significance to affect measurably price movements.

Despite the tremendous advances, we look for still higher prices in General Motors and Dupont. The steel stocks as a group look higher, particularly U. S. Steel, Bethiehem Steel, YB and Sloss. Wright Aeroplane had a break Saturday, but we continue bullish on it for the long pull. While the absence of much support in it in the last week or so might indicate somewhat lower prices, we think it can be purchased. C.O., Westinghouse, Airbrake, Harvester, Case, Air Reduction and Union Cable look higher in this market.
