Westnofa offers a comprehensive range of health care furnishings built to meet the needs of both the patient and facility.

Company Summary

Westnofa of Canada Limited is a wholly-owned Canadian company established in 1957 to manufacture quality furniture. For the past seven years, the company has concentrated on producing furniture for hospitals, nursing homes and other paramedical institutions. From a 2,700-square-metre (30,000-square-foot) facility, Westnofa offers a comprehensive range of health care furnishings. Sales offices and showrooms are located in major centres across North America. The company is currently developing new products for specific applications, namely Alzheimer's, chemotherapy treatment, dialysis, geriatrics and pediatrics.

Company Summary

Woodlyn Laboratories Limited was founded in 1952 to supply the biomedical and diagnostic research communities with high quality animal blood sera and plasma products. The company specializes in the collection and processing of animal blood, distributing and marketing its products worldwide. Woodlyn is located on a 40-hectare (100-acre) facility, with production, animal care facilities, quality control testing facilities and offices totalling more than 1,080 square metres (12,000 square feet). The company also offers custom production of anti-seras, using a variety of host species and reservation of specific animals if required.

Woodlyn supplies high quality animal blood serum and plasma products.
