

The Paige-Jewett Extra Long Springs

UNUSUAL comfort for all types of roads are notable features of both Paige and Jewett motor cars. The Paige, with its 131-inch wheel base, has rear springs more than 5 feet long. The rear springs of the new Jewett are 4½ feet long.

These springs are carefully designed for deep balloon tyres which are standard equipment on Paige and Jewett motor cars and still further increase their riding comfort.

With more than average weight, these motor cars hold the road. They are carefully balanced to insure maximum comfort. Deep cushion springs, the restful position of the seats, and ample leg room also contribute to riding comfort.

Paige and Jewett motor cars are as powerfully sturdy as they are comfortable. They are designed and built not only to give smooth performance, but to deliver tens of thousands of miles of trouble-free service.

## PAIGE AND JEWETT SPECIFICATIONS

Engine—4 cylinder, Paige 314" x 35"—Jewett 314" x 35"—lubricated by high-pressure oiling; two-unit electrical starting and lighting; shafts driven by chain with automatic take-up; self-adjusting clutch with plate of saw blade steel; four-speed

silent transmission; all steel, oil-cooled universal joints; heavy-duty axles; balloon cord tyres, Paige 35" x 6.75"—Jewett 31" x 6.25"—wheels, Paige 131 inches—Jewett 112 inches; four-wheel brakes, Lockheed hydraulic type, optional at slight extra cost.

## Our Montreal Letter

(From Our Own Correspondent)

## THE WEATHER PLAYS MANY PRANKS.

The weather for the past two weeks has gone on record for its variety of changes. Saturday, May 23rd, was a cold wintry day and snow fell in the vicinity of the Mountain. Saturday, May 30th, a rainstorm swept the city in the morning, and in the afternoon, a blinding hail storm, that beat with undue severity, made people very nervous, and damaged property, reigned supreme for nearly fifty minutes. Saturday, June 6th, the third day of excessive heat, the thermometer showing 95 in the shade. Straw hats were a novelty until a few days ago. Reports from Montana, state that four inches of snow had fallen in certain places on Friday, June 5th. Owing to the excessive heat here, Montreal is on the water wagon with a vengeance. On the first of June citizens were consuming 73,774,000 gallons while on the 4th the faucets were flanked to the extent of 75,000,000 gallons. At the present time Montreal is consuming 3,000,000 more gallons a day than for the same period last

year, an increase accounted for to a great extent by the rapid growth of the city. The pumps have been hitting on all cylinders this week, pumping 74,973,000 gallons yesterday and 73,841,000 the day before, compared to 68,810,000 and 69,454,000 gallons on the two corresponding days last year. According to figures supplied by the department at the city hall there is less water consumed on Sundays than on any other day of the week. This is accounted for by the fact that manufacturing establishments are closed on that day.

## DANGER TIME CLOSE AT HAND.

With the closing of the schools, thousands of children will be free for two months. Parental control, unfortunately, will be very lax in a large number of cases. They will wander away into danger, regardless of all the warnings, instructions, and don'ts received from their teachers. They'll run after rigs and auto trucks to steal a ride. The rivers, the lakes, and the canal will find them bathing. Companions, older than themselves, will entice them away from home to enjoy the vacation time, and when danger presents itself, the younger ones are left to do or die. They rush headlong into danger, and are swallowed up in the vortex of destruction. All over Canada, the toll of

young lives that are suddenly ended by accidents from autos and the water, is appalling, and reach the number of a couple of hundred. While the vast majority of these children cannot have a country home or enjoy camp life in the mountains, yet, those interested in their educational welfare, should have summer vacation schools established, thus enabling them to be kept out of danger, and at the same time keep their minds fresh with knowledge, and it would help also to build up their bodies. The dangers of our streets, are not lessening, but rather increasing. A youngster lately, running across the street to give a baseball mitt to a companion was felled by a bicycle and died a few minutes afterwards. A second boy jumped on a truck to have a ride, he was ordered off by the driver and while getting off he rolled under the wheels and was crushed to death. A third met death by drowning. He was anxious to go fishing, but his father forbade him. He went and he fell from the wharf at Longueville and was drowned. Almost every day, the same old story of accidents to the young has to be recorded. Before vacation has begun, in the last couple of weeks, the number of youths killed and drowned in the Dominion has reached 30. I wonder when they are singing their last song at the closing exercises, do they realize it may surely be their last.

"Vacation days are here,  
The happiest of the year,  
We'll sing and shout,  
For school is out,  
Welcome, welcome, vacation days."

## AN IMPOSING CEREMONY AT THE BASILICA.

On Saturday, June 6th, St. James Basilica witnessed a very imposing ceremony that took three hours and twenty minutes to perform. His Grace Archbishop George Gauthier ordained 31 deacons to the priesthood, and gave major and minor orders to 133 candidates. The ceremonies were attended by one of the largest congregations that has ever assembled in the Basilica, including clergy from the city and all parts of the United States and Canada. Hundreds stood during all the time. At the end of the service a procession of the candidates and His Grace Archbishop Gauthier attended by the Sulpician Fathers and several of the local clergy marched through the Church, all singing the "Te Deum." Three English speaking candidates were ordained for the Archdiocese, Rev. Fathers Edmund Jones, John T. Britt, and Gaspar Stanford. After eight days' vacation, the three new priests will be assigned to parochial work.

REPAIRS TO ST. JAMES BASILICA COMPLETED.  
The damages to the Basilica in the

recent fire amounted to \$20,000. Speaking to the Chief Engineer, he said, "I had left the furnace room at five minutes to eight to go to my breakfast, and had just reached my house when a boy came running in and said that the Church was filled with smoke. I entered the Church and then ran down to the furnace room to find that the oil and some papers were blazing. Fortunately a trap door was opened, and the firemen who had arrived had poured water with two streams, and had quenched it before it had a good start. Five minutes more and the church would have been partially if not wholly destroyed." The repairs are now completed, though the pillars in some places are marked from the effects of the smoke. The old sexton, M. Gaudin, a familiar figure who has been attached to the Church for 30 years, and who will be remembered by many Newfoundlanders who assisted at the services during their stay in Montreal is about to retire on account of sickness and old age.

## TO STAMP OUT A NUISANCE.

A nuisance even more serious than that of dishonest car watchers last year was that of the dishonest boy guide who would meet motor tourists from the South at the bridgehead and offer to guide them to hotels, boarding houses and so forth. Many of these trusting and innocent visitors, wishing to do the boys a good turn, found themselves guided to disreputable places, who paid the boys so much a head for customers. In fact the abuse reached a point where it was laid before Chief of Police Belanger by the Montreal Motorists' League; and as a corrective the Chief stationed a policeman at this end of the bridge to chase the boys away.

The motorist clubs here are hopeful that the nuisance will not recur this year; but they are ready to stamp it out if it does.

## THE GOOD QUALITIES OF WATER.

There are men still among us in Montreal, total abstainers, in their youth, who have joined in the old temperance song: "I'm very fond of a social glass, but it must be filled with water."

These will be interested to learn that London school teachers have just been instructed to stress the value of H 2 O as a beverage, for the nine reasons that water:—

- (1) Quenches thirst.
- (2) Regulates temperature by keeping the skin active.
- (3) Maintains the body moisture.
- (4) Helps to keep the body clean inside.
- (5) Aids digestion.
- (6) Helps to keep the body clean outside.

- (7) Keeps the mouth clean.
- (8) Helps to keep the blood in good condition.
- (9) The body is more than one-half water. The amount it loses each day in evaporation and elimination of waste must be supplied by drinking at least four glasses every day.

## SOME GOLDEN MAXIMS.

Dear Readers:—

Learn to laugh; a good laugh is better than medicine.

Learn how to tell a story; a good story, well told, is as welcome as a sunbeam in a sick-room.

Learn to keep your troubles to yourself; the world is too busy to care for your ills and sorrows.

Learn to stop complaining, if you cannot see any good in the world, keep the bad to yourself.

Learn to hide your aches and pains under pleasant smiles; no one cares to hear whether you have headaches, earaches, or rheumatism.

Learn to meet your friends with a smile; a good-humored man or woman is always welcome, but the despicable is not wanted anywhere.

Above all, give pleasure; lose no chance of giving pleasure.

Don't wait to say the needed word, or to do the needed kindness. Life, at the longest, is only a brief span; therefore don't let its chances pass you by. Give not only the kind and friendly word, but the encouraging and helpful one, as well. Commendation, when it is deserved, will make many a burden lighter.

You will pass through this world but once.

Any good thing, therefore that you can do, or any kindness that you can show to any human being, you had better do it now; do not defer or neglect it. For you will not pass this way again.

"Take time to speak a loving word, where loving words are seldom heard And it will linger in the mind, And gather others of its kind, Till loving words will echo where Erstwhile the heart was poor and bare; And somewhere on thy heavenward track Their music will come echoing back."

R. J. LOUIS CUDDIHY.

## Inkstains as Honorable

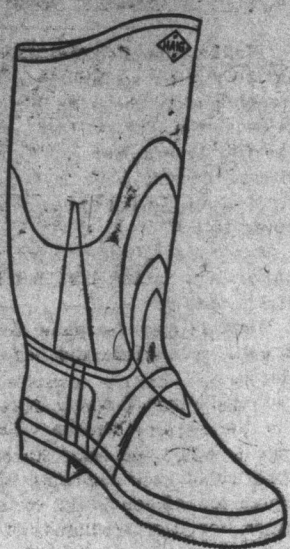

AS BLISTERS IS MOTTO OF UNION OF WHITE COLLAR MEN.

Berlin, June 13.—"Inkstains are as honorable as blisters."

This is the motto of the new International Union of White Collar Workers which was formed here recently and is claimed by its officers to embrace 500,000 office workers.

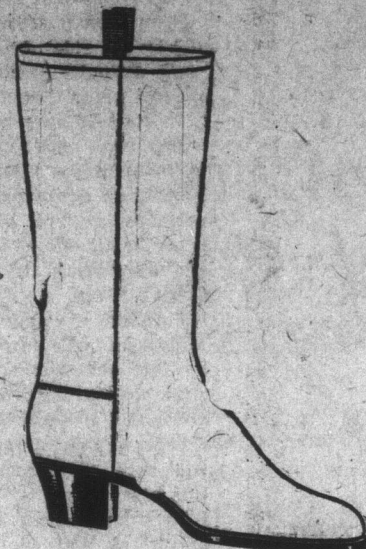

The International union, founded on

## The Truth!

Perhaps you consider Sunlight Soap too good to wash your floors with? Well! the purpose for which you use soap, requires pure soap. If you use impure, or inferior soap it cannot do the work of pure soap, because it does not possess the necessary qualities; consequently, pure soap such as Sunlight Soap, is best and most economical, and cheapest for ALL washing purposes. Soaps which cost less than Sunlight Soap are worth less, and so of Lever's Sunlight Soap, it can be said with pride, 'tis best and cheapest of all soaps, which cannot be denied.

## The Cemetery Beautiful

That is something more than a pretty phrase. It is an appeal to each individual lot-owner to do his share toward making the Cemetery what it should be—real, active—full of harmony—replete in restfulness.

It calls for artistic—although not necessarily large—Memorials, placed in well ordered, well kept settings—all brought together in a colorful gloom-dispelling picture.

The essential part of our business is to give assistance to those deciding these matters. Our service, with complete information, Catalogues and estimates, is at the disposal of all Memorial purchasers. We invite you to visit our Display Rooms and let us confer with you on what you require.

## Muir's Marble Works

MUIR BUILDING, 198 WATER STREET.

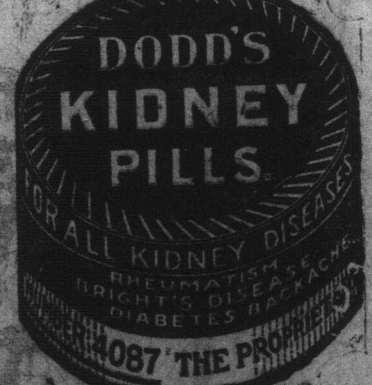

With this  
you can make your hair  
stay combed—all day

Men are finding in Stacomb what they have always sought—an easy, natural way to keep the hair looking always as trim and neat as their favorite barber leaves it.

Women find Stacomb just the thing to control stray hairs, to make the curl stay in, and to keep bobbed hair in place. Stacomb is a smooth, velvety, invisible cream—non-staining and non-greasy. It

comes in jars and in tubes—compact, economical. You can get it at all drug and department stores.
