

During the continuance of the license system we will secure the removal of its administration from political influence.

We promise the passage of a measure to provide for compensation of workmen injured in our industries, and to their dependents where such injuries result in death, modelled after the recent legislation in Great Britain, and to insure in all cases the payment of such compensation.

Special investigation and supervision by the Province of matters affecting the health and well-being of industrial workers and communities; encouragement of town planning and the prevention of the growth of congested areas; the suppression of tuberculosis and the avoidance of occupational diseases.

EDUCATION.

If the youth of this Province are to receive an education to fit them for citizenship, a more progressive and adequate educational policy is urgently needed. We propose:—

To promote a more co-operative relation between the primary schools, the high schools and the universities; more liberal grants in aid of primary education; the promotion of industrial training and technical instruction in urban and rural communities; the restoration of model schools, with a view to increase the supply and efficiency of teachers.

To provide through adequate training schools a sufficient supply of competent teachers, and thus insure under proper regulations that the pupils in every school in the Province receive a thorough English education.

PUBLIC OWNERSHIP AND CONSERVATION.

We believe in and will support the public ownership and operation of public utilities, and especially the utilization of waterpowers throughout the Province for the generation and distribution of electricity; also the acquisition and operation of telephone lines.

A scientific policy of forestry, including the necessary reforestation of suitable Crown lands; the conservation of our timber resources by the re-vesting in the Crown of berths containing young pine timber; an adequate system of fire ranging to protect Crown timber; the sale of Crown timber by public auction rather than by private sale or tender; assistance financially, upon the principle adopted in regard to drainage, to municipalities that desire to purchase and reforest the thousands of acres of waste land now existing, and which increase yearly in many portions of the Province.
