

The New Onion Culture.

By T. Greiner. This new work is written by one of our most successful agriculturists, and is full of new, original, and highly valuable matter of material interest to every one who raises onions in the family garden, or by the acre for market. By the process here described a crop of 2,000 bushels per acre can be as easily raised as 500 or 600 bushels in the old way. Price, paper, 12mo., 50c.

The New Potato Culture.

By Elbert S. Carman. As developed by the Trench system, by the judicious use of chemical fertilizers, and by the experiments with potatoes carried on during fifteen years. Price, paper, 40c.; cloth, 75c.

The First Principles of Agriculture.

By Jas. Mills, M.A., President of the Ontario Agricultural College, and Professor Thos. Shaw, late professor in Ontario Agricultural College, now Professor of Animal Husbandry in the Minnesota State College. Universally commended as the best elementary text-book on the principles of agriculture yet published. It is authorized by the Minister of Education for Ontario for use in the public schools. 256 pages, illustrated, cloth-bound. Price postpaid, 40 cents.

Gregory on Fertilizers.

Where the material comes from. Where to get them in the cheapest form. How to compound formulas, etc. Price, 40c.

Manures.

How to make and how to use them. By Frank W. Sempers. The author has made a concise, practical handbook, containing the latest researches in agriculture in all parts of the world. The reports of the agricultural experiment stations have furnished many valuable suggestions. Both commercial and home-made manures fully described, and many formulas for special crops and soils are given. Price, postpaid, paper, 50c.; cloth, \$1.

Tomato Culture.

By J. W. Day, D. Cummins, and A. I. Root. In three parts. Part First—Tomato culture in the South. Part Second—Tomato culture especially for canning factories. Part Third—Plant growing for market and high pressure. Gardening in general. A practical book for those who work under either glass or cloth as a protection from frost. 135 pages; illustrated. Paper, 16mo., 35c.

Butter and Butter Making.

With the best methods for producing and marketing it. By Willis F. Hazard, president of the Chadd's Ford Farmers' Club, author of the "Jersey, Alderney, and Guernsey Cows." Illustrated. 25c.

Our Farm of Four Acres, and the Money we Made by it.

This work is written by a lady, and while containing many useful suggestions, it has the interest of a romance. Paper, 12mo., 30c.

Spraying Crops.

Why, when, and how. By Clarence M. Weed. Second (revised) edition. 130 pp. Illustrated. 16mo., 25c.

Wheat Culture.

How to double the yield and increase the profits. By D. S. Curtiss, Washington, D.C. Importance of the wheat crop. Varieties most grown in the United States. Examples of successful wheat culture. Illustrated. Paper covers, 50c.

Bennett's Farm Law.

A treatise on the legal rights and liabilities of farmers. By Hon. Edmund H. Bennett, LL.D. 12mo. Cloth, 75c.

Quinn's Pear Culture for Profit.

Teaching how to raise pears intelligently, and with the best results, how to find out the character of the soil, the best methods of preparing it, the best varieties to select under existing conditions, the best modes of planting, pruning, fertilizing, grafting, and utilizing the ground before the trees come into bearing, and, finally, of gathering and packing for market. Illustrated. By P. T. Quinn, practical horticulturist. Cloth, 12mo., \$1.

Handbook for Fruit Growers.

By F. R. Elliott. Containing instruction as to soil and location, how to grow from seed, bud and graft, the making of cuttings, pruning, best age for transplanting, etc., etc., with a condensed list of varieties suited to climate. \$1.

Strawberry Culturist.

By Andrew S. Fuller. Containing the history, sexuality, field and garden culture of strawberries, forcing or pot culture, how to grow from seed, hybridizing, and all information neces-

sary to enable everybody to raise their own strawberries, together with a description of new varieties and a list of the best of the old sorts. Fully illustrated. Flexible cloth, 12mo., 25c.

Fungous Diseases of the Grape and other Plants, and their Treatment.

F. Lamson Scribner, Prof. of Botany in the University of Tennessee, etc. 134 pages. Paper, 50c.; cloth, 75c.

Willard's Practical Butter Book.

A complete treatise on butter making at factories and farm dairies, including the selection, feeding and management of stock for butter dairying, with plans for dairy rooms and creameries, dairy fixtures, utensils, etc. By X. A. Willard. Cloth, 12mo., \$1.

Cattle.

Their varieties and management in health and disease. By George Armatage, M. R. C. V. S., London. This work is a guide to the farmer and breeder in reference to the ailments of his cattle. Separate chapters are devoted to each disease, with full details of the required medical and other treatment. The appropriate remedies with their doses, and usual form of combination, have been arranged with care. Price, postpaid, \$1.

American Dairying.

A practical treatise on dairy farming and the management of creameries, by H. B. Gurler. The book is in two parts. I. on private dairying, II. on creamery management. In part I. the herd, feed, management, milking, ripening, salting, working, and marketing are considered. In part II. the creamery management, patrons and more modern dairy machines and appliances are discussed. Illustrated. Cloth, 12mo., \$1.

The Winter Care of Horses and Cattle.

By T. B. Terry. Although the book is mainly in regard to the winter care of horses and cattle, it touches on almost everything connected with successful farming. 35c.

How to Handle and Educate Vicious Horses.

By Oscar R. Gleason. Directions for handling vicious horses, breaking colts, teaching horses tricks, etc. Illustrated. Cloth, 12mo., 50c.

The Horse.

Its varieties and management in health and disease. George Armatage, M. R. C. V. S., London. The object of this treatise is to show that an intelligent system of management will reduce, and in many cases prevent, the diseases of horses. The part on horse management is copious in detail, and the subsequent chapters on disease and its treatment are replete with information written in a simple style within the comprehension of most readers. Price, postpaid, \$1.

How to Judge a Horse.

A concise treatise as to its qualities and soundness, including bits and biting, saddles and saddling, stable drainage, driving one horse, a pair, four-in-hand, or tandem; and extracts from Rarey's and Rockwell's method of training young and obstinate horses. By Captain F. W. Bach. With thirty illustrations. 180 pp., 12mo., cloth, \$1.

The Sheep.

Its varieties and management to health and disease. By George Armatage, M. R. C. V. S., London. This volume conveys information on the numerous maladies of the sheep. The nature and causes of disease are fully treated. Considerable space is devoted to the most approved remedies and methods of treatment. The work is brought up to the present day experience, thus proving a safe guide to the sheep farmer. Price, postpaid, \$1.

Profits in Poultry.

Useful and ornamental breeds and their profitable management. This excellent work contains the combined experience of a number of practical men in all departments of poultry raising. It is profusely illustrated, and forms a unique and important addition to our poultry literature. Cloth, 12mo., \$1.

Johnson's Practical Poultry Keeping.

By G. M. T. Johnson. Illustrated. Paper, 12mo., 50c.

Low Cost Poultry Houses.

Plans and specifications for poultry buildings, costing from \$25 to \$100, with a chapter on poultry house conveniences. Illustrated. By J. Wallace Darrow. 48 pp., 8vo., paper, 25c.

Weeds, and How to Eradicate Them.

By Prof. Thomas Shaw, late Professor of Agriculture in the Ontario Agricultural College, and now Professor of Animal Husbandry in the Minnesota State College. This book is the outcome of much experience in dealing with weeds, and of much study and thought as to the best methods of eradicating them. Well illustrated, cloth-bound, price, postpaid, 75 cents.
