A CAUSE OF INDIGESTION

People Who Complain of This Trouble Usually Are Thin Blooded.

Thin blooded people usually have stomach trouble. They seldom recognize the fact that the thin blood is the cause of the trouble, but it is.

In fact, thin blood is the most common cause of stomach trouble. It affects the digestion very quickly. The glands that furnish the digestive fluid are diminished in their activity; the stomach muscles are weakened, and there is a loss of nerve force. In this state of health nothing will more quickly restore the appetite, the digestion and normal nutrition than good, rich, red blood.

Pills act directly on the blood-making glands that furnish the digestive fluid are diminished in their activity; the stomach muscles are weakened, and there is a loss of nerve force.
