ing into Canada, and soon there would

ed States are pressing upon us and reaching out to make use of our resources for their own purposes," he declared. "They will not come for a purely philanthropic purpose, but for their own financial advantage."

"The value of our resources is now approprieted but them. appreciated by them. Every effort to seize upon them will begin. Capital, energy and business capacity will be freely employed to accomplish the desired end."

On the Threshold.

Canada stood on the threshold of a new national era. It was a duty of the country to get rid of the old shibboleths. Great national questions gave rise to political parties. To-day the greatest work was to arrive at a sys-tematic plan to protect those things that were the means of subsistence of the population so that they could be made permanent assets, prevent their control by monopoly and allow them to inure to the public benefit for all

If protective laws were framed Can-If protective laws were framed Canada might safely welcome the incoming tide of population and capital.

Mr. Sifton hoped he would not be considered heretical if he expressed doubt whether the truly democratic form of government had made good. In the United States, which was the great example of such government, the great store of wealth was becoming monopolized by the few and the great mass of population was suffering from of population of from 25,000,000 to 000 in ten years and the rapid depletion of the fertility of the soil, the United States would realize in time that just as the poverty of the masses is the great problem in Britain, such a condition of the masses in the great problem in Britain, such a condition with the soil of t condition was rapidly coming about in the United States. Nothing could prevent the great mass of the people sinking into poverty in thirty or forty years. One of the greatest difficulties in Canada was to make the people realize their power to accomplish great results with comparative ease.

Co-relation of Interests. Most of the conservation questions were co-related. The preservation of the forests affected the timber supply, climate, water supply, water power, fish and game—in fact, almost every

natural resource. Mr. Sifton sketched the history and

work of the commission, pointing out that it was an advisory board and no power to legislate.
"Thus they have very little power

sider the appointment of a medical of-ficer to give expert advice. The pollution of rivers and streams was a men-ace to public health and had given rise to great epidemics. The con sion would recommend legislation that would do away with the evil. A plan for treating tuberculosis, to which the gov-ernment could give assistance in a large way, would be prepared.

Growth of Forestry. Dealing with the development of in-terest in forestry, Mr. Sifton said that

## WHAT NEGLECT

The city treasurer gives notice that Jas. E. Brant Suffered Torments from Kidney Diseases.

and Became a Well Man-His Experience a Lesson for You.

ATHABASCA LANDING, May 18 .- (Special.) - That Kidney Disease, neglected in its earlier stages, leads to the most terrible suffering, if cure for it in all stages is Dodd's Kidney Pills, is the experience of Mr. James E. Brant, a farmer residing near here.

Mr. Brant contracted kidney disease when a young man, from a strain, and, like hosts of others, neglected it, expecting it to go away itself. But it kept gradually growing worse,

till after thirty years of increasing suffering the climax came, and he found himself so crippled that times he could not turn in bed, and for two weeks at a time it was impossible for him to rise from a chair without putting his hands on his

He could not button his clothes. He was troubled with Lumbago, Gravel and Backache, and tried medicines for each and all of them without getting relief, till good luck turned him to

other troubles speedily disappeared, and to-day he is a well man.

been informed that there was no one in Canada regarded as an educated forester, but since then there had been a great change. The name of Professor Fernow had become a household word, declared the speaker, amid applause. Public opinion had been aroused regarding forestry and this

was a great victory.

The destruction of forests in Canada by fire was absolutely appalling. Fire was the great enemy of the forest, and the most prolific cause was railway locomotives. The commised legislation that compelled the rail-ways to maintain efficient fire protection and imposing heavy fines for nonsure, but it was necessary consider-ing the tens of millions of dollars fire

loss in forests occurring annually. Protecting Water Powers. been created in the midst of an epi-demic of water power legislation. Its work had been made difficult because of political questions involved, but those who had watched the commission would say that it had clubbed friends and foes impartially wherever

its principles were involved.

The proposition to dam the St. Lawrence meant the transference of near-ly all the power to the United States side of the river, and the con had felt that it was in duty bound to "Perhaps it is too much to say that the scheme is dead," he added, "but it it is not, it has received a severe pa alytic stroke, and it is likely before

long to be in extremis.
"What I want to impress," said Mr. Sifton, "is that the commission is non-partisan, composed of men who are endeavoring systematically to influ-ence legislation affecting the great natural resources of Canada along the right lines."

The speaker spoke warmly of the good results achieved by the Ontario Fish and Game Protective Association, a work which was little known or appreciated by the public as yet, but which in ten or fifteen years would show splendid results. He beby the patronage of the Ontario gov-

Creating Forest Reserves. The speaker's reference to teh legislation enacted at Ottawa last session creating an immense forest reserve to the east of the Rockies and four hundred miles north of the international oundary, was received with applause. It would be made into the greatest forest and game preserve in the world and would be a national property.

In Ontario there was a fine example of what could be done in Algonquin

He had been informed by trappers is no medicine I like half so well, for some years ago that the beavers were almost extinct, but, under care, they

worthy one.

patriotic Canadian ought to wish to see his country realize the full possi-bilities of its length and breadth. We should be better stewards of this inestimable trust. There were other contri-

butors to the destruction of the forests by fire besides the railways—indiscrect pionickers. There was only one thing to be done to realize the object for which the meeting was called, and that

The University of Toronto had offered to the conservation commission the use of its laboratories and other facilities that might aid them in their investigations in any possible way. He was also pleased that the Ontario

## Ordered to Hospital

FOR OPERATION FOR ACUTE IN DIGESTION-DID NOT GO AND WAS CURED BY

## DR. CHASE'S KIDNEY-LIVER PILLS

A medicine that will save one from a surgical operation must be worth

The doctors seem to have made the common mistake of dosing the sto-mach when the real source of trouble was with the liver and kidneys. Anyway Dr. Chase's Kidney and Liver Pills made a complete cure and here

Mrs. F. O. Bacon, Baldwin's Mil's Que., writes:—"I was very sick and the doctors said I must go to the hospital for a surgical operation. I had acute indigestion and the liver and kidneys did not act. I did not want to undergo an operation, so I began the use of Dr. Chase's Kidney and Liver Pills and have used them

"I am feeling well now and doing I think there is no equal for acute indigestion and liver and kidney troubles such as I had and they and nothing else made me well again. There The real serious cases of indigestion

Dodd's Kidney Pills started at the cause of his troubles and cured his Kidneys. With cured Kidneys his other troubles speedily disappeared by the cause of his troubles speedily disappeared by the cause of his troubles and cured his while the subject was comparatively new, it was one that appealed to not his conclusion. Mr. Sifton said that they had to be killed.

In conclusion, Mr. Sifton said that while the subject was comparatively new, it was one that appealed to not his conclusion. and Liver Pills. One pill a dose, 25

## ten years ago, when he had suggested adding a forestry department to the department of the interior, he had been informed that there was no one been informed that there was no one patriotic Canadian ought to wish to

## JACKSON'S POINT THE PUREST ICE IN CANADA COMPANY

From the purest source in Canada—LAKE SIMCOE (JACKSON'S POINT).

This sentiment was also expressed by Byron E. Walker. The trouble about conservation, he said, was in getting every man, woman and child to realize that it was a great question of national more.

t) realize that it was a great question of national morals and national charto turn over to the forestry depart-ment of the university a large tract of land for study and experimenting.

A. Kelly Evans deploring that there were so many vacant seats, said it showed that a conservation campaign, to win results, must be backed by money. The newspapers had all endorsed the policy in no uncertain terms, but the people appar-ently would not read editorials, or if they did, would not believe in them.

Sporting Assets. He drew attention to statistics showing revenue that the province derived from tourists alone who sought sport on Ontario streams. He believed that directly and indirectly \$5,000,000 ed that directly and indirectly \$5,000,000 had been attracted to the province last year by our game fish. He also drew attention to the enormous and extravagant exportation of fish to the United States, and he questioned if one of the first things the conservation commission should have to consider was not whether it would be practical to prohibit entirely the exportation of fish to the U.S.

George Tate Blackstock, K.C., moving a vote of thanks to Mr. Sifton also showed disappointment at the attendance. "It is not creditable to the community, and not a very hopeful sign," he said. "Public opinion evidently still remains at a very low ebb. The truth is that the present status of democracy on this continent would be a great disappointment to those who planted the democratic institutions upon this soil. I should like to think that this audience showed its appreciation of the magnificent work which Mr. Sifton and his assistants, and al-

so Mr. Kelly Evans are doing. Use Gibbons' Toothache Price 10c.
