May Get Mitchell Back

Capt. Johnny Evers will not play with the Braves for at least a month, according to President Gaffney of the champions. The star infielder is at present in the Troy Hospital, with his ankle in a plaster cast. The cast was taken off Thursday and Evers says his physicians advise him that he will be able to make the trip over to Boston about the middle of next week. He says, however, that there is no chance of his playing before the champions leave on their western trip early in June.

Will Baker Join Athletics?

New York, May 13—It will not be many days before Home Run Baker decides to play third base for the Athletics. Baker saw Connie Mack last week, and declared that if the Athletics' manager would destroy the three year contract signed in 1914, he would join the team at once. Mack stood his ground, however, and informed Baker that the contract must be enforced. The big batsman, finding that he cannot bluff Mack, probably will decide to do the proper thing.

A Friend Indeed

Robinson was one of those really good-natured souls, who are always ready to lend a hand to a pal in distress, relates the Philadelphia Ledger. "I should be much obliged," replied the other, "if you'd hold this ram just while I get that gate over there open." "Certainly," replied Robinson; and, dismounting, he boldly seized the ram by the horns. "Thanks, awfully," said the stranger, now on the other side of the gate. "The brute attacked me more than an hour ago, and I've been struggling with him ever since. So long, old chap! Hope you'll be as lucky as I was."

The largest statue in the world is now being carved in Japan. It is a recumbent effigy of Nichiren, a Japanese patron saint, cut from granite on a hillside on the island of Usuki-shima. The stone image will be 340 feet long from head to foot, 60 feet longer than the Sleeping Buddha statue at Segu, Burmah, and considerably larger than the Sphinx in Egypt.

VACUUM STREET CLEANING

In Huddersfield, England, recently a demonstration was given of a motor-vacuum street cleaner, the invention of an Italian. The machine is operated upon the principle of a rotary brush and suction, together with a system of pumps and jets for spraying atomized water on the road surface in front of the brush, thus insuring dustless and hygienic sweeping. The tests were made on various conditions of roadways, some being specially prepared to give the machine to climatic conditions, the vacuum system, and apparently it will not be long before a much-needed revolution in street cleaning will be brought about by the motor-vacuum system. Canadian cities and towns are intensely interested in this question, as, owing to climatic conditions, the vacuum system of street cleaning is particularly adapted to this country. During the last four years the export of power from Canada to the United States by three of the companies engaged in this business has increased from \$18,000,000 to \$24,000,000 k. w. h. The amount of power supplied by the same three companies to be used in Canada actually shows a decrease for the same period.
