ACRES IN THE OUTmarket, to be greatly increased when the
"Belt Line Rullway" lands are added.
Each acre returns on the average 10 lots
of 25 feet frontage, thus aggregating 100,000 lots. A purchaser of each would
count on the average for 5 of a family,
(according to statistics) which would increase our population 500,000 and create a
practical demand for the lots, and give
them's legitimate value. The increase of
half a million to our population is too
much to expect all a tonce. It is not slow
which is too long to sink money in paper
towns.
