that Falern Island has come into ight agair. F. leon I land, which is one of the Torge or Friendly group, in the south Pacific is the 15 puzzle of navigators. Sarcely ere charts completed showing its location when the mysterious island outirely disappears from eight. heir minds that no such i land ever exis.cd and that they must have been dreaming, it will bob up again shove the surfa e of the ocean I ke abd penny.
Falcon Island is or was-it is

lways dangerous to speak of it in be present terse-located 35 miles distant from its nearest neighbor, Tofoos, one of the principal members of the Tonga group. It was first seen in 1885 and at cre atnature of the forces which could dd another island to the thousands which already dotted the surface of the south Pacific. It was easy to determine that Felcon Island was of velennic origin. In cliffs rose more than 150 feet above the level of the island it was only necessary to dig down six or eight feet to reach a temperature which would boil water, while on the surface the hermometer only marked 85 de-

omposed of volcanic conglumerate and that there is a distant smell of sulphur in the air makes it certain that it was driven up by a submarine volcano,

The most careful scientific exam ination of the Falcon Island was that made by the officers of the British ship Egeria in Ostober, 1889. They found the island entirely uninhabited and projecting out of the coean in the shape of a high and symmetrical black oval. It was almost testitute of either animal or vegetable life, except three or four seedling plants, evidently carried to the sland by wandering birds. Two young eccount trees, not in a flourishing condition, were all the signs of vegetation, and a single sand only living things which a careful search of the island revealed.

At the time of the Egeria's visit, four years after the island appeared for the first time, the waves of the ocean, which best upon the bigh, black and barren shore of the island with great velocity, were fast eating it away. It was predicted then that within a few years it would entirely disappear unless some new volcanie activity should give it a new lease of life.

Since that visit Falcon Island has wice disappeared, only to be driven again by the resistless force operating beneath it. Later explorers have made certain the fact of its volcanic origin. They have even found some natives who, during the prolonged eruption in 1885, which resulted in the formation of the island, went in their gances from Tofoos and watched the forces of the volcano at work. Before its last disappearance, in 1898, still other visitors had discovered spertures in the upper part of the grim black cliff from which smoke and eam were still issuing.—Exchange.

THE LEPERS OF

The isolation of the lepers Hawaii is to be made more strict, There is a conviction among memthat extra precaution is required to prevent the increase of the dread sease. The eradication of it seems too much to hope for. At present there are nearly 1000 lepers at Mol-okai, all but forty-five of them being natives of the islands. Thirty are Obinese, five Americans, four Bri-tish, five German, and one Norwegian. Strange to say, there is not a single Japanese among the

It is probable that the relatives and friends of the lepers who visited Molokai a few weeks ago have seen them for the last time. According to the Honolulu Star, many of the unfortunate exiles never had any visitors, being given up as dead others have seen relatives only at rare intervals. Ave Maria. Although the visit of the Persia Shah to Belgium is now past history, one little incident of it may interest our readers. A luncheon honor of the royal visitor. Several Catholic guests refused meat when it was handed them, and this did not escape the notice of the Shah. He asked an explanation, and after ecciving it, turned to the members of the Liberal party present and inquired why they also did not follow the teachings of their religion. The equivocal answer which one accorded him did not seem to satisfy Mouzaffer-ed-Din. He professed him elf unable to understand how any Belgian citizen could turn aside
