MINING.

MOOSE RIVER.—Again our old friend, Mr. D. Touquoy has come to town, and this time he brought with him "triplets." The 3 bars contained 332 ozs., which were crushed from about 400 tons of quartz. Mr. Touquoy has been about four months quarrying the above, but kept the ore on deck, awaiting the completion of his new crusher. This he started up about a month ago, and he reports that it gives him every satisfaction. It was built and supplied by the Truro Foundry and Machine Co., whose reputation for first-class goods stands high. Mr. Touquoy reports his lead as getting bigger, and the gold is getting much coarser.

The continuation of "Bonnie Bras d'Or," from Halifax to West Bay and Return, by "Adios Amigo," will be found on page 7 of this issue.

GOLDENVILLE.—John H. McDonald continues to send in his regular number of 200 in the tons column. Some idea of the possibilities of low grade ore business in Goldenville can be formed from the fact that this work that has been carried on is in the shape of a big cutting. We are informed that only one drill is used on the work, and that principally to break up large boulders. A large milling business ought to pay at Goldenville.

STORMONT.—The Island Co. of tributaries working Hurricane Island at Isaac's Harbor have done a good tributary business. The whole amount from the Island since the lead was discovered is 674 tons of material (some of it being gravel and surface dirt) giving 1039 ounces, a rate per ton of something over an ounce and a half.

FORFEITURES.—The recent forfeitures of gold-mining properties made by the Hon. Commissioner of Mines has caused quite a brightening up of titles, and many owning property in other districts are looking to see if their districts are to be called up soon. Many are saving themselves from the stroke of the lash by surrendering their old leases and taking out new titles. Let the cleaning-up process go briskly, and have the anxiety over.

The following are the official returns for the month of June, so far as received at the Mines Office:—

CENTRAL RAWDON.—Gould Northup, of Mosherville, Hants Co.; Clarence Dimock, and Joshua Smith, of the Windsor Foundry Co., have been engaged for some time in prospecting and developing mining areas at Central Rawdon. Gold was found two years ago in the locality by the Indian prospector, James Cope, who got Gould Northup and others to take up and prospect some areas. Boulders of quartz showing some gold and gold-bearing alluvial were found in different parts of the district. The formation of rock outcrop presented peculiarities that made it somewhat difficult to arrive at a satisfactory conclusion as to the real character of the formation and the style of the principal veins. The outcropping rock is slate, with few signs of veins running with the strata. The veins that were found outcropping were of the character of fissure veins, as they cut across the metals both on their dips and strikes. As they cut the metals nearly square to the course of the metals, the miners consider them as ordinary cross leads. However, cross leads are nearly always fissure veins, and these veins at Central Rawdon show fissure vein characteristics, and we look with interest for the results of shaft-sinking on the veins. The veins have a northerly and southerly course, and the vein Northup is working on dips easterly with the rolls dipping southerly. Northup's shaft is near the road on the southern side of the Glebe property, and has been sunk to a depth of 70 feet. The vein was about four inches on top, and increased to six inches in the bottom, showing gold all the way down, and is persistent in character. There is a considerable amount of alluvial and broken stone on top of the vein that shows gold well. The vein can be traced by its outcrop and "throw" for over a quarter of a mile, and there is gold in the "drift." There are other veins of the same character in the district, and gold is found in the dirt in lots of places. Messrs. Northup, Dimock & Smith have put up a mill to crush their pile of material, which amounted to about 100 tons when they started the mill. We hope this district will get a good trial to find out what is.

RENFREW.—We believe this district is getting into good hands and look for a large revival of business in the place. Mr. Turnbull has been nursing the old Ophir mill, but hopes to lay the veteran away and put up a new twenty stamp mill for Mr. North. The quantity of ore blocked out in the Empress mine justifies the outlay for a new mill. The crosscut which Mr.
