia aid to the Hudson Bay Railway. The Manitoba members have been urging this course for some time past.
