when some vital part breaks down or fails to work properly you try to make it go by doping yourself with poisonous drugs.

Your heart, stomach, liver and kidneys are run by a power called nerve force. Nerve force is just another name for electricity. When any of these organs break down or get out of order, sickness or disease results. Now, you can't cure the trouble until you remove that is broken. The only way to do this is to give Nature the power to do it. All you need is motive power, electricity. You can't get that from drugs. Our method is to restore this electricity wherever lacking and pain to restore this electricity
wherever lacking and pain
and sickness will disappear. That's Nature's way
of curing.
Dr. McLaughlin's Electric
Belt does this. Wear it

while you sleep. Feel its invigorating stream of elcetric life in your nerves, its vitalizing spark in your blood. You wake up in the morning full of new life, new energy, and courage enough to tackle anything.

Electricity is a relief from the old system of drugging. It does by natural means what you expect drugs to do by unnatural means. It removes the cause of disease, and after the cause has been removed nature will do the rest. It gives back to the nerves and organs the power they have lost, which is their life.

MR. H. McGILLIVRAY, Box 47, Smith's Falls, Ont., says:—"I have worn your Belt for five weeks, and write to let you know the good it has done me. It has restored me to health."
