

CHINESE SUGARS.

WHAT IT IS WE MAY BE EATING !

IN VIEW OF THE INTRODUCTION TO THE PROVINCE RECENTLY OF CONSIDERABLE quantities of Chinese Sugars, it may be as well that the public should be informed, on the very highest possible authority, of the danger that may be attendant upon their use.

Professor Cameron, Public Analyst, Dublin, a gentleman who has made it his special business to examine all kinds of Foreign Sugars, Refined and other, says that certain kinds of them should never be used. He states that they contain a great number of DISGUSTING INSECTS, which produce a DISGUSTING DISEASE. Their shape is very accurately shown in the accompanying cut, which is magnified two hundred diameters. Figure 1 is under side and Figure 2 the upper. The Professor's description is as follows:

DRAWN FROM LIFE FROM INSECTS FOUND IN GROCERY

"This insect ('the *Acarus Sacchari*') is a formidably organized, exceedingly lively, and decidedly ugly little animal. From its oval-shaped body stretches forth a proboscis terminating in a kind of scissors, with which it seizes upon its food. Its organs of locomotion consist of eight legs, each jointed and furnished at its extremity with a hook. In the Sugar its movements from one place to another are necessarily very slow, but when placed on a perfectly clean and dry surface, it moves along with great rapidity." He adds that the number of "*Acari*" found in Unrefined Sugar is "sometimes exceedingly great, and in no instance is the article quite free from either the insects or their eggs." He further says: "The '*Acari Sacchari*' do not occur in Refined Sugar of any quality, because they cannot pass through the charcoal filters of the Refinery, and because Refined Sugar does not contain any nitrogenous substance upon which they can feed."

COOLIE MADE AND ALL UNREFINED SUGARS SHOULD NEVER BE USED !

Besides its being impossible for Canadian Labor to compete with Coolie Labor, rice fed and underpaid, it is well known that Eastern Countries have always been the breeding ground for leprosy and all other loathsome and horrible human diseases, and hand labor there is so cheap that there is no inducement to employ machinery. Home Refined Sugar, on the contrary, is never touched by the human hand from the moment it reaches the refiner until it leaves him a perfectly safe and purified article.

Use, Therefore, Only Home Refined Sugars.

THEY ARE ABSOLUTELY UNADULTERATED, PURE & CHEAP
