Cow—Sunny yard in winter	32	Gases of milk	46
Cream, commercial	105	Gerber test	49, 50
Cream, churning sweet	84	Green feed for cows	34
Creamometer	49	Green feed should be cut and fed in stable	35
Cream testing	54	Good milkers in all breeds	21
Dairy:		Hand centrifuge:	
Crops more certain	9	Essential part	74
Farms not large	10	Tensile strain	77
Farms—location	11	Best	77
Farms—well drained	11	Take 10 to 12 % cream	77
Farms—water supply	11	Advantages of	78
Farms—standard of pro- duction	12	Best place for	78
Farming—advantages	12, 14	Points to observe	80
Stable requisites	16	Difficulties	81, 83
Stable temperature	16	Heifer for dairy	30
Stable ventilation	17	Herd, establishing one	29
Stable width	19	Hot water for testing milk	52
Dairy sire	29	Ice and ice-house	14, 15
Density of milk	47	Inherited characteristics of a cow	21
Devonshire cream	74	Kindness important	30
Deep setting creaming	70	Laboratory for food analysis	104
Deep setting creaming, advant- ages	73	Lactochrome	46
Dilution separators	73	Lactometer	48
Drop behind cows	19	Lactoscope	49
Dusty feed and bedding	20	Lactobutyrometer	49
Electric currents little effect on milk	47	Lucerne clover	34
Factors influencing creaming	67	Mangers for cows	18
Farm dairy plan	63	Metamorphic theory	39
Farm inspection for city milk	103	Milk:	
Feeding calves	29	Necessary article of food	13
Feeding, principles	33	Secreted in mammal gland	37
Feeding cows twice a day	34	Clatens in udder	38
Ferment theory	39	Composition	43
Filtration of milk	104	Fats	44
Fly mixture for cows	31	Constituents, sources of	44
Floor coating	63	Constituents, variation of	45
Foods, cheap	33	Varies in composition	48
Foods, meal	34	Stands covered	60
Food cost of milk, butter and cheese	35	Milking cows once, twice or thrice a day	40
Forces for creaming milk	66	Milking, points to observe	40
Frozen milk, testing	55
