fixing of the boundary of the reserve was that only forest land should be only to expand his oral cavity over and consolidating the empire. the exception) being excluded from the government when it selected the King as follows:the reserve. The altitude, or height

fixing the line. fixed by the Order in Council by which the reserve was set apart was, to a considerable extent unsuitable, it included, in the words of one of the writers, "only alpine country, a large. portion of which is above the tree limit, and the remainder unsuitable as regards timber supply for years to ome. Large portions of it have beer burned over, leaving bars, eroded hillsides, which were formerly covere by a thin soil and coniferous wo growth. Much country east of th line has a very thin soil and is at very high altitude and so is unfit for agricultural settlement." Many val

leys, however, are found which wi be quite suitable for grazing. Forest Fires and their Results. Fires have created terrible have with the forests of the region. In th part from Calgary north Mr. Caver hill estimates that eighty per cer of the territory covered has been burned over within the past fift years and that even within the la twenty-five years forty-eight per cen of the entire area has been deva tated. Mr. Edgecombe estimates tha at least sixty per cent. of the are: from Calgary southward has been fire-swept. Even last summer Mi Edgecombe's party lost three week

through having to fight fires.

The nature of the timber found

the slope has been directly determine ed by this repeated firing. The abur dance of lodgepole pine (a specinearly related to the jack pine often found on old burns in the eas is the most abundant timber ,an much poplar (of two or three specie is found These are the first to sprin up on burned-over land, and by the vigorous growth get far ahead of th slower-growth spruce and red fur In the northern part of the region reported on about seventy-five per cent of the area is covered with lodgepo pine in pure stand, that is, without the mixture of any other tree. In the southern part Mr. Edgecom

found that the lodgepole pine required thirty years to attain a diameter inches and sixty years to reach the diameter of nine inches. The spruce (Englemann) and red (or "Ornamental electric lamps exist Douglas fir took, respectively, ninety and one hundred and ten years to reach the diameter of twelve inches. ights are aglow, which should aid in Of an area of eight hundred square ispelling doubt and gloom; nor are miles covered by the 'southern" party we hiding our light under a bushel the land was distributed as follo Tiber, 9 per cent.; spruce and pine poles (a tree of "pole" size is from iles distant to the northwest. four to eight inches in diameter), 31 "A septic tank is constructed for the per cent .: pine and poplar, 26 per rification of the sewage which cent. poplar 10 per cent.; open grazhould efficiently prevent any nuisance ing land 14 per cent; bare rock, 10 rom its disposal. There is a complete per cent. hroughout the building."

Both gentlemen remark on the danger to the reserve from forest fires, and make recommendations as to the protection of the areas traversed. Game and Mineral Resources.
