

The Reliable Spring Lever Poultry Punch.

If you keep a record of your chickens of the different breeds, hatches, strains, etc., there is no better, quicker, easier way than by using the Reliable Poultry Marker for punching the web between the toes. Hundreds of private marks can be made when your chickens are hatched, and a record kept so they can flock together until matured, and separated by their mark. The Reliable Poultry Punch is made in one size only, which can be used on any age fowls.

The leverage provided in this device for marking poultry enables one to punch with perfect ease any kind or number of webs.

The punch plunger in this marker is always in perfect alignment with the hole or die at the base of the punch, and this not only prolongs its durability, but makes a clean cut, never tearing the web.

The punch is self-opening, this action being produced by a strong coil spring encased with the plunger, which is compressed in the act of punching. The operation is in no way obstructed by the hands of the operator, and this enables one to punch the web at any desired point with absolute accuracy—no guess work. Those who have had experience in this line will appreciate the many important advantages of this punch. They are well made, handsomely finished and carefully tested.
