

CANADIAN MINK!

We are wholesale dealers in Mink Skins—Canadian Mink Skins. We supply these rare furs even to New York trade.

Do you half appreciate the splendid advantage you have in being able to purchase this rich fur in Canada? Why, in Paris and London mink is the ultra stylish fur, and the stylish people pay three times as much as you do for a Canadian mink stole or muff not nearly as good as that which we are selling in our Toronto store to-day.

Mink stoles—perfect fur \$40.00. Mink Muffs—full designs—\$35.00.

COLONIZATION OF QUEBEC SIBERIA PROVIDES MODEL

Hon. Mr. Tarte Would Have System Initiated—The Land Should Be Kept.

Montreal, Nov. 22.—(Special.)—A special from St. Jerome says Hon. Dr. Reame, Ontario minister of public works, addressed the convention to-day on the question of colonization of the north. He said that the colonization of the north was the most successful. In the past it had been one of the great mistakes in the settlement of Quebec, that settlers were allowed to take up land in places where, when the wood was gone, there was nothing left but rocks. In Ontario, on the contrary, the directed the settlers only to places capable of sufficient cultivation to support settlers. When the reserve was established care was taken to build good roads.

Hon. Mr. Prevost said that the system of colonization reserves is the key to the solution, and that if it were put in force half the money now spent in the building of roads would produce twice the results now attained.

Hon. J. J. Tarte said: "Let the province keep its land, the heritage which becomes more valuable every year. One of the best systems of colonization in the world is that adopted by Russia in the development of Siberia. There they build roads and railways, they erect schools and offer every facility to settlers, and Siberia is being thronged and is making most wonderful progress. What we need in Quebec is a system of colonization completely independent of party interests."

Another suggestion made was that agriculture should be taught in the schools.

A SMALL INCREASE.

Montreal, Nov. 22.—(Special.)—The last of the season's coal sold by the Dominion Coal Company to the St. Lawrence ports is now off.

The total amount of coal sent by the company to the St. Lawrence this season will reach 1,150,000 tons against 1,116,000 tons last year.

ESTABLISHED OVER HALF A CENTURY

Let us make the Overcoat you want To your measure

If you have your own individual ideas as to what you want in an overcoat, there is no reason why it should not be made the way you want it.

Our cutters and workmen aim to meet the requirements of particular men and make their suits and overcoats to their order.

Here are splendid Scotch tweeds, chevrons, melton and beaver overcoats that we are making up to measure at \$28.

Silk lined a little extra.

Tailors and Haberdashers.

77 KING STREET WEST

YORK COUNTY AND SUBURBS MAY ABOLISH SUPERVISOR

Junction School Board Appoint Committee to Report—Stouffville to Vote on Local Option.

Toronto Junction, Nov. 22.—The executive committee of the public school board to-night discussed the advisability of dispensing with the position of supervisor of the town schools. He receives a salary of \$1100 and is asking an increase of \$100. While the work of the supervisor has not been questioned, the doing away with the position would make a clear saving of \$800 per year, as he would resume his former position as principal of Annette-street school.

A committee will report on the subject at a meeting of the board on Friday. The board is also considering a proposal to establish penny savings banks in the schools was favorably received.

Mr. and Mrs. C. Wright, who left the Junction July 16, on a tour of Canada and the States, are in Seattle, Washington, enjoying good health. They will spend the winter in California and return in April.

The Highland Golf Club met to-night in the council chamber when a committee was appointed to see if new grounds could be located.

The Leader and Recorder has been taken hold of by a company, with W. A. Skeans, barrister of Toronto, as editor and C. F. Deane, as manager. F. B. Wheatley, the late proprietor, will conduct the job printing department.

Ben R. Law, manager of Gus Gabel's state, Dundas-street West, has accepted a position as city traveler with McHenry Bros. of Toronto, wholesale dry goods.

Ralph Clark, formerly of the Junction, was married to-day at Newcastle, Penn.

Warm felt house slippers on sale from 50 cents to \$1.00 at the Shoe-man Dundas-street.

Stouffville, Nov. 22.—At a meeting of the council last night it was decided to submit a local option bylaw at the municipal elections in January. The early closing bylaw was repealed.

Jas. Torrance will sell by auction at the Franklin Hotel, Markham, on Friday, the 24th, 20 fresh milk cows and a lot of young cattle.

GIRL BURNS TO DEATH.

Montreal, Nov. 22.—(Special.)—Lillie White, 7 years old, residing with her parents at 318 Magdalen-street, poured oil on the stove to-day, and her clothes catching fire, the child burned to death.

TOOK ACID IN HIGH PARK A WOMAN'S LONELY DEATH

Body of Mrs. Elizabeth Smith Found Some Hours After Drinking Poison—Had Been Ill.

Ill, desperate, tired of life, Mrs. Elizabeth Smith took carbolic acid yesterday.

It was 5 p.m. when Clapham Ford, 78 Lucas-street, caretaker of the building in High Park, and Michael Dumas, 52 Dundas-street, went into the building's dancing pavilion, near the High Park-avenue gates. They saw a woman sitting in a corner. On her lap was a glass, and beside her on the table were two bottles labeled "Carbolic Acid." The burned lips and chin of the dead told the story. She had been dead for some hours, as the body could not be found.

The police were notified and Sergeant Watson took charge of the remains until removed to Millard's, the undertaker, 169 Yonge-street.

Benjamin Smith, wholesale butcher, 648 Dundas-street, subsequently identified the body of his wife. She had been in poor health for some time, and she left her home yesterday morning. Mr. Smith became anxious at her absence, made enquiries, which resulted in his visit to the undertaker.

The bottle which had contained the acid bore the label of W. H. Andrew, druggist, 589 Dundas-street. He had deceased purchased the drug Monday morning, and told him it was for disinfecting purposes.

An inquest will not be held.

YORK RADIAL PROGRESSES.

Cars to Port Credit in December—Metropolitan Nears Roach's Point.

It is likely that the York Radial cars will run to Port Credit about the end of this month. W. H. Moore, the manager, stated yesterday that he expected to have the cars running across the Etobicoke bridge by that time.

The line was completed as far as Port Credit. Next year he contemplates continuing the line through to Clarkson. He doubts whether the service will be gained to run the cars along the public highways in Trafalgar park in an endeavor to reach Oakville.

The Metropolitan Railway has succeeded in pushing its way through ahead so rapidly that tracks are laid to within two miles of Roach's Point.

A CHANCE TO INVEST.

Everybody is talking of Fort William nowadays. It is going to be the big city of Canada and real estate there is a gilt-edged investment. In another column will be found an advertisement offering choice lots in the Wayland annex. Ten dollars cash gets possession from \$20 to \$100 completes the purchase. The town is growing toward this location, and values are certain to go up. The Union Trust Company, Toronto, will give further particulars.

BUY UP TIMBER LANDS.

Montreal, Nov. 22.—(Special.)—Hon. L. J. Tweedie, premier of New Brunswick, who was here to-day, accompanied by Attorney General Pugsley, confirms the report that the International Paper Company of New York has purchased a large section of timber lands in the Miramichi district, belonging to the Edwards estate, for about \$500,000.

Not Yet Recovered.

The body of the late Chief of Police Bond of Port Hope has not yet been recovered, consequently the remains of Miss Grace, Mrs. Bond's sister, who was drowned at the same time, will be interred until his body is recovered or all hope of finding it abandoned.

A Fatal Slip.

Miss Walker, 17 Selby-street, while coming out of St. Mary's Hospital yesterday afternoon slipped and fractured a leg. She was taken home in a hack.

A Queen's Prize Winner.

Miss Florence Mary Bloy of East Dereham, Norfolk, has won the prize which the Queen gives annually to the best-conducted scholar in the King's Lynn High School for Girls.

ENOUGH NOBILITY WORK ON POLICE GUARD REMOVED

Crown Attorney Will See Where He's At Before Beginning to Issue Summonses.

Crown Attorney Curry has finished his work in the office of Jenkins & Hardy. He has taken away all the papers, documents and books that he thinks will be of assistance to him in his case against the many combined supposed to exist. The police guard has been removed, and Jenkins & Hardy and staff are once more doing business at the old stand without being supervised by officers of the law.

The books, etc., removed by Mr. Curry will be carefully examined. He has a bunch of work in front of him. It is not likely he will make any decided move until he has thoroughly familiarized himself with the contents of his store.

The attack on the publishers and the supply company will be continued on Monday morning in the police court. In the meantime several more informations will be laid against those supposed to be in the conspiracy.

In the vaults of Jenkins & Hardy, the crown attorney found stacks of affidavits that were made almost daily by members of industries supposed to be in a conspiracy of some sort or another. These affidavits were declared before notaries who have offices in the vicinity.

Far Reaching.

It is supposed that these affidavits will show that associations are in existence to regulate the sales of the following lines:

Whitelead, building paper, iron pipe, tin and tin plates, all plumbing goods, paint, glue, and all other things, lead lined oil, turpentine, range boilers, bar iron and steel, drop steel, cast-iron, sheet steel, conductor pipe, cast-iron, stovepipe, enamel, factory glass, cans, tinware, tinware, matches, woodware, wire, tacks and brads, stoves, staples, hinged stoves, harrow, hollow ware, household lanterns, shovels and spades, screws, cordage and rope, nails, galvanized nails, special wires, sugar and tobacco.

On the grocery department, only sugar and tobacco are mentioned, but there are a number of other articles the price of which are regulated. So far as is known, the grocery only association is the "Grocers' Guild," which has branches in all the cities of the Dominion.

The Dominion Association has its headquarters in Montreal, and is also associated with the board of trade organizations.

Advocates a Commission.

To Investigate Freight Agents' Association—Govt. Violating Law.

J. H. Duthie addresses the following "open letter" to Sir Wilfrid Laurier, Premier of Canada:

On the 16th of October, the cry of the press throughout the country, and some of the papers most prominent in support of your government are the loudest in demanding the appointment of a commission to inquire into the matter.

By all means let us have a commission with powers wide enough to enable it to investigate the whole matter. One of the first duties of such a commission should be an enquiry into the workings of the combined railway companies, an organization, which is competent to give the plunders, and all other things, lead lined oil, turpentine, range boilers, bar iron and steel, drop steel, cast-iron, sheet steel, conductor pipe, cast-iron, stovepipe, enamel, factory glass, cans, tinware, tinware, matches, woodware, wire, tacks and brads, stoves, staples, hinged stoves, harrow, hollow ware, household lanterns, shovels and spades, screws, cordage and rope, nails, galvanized nails, special wires, sugar and tobacco.

One of the first duties of such a commission should be an enquiry into the workings of the combined railway companies, an organization, which is competent to give the plunders, and all other things, lead lined oil, turpentine, range boilers, bar iron and steel, drop steel, cast-iron, sheet steel, conductor pipe, cast-iron, stovepipe, enamel, factory glass, cans, tinware, tinware, matches, woodware, wire, tacks and brads, stoves, staples, hinged stoves, harrow, hollow ware, household lanterns, shovels and spades, screws, cordage and rope, nails, galvanized nails, special wires, sugar and tobacco.

On the 16th of October, the cry of the press throughout the country, and some of the papers most prominent in support of your government are the loudest in demanding the appointment of a commission to inquire into the matter.

By all means let us have a commission with powers wide enough to enable it to investigate the whole matter. One of the first duties of such a commission should be an enquiry into the workings of the combined railway companies, an organization, which is competent to give the plunders, and all other things, lead lined oil, turpentine, range boilers, bar iron and steel, drop steel, cast-iron, sheet steel, conductor pipe, cast-iron, stovepipe, enamel, factory glass, cans, tinware, tinware, matches, woodware, wire, tacks and brads, stoves, staples, hinged stoves, harrow, hollow ware, household lanterns, shovels and spades
