Over 67,000 Owners Commend Studebaker Cars

Did you ever consider how much the testimony of 67,000 owners means? Suppose four-fifths of all the inhabitants of Quebec should come to you one by one and say "I know these Studebaker E-M-F '30' and Flanders '20' cars, because I own one. They are all right, the biggest values you can buy."

It would take over two weeks, at ten hours a day, for 67,000 Studebaker E-M-F "30" and Studebaker-Flanders "20" owners to tell you this about their cars, and when you realize that for every car in service at least five people know exactly how good it is, you could say that there are more E-M-F "30" and Flanders "20" boosters than there are inhabitants in Quebec, Winnipeg, Hamilton, St. John and Calgary put together.

The tremendous weight of such approval is overwhelming. There isn't any use to which you could possibly put a car which these thousands of Studebaker owners haven't experienced before you. 67,000 owners have proved that Studebaker E-M-F "30" and Flanders "20" cars are just as good as we say.

Every Studebaker owner will tell you his car is faster than anything near its size which he meets on the road. Studebaker cars are light, they will go over heavy roads where other cars cannot go, because the light car doesn't sink in. You will ride anywhere comfortably and safely. You can be sure, too, that wherever you go, you will always get back.

The car isn't built that has in it any better material or is more skilfully manufactured than are Studebaker E-M-F "30" and Flanders "20" cars.

In our Walkerville factories these cars are constructed with the utmost care. Our resources are enormous, and our immense production which, counting sales in all parts of the world, will aggregate close to 50,000 cars this year, enables us to build wonderfully good cars at low prices. We are now employing, altogether, between 8,000 and 10,000 men, with a monthly payroll of about \$550,000. 180 cars per day are leaving our different plants, requiring over 60 special freight cars to transport them.

Competing cars of higher price cost more only because so few of them are built. Any \$2,000 or \$2,500 car would cost much less if even 10,000 were built annually. Not what a car costs but what it is worth, should be your standard.

We could manufacture any competing car on the market, and in the quantities in which we sell Studebaker E-M-F "30" and Flanders "20" cars, sell the other car for less money than you are asked by other manufac-

In an E-M-F "30" or Flanders "20" you not only buy extraordinarily good cars but, dollar for dollar, you get more for your money than in any other car whatsoever.
