## ANDERSON'S DOUBLE ACTING Force - Pump

(FOR HAND POWER OR WIND-MILL.)

The Pump proper, that forces the water, is placed near the bottom of the well; is always PRIMED and lubricated; cannot possibly freeze. Has no leather suckers of any kind, no stuffing box, no rod working inside the conducting pipe—all of which add weight and create friction; but, instead, we give you a DOUBLE ACTING SUBMERGED PUMP, so constructed that the working parts are completely balanced at any depth; will wear a lifetime. The water does not settle back on the valves between strokes, but is kept in continuous motion, producing a continuous forced stream. The best and most durable Pump in the market.
