EDMUND BREESE AT

IMPERIAL THEATRE

Edmund Breese proves his merit in the Metro picture now being shown on Imperial Theatre's curtain "The Weakness of Streagth." In this play Mrs. C. J. Fisher and son, of Brooklyn. N. Y., are visiting her uncle, I. J. Wordening employer of labor, a man of unbending nature, almost to the point of cruelty. When the inner recesses of his heart are reached, however, he softens like a child and proves a blessing to those in need. The picture is of more than passing interest, as it depicts the logging and shipbuilding industry in the adjoining State of Maine. This same feature is to be shown tonight, also another of those charming "Vitagraph Country Life pictures, entitled "Satins and Calico," as well as a Drew comedy, "The High Cost of Living." Tomorpow the Imperial changes its bil again. Earle Williams is to be star player in a compelling drama of big-city life, "the Soul Master." thing, neither will one be robbed. We do not answer our opponents' desire for conquest with words, but with deeds of vigorous defense, until our opponents will also renounce any conquest, as we courselves are irrevocably determined.

"It is to be understood that such renouncement also comprises the complete liberation of Belgium. Still it would have been better if Michaelis had made this point explicitly clear to avoid any evil-meaning interpretation abroad. A chancellor who professes to adhere to the Reichstag peace programme, who wants peace, or concelliation and concession, without the forced transfer of territory and without financial oppression, cannot take from the Belgians the smallest particle of liberty they desire."

Another Change--Each Time Bettering Our Service

One of the most important changes in our store has taken place in our Pattern Department, one of which we feel mighty proud of, too. We are discontinuing the sale of Standard Patterns, and in their place we have a pattern recognized throughout the United States and Canada as a pattern of the highest standard, both as to style and trueness of measurements. You will find all sizes and one of the largest ranges of the season's choicest styles to choose from. Step over to that section on your next visit to the store. You'll be pleased. Probably one of the best features in connection with these patterns is the service they are able to give you for a very small cost, through their magaizne, known so widely as McCall's Magazine. This month it is exceptionaly interesting. We will tell you something of what it contains.

FIRST, AND PROBABLY THE MOST IMPORTANT IS:

AT YOUR FINGER TIPS, you have the most charming of the season's fashions faithfully presented on the pages of McCall's — patterns which can be obtained for every one of these designs, placing at your disposal the styles of Paris and New York as fast as the world's greatest designers produce them.
