The World's Telephone Call is 1886.

Wednesday Morning, Feb. 3, 1886.

The Riot Reopened.

The trial of Riel over his riotous conduct has made its appearance in the Ontario legislature, and will be dragged across every "stump" in the province during both the provincial and federal elections.

We cannot regard the introduction of such extraneous issues into our provincial legislature with approval. It is enough that the administration of justice should be made a party issue at Ottawa without being also made a theme of debate in legislative bodies having no control in the premises.

Mr. Coleman White has racial affinities with the Indians and the Metis which may naturally lead him to take an interest in them, but we are constrained to say that his amendment to the address is not inspired by any higher motive than a desire to embarrass the government.

Mr. Coleman White has racial affinities with the Indians and the Metis which may naturally lead him to take an interest in them, but we are constrained to say that his amendment to the address is not inspired by any higher motive than a desire to embarrass the government.

There is no compromise in the air in London, according to yesterday afternoon's cables. If there is to be a coalition government, there is likely to be at least a policy of compromise.

The authorities of New York and Brooklyn are determined to deal thoroughly with the pauper immigrant question. During the past week, Dr. Hoop, secretary of the state board of charities, Superintendent Blake, of the department of charities of New York city, and the officers of the charity department of Brooklyn were engaged in examining alien paupers who had become inmates of almshouses in these cities, and returned to the public on the return of seventeen such paupers to their homes in different countries of Europe from which they had been shipped to the United States, as follows: To England, eight; to Ireland, three; to Switzerland and Germany, each two, and to Holland and Sweden each one.

It is on the cards that the Russians may have Delosses in the Innation line. An estimated cost of only \$800,000 they proposed to create an oasis upon their newly acquired Afghan frontier, by tapping the Oxus and permitting the water to take a number of old channels. It is thought the territory thus reclaimed will be long before capable of sustaining a population of a quarter of a million of souls.

whenever a son of thunder from across the border comes over with a big bag of wind and a bundle of fireworks, he draws immensely, and the higher his wind blows his rockets, the better many Canadians like him.

One of the arguments used by an English newspaper in favor of raising the subscriptions of members of the London stock exchange is that the present sum paid are "quite humble compared to the cost of access to the temple in Wall street, where the fabulous sum of \$7000 was recently paid for a single day's membership."

The New York Herald has been investigating certain Florida land schemes, and pronounces them fraudulent. Between Sanford and Tampa, a distance of 110 miles, there are a number of "titles" which are merely stretches of waste land, often surrounded by swamps, fruitful of nothing but snakes and malaria.

The British Encyclopaedia decides that James O'Rourke, the Dundee bookbinder, is entitled to an acknowledgment of the adhesive postage stamp, and not Sir Rowland Hill, as it generally supposed. Sir Rowland simply adopted in December, 1838, the Scotchman's invention long after his utility had been urged upon him by the mercantile committee of the city of London.

The body victory in middle Armagh, though achieved by a largely reduced majority, shows that there is "life in the dog yet." It looks, too, as though Mr. Gladstone's advice to his followers to vote for Dickenson was not generally acted upon. Either that or a good many wights must have voted against him.

Apurization from the accidental inhalation of illuminating gas has become so frequent a occurrence that it is now necessary to know that persons susceptible from having breathed gas may be revived by the administration of a few drops of acetic ether in water.

A number of Scotchmen who have stock in the Glasgow California Land company lose over half a million dollars by the late stock in the valleys of the Indian state. These Glasgow bodies could have done better to invest their barrow in Canada.

Elsewhere we print another installment of interesting cable correspondence on the subject of the great political crisis in the mother country. Some of the points made are striking and significant.

Mr. Kiro Shiro, the editor of the Yokohama Jiji Shimbun, has been converted to Christianity. Here is a good example for the party officers of Canada.

Editor World: Will you be kind enough to allow me to use your valuable space to draw attention to a grievance I refer to the digesting habit indulged in by quite a number of men, that of spitting into the gutter. This is a most objectionable habit, and one which I would like to see put to rest. I would like to see a law passed which would penalize any man who spits into the gutter. I would like to see a law passed which would penalize any man who spits into the gutter.
