

being male with the individuals along the river, who have had land drowned, and otherwise sustained, each in their sphere, severe loss, I would suggest, for Your Excellency's consideration, the practice adopting as to the lands overflowed along the line of the Rideau Canal, by which means a regular extended and expensive survey would be avoided, and the quantity ascertained on each lot overflowed or drowned, by a division of labor, as a regular survey of the whole would be attended with a heavy expenditure, compared to the other equally, if not more efficient mode.

STATEMENT

OF LANDS OVERFLOWED ON THE SCUGOG RIVER, &c. &c.

No.	NAMES.	DESC.	Acres	QUALITY, &c.
1	John Connell, sen.,....		3 1	25 Marsh and arable.
