The Larimer Ditching Plow

Covered by patent in Ottawa for Canada, and in Washington for the U. S.

What the Ditching Plow Has Done.

It has ensured early sowing and better harvests.

It has kept many a son at home—drained land and the working of drained land make the boy feel that home is better than away from home.

It has given dignity to the agricultural calling. To plow, sow and reap half a crop from land left undrained has cost many a farmer name, dignity, and profit.

A few acres underdrained puts new life in the owner of land. All information from

ROB ROY SHARES.

We sold about \$2,000 worth of these shares last week. Why?

Because **INDEPENDENT OUTSIDERS** examined the property and gave their opinion to the press. Thus the public learned the news.

We are reaping the benefit.

We made a special issue of shares at \$15 each, and orders are coming in from N. E. W. and south.

As soon as this issue is sold we shall have money enough for our works, and your chance will be **GONE**.

There is now no undue risk whatever, and a few hundred dollars invested now in these shares may make **YOU** wealthy. It has been done before and will be done again.

I will tell you **HOW** if you want to know, and of one thing be sure, we will sell no more shares than we have to. Send for this report.

Strathy's "HINGE" Stay Field Fence and SINGLE POLE Gates

THE 20th CENTURY FENCE.

SHOWING HINGE MOVEMENT OF STAYS UNDER PRESSURE. STAYS CANNOT BEND & WILL SPRING BACK TO PLACE WHEN PRESSURE IS REMOVED.

A fence competitor says

"It has no equal."

A trial will convince you also.

We have since purchased the rights for the Maritime Provinces of Canada.

The product of years of practical experience, careful study and experiment under the hardest climatic conditions of heavy snow and severe frost in winter and high temperature in summer, with a variation of 150 degrees. Our Spring Post meets perfectly the requirements and overcomes all the difficulties of contraction and expansion, under a variation of 180 degrees of temperature, and has besides a reserve capacity of as much more to provide for great strain and to automatically take up the stretch in the wires. Our "Hinge" Stays so act, when under pressure of snow or other weight, that when the weight is removed the fence springs back to place, with Stays unbent and fence uninjured. A system all our own and unlike any other. We use heavy wires—high carbon spring steel wire of highest quality—but our system is cheaper and the completed cost less than any other fence. Write for full particulars, and state fully your requirements.
