A. W. Nicolson to support the Resolution He referred to the fact that in this city he had preached his first sermon after he had been fully set apart to the work of the ministry. His speech was graceful and very effective, sustaining fully the deep interest which had been already excited. One of the most telling points which he made was his reference to Newfoundland. He read to the meeting an autograph letter from Dr. Coke, to the first missionary who went out to this island, upon the occasion of sending him a fourth man. The letter was dated 1810. He contrasted the New-foundland of that day, with its five mission-aries, its few hundred members and its struggling existence, with the Newfoundland him investigated.

they would wander over the whole world in search of a speech, but had intended to send them to China and Bombay; and were it not for the loss that the Conference would sustain, he could heartily wish that they had goue there. It was very soon evident, however, that the subject of missions was far from being exhausted. He spoke of the fact, as presented by the report, that far from being exhausted. He spoke of the fact, as presented by the report, that Home Missions had not only brought forth fruit to Methodism but to God. The spiritual increase had been to a large state out delay: ever 140 children are now placed to itual increase had been to a large extent in these fields of labor. He recalled to the memory of the brethren the noted saying of pondence as much as possible. That gentleman, in answer to those who feared that the calling of men from England would swamp the cociety, replied, "If this swamps it, let it swamps it, let it swamp.
