"PARIETTE" READY ROOFING

Particular attention is called to the fact that our Roofing does not contain the usual materials employed in ready roofings, such as "coal tar," "Trinidad asphalt," "asphaltic oils," all of which the test of time has proven to be very unsatisfactory. Our coating is not "hidden" between felts or other things, as is the case with other ready roofings, so that the value of it can be READILY SEEN and determined.

**This coating will not
run under
230° F.**

**FOR FREIGHT SHEDS
FREIGHT CARS
STATIONS
SHOPS
ETO.**

**SOME POINTS
OF SUPERIORITY**

**Absolutely Waterproof
Acid, Alkali and Steam Proof
Very Elastic and Pliable
Will Not Crack
Unaffected by Extremes of Temperature**

These materials have been successfully used for over eight years. Will not dry out or disintegrate; can be laid by any ordinary workman; never requires painting or coating; repairs never necessary; the lap cement will not dry out. "PARIETTE" READY ROOFING is put up in rolls about 41 feet long, 32 inches wide, containing 108 square feet, including 2 inches for laps. One square weighs about 47 lbs. without nails and caps. We furnish necessary nails, caps and lap-cement for roof without extra charge.
