How the Prospector Discovers a Gold Mine.

There are many people who will be surprised to hear that rarely, if ever, is one of Nature's stores of gold disclosed by a glittering on the surface of soil or rock.

Take the case of South Africa. Although gold was discovered by Edward Buiton in the Sutherland Hills (Klein Letaba) during the year 1868, the famous Witwatersrand deposits were not discovered until 1885 on the Strubens farm at Langlaagte, near Johannesburg; this indicates that the process of prospecting must be slow, for though the risks attendant on this work are great, the reward may be very attractive.

A Game of Hide-and-Seek. Whether gold occurs as an alluvial deposit or in a "reef," it is traced by the prospector with the help of a gold "pan." This is a shallow pan of light sheet iron with dished sides.

When "panning" for gold the prospector places the sand, soil, or crushed rock into the pan, and adds water to wet the substance to be panned. Then, holding the pan in a tub or stream of water, he adds more water, and by a shaking motion works the heavy mineral to the bottom of the pan. By a lapping process he ejects the sand until there remain only concentrates, among which the gold may be distinguished by its colour and relative heaviness.

There are rich gold reefs which shed gold very sparingly, and sometimes the gold is locked up in pyrites or other minerals, from which it is liberated by roasting or chemical treatment.

Sometimes gold shed from reefs is obtained near the surface of river beds; at other times the gold is found near rock bottom, or again the precious metal may even occur in an old river bed now covered with lava.

In the case of the "deep leads" of California and Victoria.

The method of discovering an alluvial deposit is obvious, but if the prospector is searching for a reef he follows the gold upstream by repeated "panning" until he ceases to obtain any "colours" (particles) of gold. Then he strikes inland from either bank until he "strikes" (meets) a reef or the gold ceases.

The Value of Optimism. In the latter case the reef may be covered up, and so the prospector, by a series of "pannings," decides upon the "strike" or comes to the reef and cuts a trench at right angles down to the solid "country" (rock in its original situation), when the reef will be "cut" or exposed.

To-night and Friday, this week (2 concerts only), C.C.C. Promenade Band concert, Prince's Rink, at 8.30. Hear the new waltzes: "Mississippi Cradle," "Little Crumbs of Happiness" and "Love's Ship."—nov14,11

ST. JOHN'S, N.F.

Says Statesmen Not Preventing Another War

SIR PATRICK McGRATH TELLS CANADIAN CLUB ABOUT NEWFOUNDLAND'S POSSIBILITIES.

Sir Patrick McGrath, veteran journalist and legislator of St. John's Newfoundland, addressed the Canadian Club at the Chateau Laurier on Saturday on the subject of "Newfoundland of To-day." Sir Patrick gave an interesting insight into the economic situation of the Ancient Colony and also traced its early history in so far as it directly affected conditions there. Newfoundland comprised 42,000 square miles, practically the same area as New York State. With its population of 285,000 people, the colony had half as many people as Nova Scotia and approximately one quarter of the Maritime Provinces.

In presenting the historical developments of the colony, Sir Patrick pointed out that Newfoundland had been looked upon as a summer place for fishing fleets, and early companies had conducted operations under the policy that there should be no permanent residents on the island. There were even laws which prohibited settlement on the island and that principle had remained in vogue until comparatively recent days. Not more than a century ago, it was a penal offence to grow potatoes in Newfoundland. Newfoundland was the oldest colony and the population had doubled during the last 60 years despite early hindrances. Newfoundland had had no immigration for 40 or 50 years and 99 per cent. of the people were native born. The industries included fishing, the making of boats, lumbering, pulpwood and mines.

Although 10,000 Newfoundlanders had been withdrawn from the fishing record catches had been made in 1917 and 1918, and these had helped the war supplies materially, particularly as the English fishing fleets had been hampered by naval operations. Newfoundland had contributed 6,500 officers and men for the Newfoundland overseas regiment, and 2,000 had served in the British naval service. A million tons of ore had been taken from the iron mines during the year before the war, and practically all had been shipped to Nova Scotia, England and Germany. The paper mills were owned by Lord Northcliffe and associates. Newfoundland was suffering from depression that was practically world-wide, but the people expected to outlive the situation, Sir Patrick declared.

"The belief is we could do better for ourselves than you could do for us," said Sir Patrick, referring to confederation plans with Canada. "There were no railway connections between Canada and Newfoundland and there was little farming in Newfoundland, so that it might be thought that Ottawa might not give proper consideration to fishing matters. One unfortunate result of the war was the diversion of trade to the United States. Previously Newfoundland had traded about equally with Great Britain and Canada, with some business going to the United States.

Men For The Navy. "Canadian business interests should be getting more of the business. With confederation, Canadian goods would enter Newfoundland duty free and you would get the advantage of an English-speaking province. There is only the English language in Newfoundland, and I doubt whether there is any country that has such an unbroken strain of English blood or not. Our people will fish or they will leave, but if we come in Canada could count on our men for a navy.

"It should not be said that, while the soldiers won the war, the statesmen are losing the peace. The statesmen of all countries are not doing all they can to prevent another war. Some statesmen are inclined to have one eye on the subject in hand and the other eye on their constituency. The people of countries are not asserting themselves sufficiently. The people are not exerting the influence to prevent another war. There should be some manifestation that steps will be taken to prevent the sacrifice of thousands upon the altar of war."

Among those present was Lord Blyth.

of Vimy, under whom the Newfoundland soldiers served during the war. Sir Patrick expressed the expectation of an early visit by the Governor-General of Canada to Newfoundland. President Desbarats of the Canadian Club, who is the Deputy Minister of Marine and Fisheries, was Chairman of the luncheon.—Ottawa Journal, Nov. 7, 1921.

Here and There.

THEATRICAL TROUPE LEAVES.—The Gladys Kirk Company, which on Saturday completed a very successful season at the Casino, left yesterday by express for Canada.

We can attend to your Herring and Codfish shipments. P. H. COWAN & CO.—nov14,31,m,w,s

Good looking Men's Velour Hats, such as BISHOP'S are showing in their present window displays, for only nine dollars, are in style to stay.

MORE COMPETITION.—Another grocery store of Water Street has entered the competition to reduce the price of butcher's meat. This store is offering choice lamb at 28c. per lb., retail.

Mrs. C. B. Dicks will be "At Home" on Wednesday and Thursday, November 16th and 17th, at 88 Circular Road, from 3.30 p.m. to 6 p.m.—nov14,11

C.L.B.C. COLLECTION.—The Collection taken at St. Thomas's yesterday, at the C.L.B.C. Anniversary service amounted to \$400 which did not include a gift of \$100 from Sir Joseph Outbridge and several other cheques donated by friends of the Brigade.

Stafford's Pres. A., both sizes, for sale at Knowling's Stores, East, West & Central.—nov14,11

The least of our worries this season is the selling of Hearth Rugs. You will understand this also when you see what value BISHOP'S are selling for three thirty-five, four eighty and six forty-five.

GIRLS SENT DOWN.—Two girls, one belonging to Bell Island, were charged in the Magistrates Court today with being drunk and disorderly, and using obscene and profane language. They were sent down for 30 days each.

If you want the best in High Class Engraving on Gold, Silver, or French Ivory, bring your goods to KARL S. TRAPNELL, 307 Water Street.—nov14,11

HERRING FISHERY GOOD.—A report to the Marine and Fisheries Department from Bonne Bay states that the herring fishery on Saturday was good, and on Friday last about 50 barrels were taken.

Our office is now on the 2nd floor, 276 Water Street. P. H. COWAN & CO.—nov14,31,m,w,s

HOLDING AT HOME.—The Kirk Men's Association is holding an At Home on Tuesday night next in the Presbyterian Hall. A short debate and concert will be held. The reason for the At Home is the formulating of a winter programme.

DANCING.—Miss Miller's Class, to-morrow Tuesday night, at 8.30, C.C.C. Hall.—nov14,11

DELAYED BY SNOW.—The incoming express did not get away from Port aux Basques until yesterday afternoon owing to the late arrival of the Kyle, and is not due here until early to-morrow morning. Considerable delay has been caused by snow in the region of the Gulf Topsails and the use of a plow has been necessitated.

Have tea with me at the Sale of Work in the K. of C. Memorial School, Wednesday and Thursday, Nov. 16th and 17th. Admission 10c.—nov12,31

INTERESTING MOTOR CASE.—An interesting motor case will be heard in the Civil Court to-morrow, which is based on a claim for damages resulting out of a collision during the summer. The principals in the case are a well known tailor and a business man and counsel concerned are Messrs. L. E. Emerson and J. O'N. Coaroy.

NOTE OF THANKS.—The Cowan Mission Association beg to express their very sincere thanks to all the ladies who so generously contributed to the Pinned Party at the Old Ladies' Home and acknowledge with thanks the following donations for money:—Lady Outbridge, \$5.00; Lady Crossley, \$5.00; Mrs. H. Russell, Mrs. B. Goodridge, Mrs. A. C. Goodridge, Mrs. Shears, Mrs. A. Fraser, \$2.00 each; Mrs. Geo. Knowling, Jr., \$1.50 and a box of turnips from Mrs. (Dr.) Campbell; barrel of turnips from Mrs. R. B. Job.

MINARD'S LINIMENT USED BY VETERINARIANS.

Electors of the Municipality of St. John's

LADIES AND GENTLEMEN.—Having been elected by you as a Member of the Municipal Council in the year of 1910, and served you faithfully for four years until 1914, when the Government of that time appointed a Commission to take over the affairs of the City, I now offer myself as a Candidate for your suffrages in the forthcoming Municipal Election.

The four years' experience I had at the Council Board will enable me, if elected, to perform the duties satisfactorily. My interests and yours are identical, and it is only from men who have a common interest with yourselves that you can hope for satisfaction.

At the recent session of the Legislature a new Charter was enacted, investing the Municipal Council with increased powers, which will be a source of benefit to the city and people in general.

I fully recognize that the affairs of the Municipality are such as to call for the earnest endeavours and unceasing attention of those who may be selected by you to administer the City's Government during the next four years, and so far as I am concerned I shall leave nothing undone to forward the interests of the people of St. John's, and to the best of my ability I shall strive to maintain an honest, upright and capable management of its business.

The health and cleanliness of the city are matters that shall have my most earnest attention.

I trust to be able to make a personal call on you, or meet you in public, when I shall be able to lay my views more fully before you.

I have the honour to be,
Ladies and Gentlemen,
Your obedient servant
nov14,21,m,s CHARLES W. RYAN.

Civic Electors of St. John's

LADIES AND GENTLEMEN.—Having been requested by a number of influential citizens to offer myself as a Candidate in the forthcoming Municipal Election, after due consideration I have decided on doing so.

I will, if elected, co-operate to the best of my ability with the newly elected Mayor and Councilors to further the interests of the City.

The great need of a public market place is one of the necessary requirements of the city, and if elected, the procuring of such a public utility shall have my earnest consideration.

There is much to be done towards the improvement of the city, should the finances of the Council allow.

But at the present time we are all passing through a period of stringency that calls for retrenchment and economy, the raising of any new loan by the city that would further increase the burden of the taxpayer should not, in my opinion, be undertaken at the present time.

Soliciting your votes and influence in the contest and assuring you of my best efforts if elected,

St. John's, Nov. 14, 1921. DENIS J. GALWAY. nov14,11

What They Died For.

Such an act of knightly homage as General Pershing performed at the tomb of the Unknown Warrior recalls the victorious comradeship of our two nations in the great war, and strengthens with new purpose our comradeship in the world peace which is yet to win. And the announcement that the King has conferred the supreme distinction of the Victoria Cross on America's Unknown Warrior reciprocates the great Republic's tribute in a spirit which both nations appreciate.

All those young lives were sacrificed to make an end of aggressions against Liberty. To that the Unknown Warrior in his silent tomb bears perpetual witness which none dare deny. If it were otherwise "nearly 1,000,000 British dead from many continents"—whom the Premier eloquently eulogised—as well as their Allied comrades, made the supreme sacrifice in vain.

That can never be. But the Disarmament Conference next month will be the acid test. The war will be won in its full purpose only when the solemn pledges which General Pershing and Mr. Lloyd George exchanged at the tomb recently are ratified by the American and British peoples in a covenant of permanent peace.—Daily Mail.

Cargo of Reindeer for Canada.

The Hudson Bay Company's steamship Nascopie has sailed from Norway with a full cargo of reindeer to initiate the reindeer culture project in Baffin Island. The animals will be bred for dairy products, meat, hides and draught purposes, and if the venture proves a success will supply the western Canadian market as well as the northern peoples' within a very few years. The company was incorporated under a Dominion charter last May, with Mr. Stefansson, the organizer of the reindeer scheme, as one of the directors. It has obtained a large grazing territory on the southern part of Baffin Island.

"Gassed" Plants.

Amazing possibilities lie in the science of agriculture. Recent experiments have shown that crops may be increased from one and a half to four times by an alteration in the air which the plants breathe.

The method is a simple one, and consists of increasing the proportion of carbonic acid in the air. In the recent experiments, the carbonic acid in the air was increased over one hundred times; it is claimed that as a direct result the plants under treatment grew faster, stronger, bloomed earlier, and produced more fruit.

Potatoes, sugar-beet, barley, onions, and peas were among the crops treated, and in every case extraordinary improvements were noticed. A "treated" plot of potatoes yielded four and a half times as much as an "untreated" plot; the barley yield was double, the onion yield trebled. Difficulties in using this treatment on a large scale are such as adverse winds blowing the gas in the wrong directions, and the expense involved in laying pipes to the fields. But in greenhouse cultivation, the new cultivator will do wonders, and the recent experiments fully justify further exhaustive researches in this wonderful new method of increasing the crops.

Filming Operations.

Furthering the interest of the medical world, a very wonderful camera has been invented which enables photographs to be taken of every phase of an operation in the operating theatre.

The device is, in fact, similar to a cinema operating-machine, and is worked by the foot of the operating surgeon. Automatically supplying its own light, this ingenious device in no way interferes with the surgeon's performance of his duties, while the instrument can be operated at will at the surgeon's discretion, and when he deems it necessary to "close up" a certain delicate phase in the operation is easily obtained.

The value of such a device is obvious. Besides providing an excellent

How fine cooks make cream soups to-day

After eating a rich cream soup somewhere, do you sigh and say to yourself "if I could only afford to use real cream, I could serve soup like that, too!"

The chances are that the soup you would like to duplicate was not made with cream at all. For many fine cooks have learned a culinary secret that makes of cream soups a banquet dish at every day cost.

The secret is—make them with Libby's Evaporated Milk. For twenty years Libby has worked to give a finer and richer milk to consumers. Their plans were far-reaching. First they sought out the finest pasture lands in America. There they encouraged the breeding of splendid milk herds and the use of all the appliances and practices of scientific dairying. And there they established their milk condenseries so equipped as to assure absolute purity and cleanliness.

At those condenseries the whole milk from the fine herds, with the cream left in, is canned for you. Half the moisture is taken from it by evaporation. Nothing is added to it. So you have in this milk just the rich, pure product of the finest cows, but with twice the food value, twice the butter fat, of ordinary milk.

This milk makes cream soups so smooth, so rich, so mellow that they taste like the soups made by extravagant cooks.

Used in coffee, this milk gives a creamy richness at half the cost of cream.

Try it in your favorite recipe where cream or milk is called for.

Your grocer has it or can get it for you.
