"I have tested a package of Royal Boking Powder, which I purchased in the open market, and find it composed of once and wholesome ingredients. It is a cream of tartar powder of a high degree of mark, and does not contain either alum or phosphates, or other injurious substances.

E. G. Love, Ph.D." osphates, or other against the Royal Baking Powder is absolutely pure.
"It is a scientific fact that the Royal Baking Powder is absolutely pure.
"II. A. Morr, Ph.D."

"I have examined a peckars of Royal Biking Powder, purchased by myself in the market. I find it entisty feet front almost cornellos, or any other injurious substance.

HENRY MORTON, Ph.D., President of Stevens Institute of Technology," "I have analyzed a packers of Reyal Latting Powder. The materials of which the tomposed are pure and wholescane.

The Royal Baking Powder received the Elfact award over all competitors at the Vienna World's Exposition, 1744 at the Contemplat, Philadelphia, 1846; at the American Institute, New York, and at State Pake to organize the country.

No other article of human food has ever received and adjute emphatic, and universal endorsement from emment chemists, physicians, scientists, and Boards of Health all over the world.

Note-The above Diagram filestrates the comperative worth of various Baking Providers, as shown by Chemical Analysis and expeciations made by Prof. Schedler.

A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A simple trial of the Royal Baking Powder will convince any fair minded person of these facts. * While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indicating that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.
