may have to repair the roof you properly

British Columbia Red Cedar Shingles

They wear out in time but they don't rot.

Your Stock will benefit by a RED CEDAR SHINGLE Roof
It is Cool in Summer and Warm in Winter

British Columbia

Red Cedar Shingles

Do not rot, rust, crack or blister. They are proof against rain, hail and wind, sun and frost. They will wear out by the mechanical action of the weather before they will decay. Properly laid, they will last forty to fifty years; in many cases they have lasted longer. A shingle roof is comparatively noiseless during a rain or hail storm; it does not rattle in the wind. They have a pleasing natural color and readily take any kind of stain or paint.

The following is an extract from an unsolicited letter, written April 18th, 1916, by James S. Houston, a contractor and builder of Atchison, Kansas:

"I have been building houses in Kansas for 35 years, and I may also add that the best shingles I ever used came from British Columbia, so there is no doubt about their wearing qualities; in fact, they wear too well for us contractors, for when we put on one roof we never get to put on another in the same place; they never seem to wear out. "From yours respectfully.

"JAMES S. HOUSTON."
