

OSMAI DIGMA DEFEATED.

GEN. GRAHAM'S LITTLE ARMY SCORES ANOTHER VICTORY.

Terrible slaughter of rebels—The British in possession of their camp—A desperate encounter.

LONDON, March 13.—A despatch from Gen. Graham, dated Osmay Digma's camp, 11.40 a.m., says—The camp of the enemy has been taken after hard fighting. Over 70 British were killed and 100 wounded.

The rebels opened fire on Graham's forces at 1 o'clock this morning. The British formed to repel the charge, but none being made, the men were ordered to lie down again. The rebels fired continued all night. The British did not reply. One man and two men were wounded and one man killed. The rebels directed their fire especially towards the hospital wagons, which were conspicuous in the moonlight.

The surgeons and General Graham's staff officers had many narrow escapes. At sunrise the Gardner gun and a nine-pounder were turned against the rebels, and with 1300 yards of the British, and afforded an excellent target.

The Arabs were soon compelled to retire to the main position. Stewart's cavalry arrived at 6.30, and took a position on the British left so as to turn the enemy's right. The engagement soon became general. The infantry and artillery completely smashed the enemy from their pits and trenches. The battle had not lasted over half an hour when the victory of the British was made certain.

As the British advanced, men sprang up sometimes within 200 yards of them, armed with spears and throwing huge darts. These would charge upon the British at break-neck speed until the latter's bullets laid them low. The British stormed the works and the rebels were in force. The blacks held out their shields and spears against the bullets and bayonets until the trenches were a mass of graves. It is reported that over 1000 rebels were killed.

The loss of Osmay Digma's forces was 2450. The British forces advanced in two brigades, which were thrown into the form of squares. A series of encounters followed until the British were within 100 yards of the rebels. The British charged the leading square, spearing many British. The soldiers inside the square immediately closed ranks, and the British met with obstinate resistance. The advance was again resumed when the immense hordes rushed upon the British from both sides.

A terrible struggle ensued. The Arabs fought with the greatest pluck and bravado, but nearly all were killed. The second brigade met with obstinate resistance and was at one time repulsed. The Gatling and Gardner guns fell into the hands of the rebels and were used to mow down the British ranks. The British advanced upon the rebels when the British gained possession of the rebel camp.

The Hussars made a forward movement and cut off the rebels. Assistance to the British is hoped they will save the families of the massacred garrison.

A number of rebels still hover around the camp, and the British are being watered. The natives guided forth when the square was broken. Further fighting followed. The battle raged two and a half hours. The rebels lost is estimated at 4000 killed and 6000 wounded.

The news has telegraphed Gen. Graham her congratulations upon yesterday's victory. The government has received congratulations upon the victory from the British ambassador in Cairo. The rebels under cover of smoke crept close up to the British lines and dashed against the main square, firing their rifles and throwing themselves upon the bayonets of the British garrison and receiving. Great confusion ensued. The sixty-fifth regiment, which were upon the marines, when all became incensed.

Gen. Graham and staff did their utmost to rally the men. Assistance from the other brigade prevented a disaster. There were many narrow escapes among the officers. The horses and the pluck shown by the rebels was unexampled.

BISMARCK IN THE REICHSSTAG.

Greatly With Criticism of Bismarck from Left. BERLIN, March 13.—Bismarck made a speech in the reichstag to-day justifying the course he had pursued in refusing to transmit the Lasker resolutions to the reichstag. He said he had recognized the good intentions of the American congress, but was unable to harness himself to the car of the opposition. The relations between Germany and the United States have always been good and nothing has occurred to disturb those relations. From the outset I regarded the resolutions touching Lasker as an expression of the good feeling of the American congress toward Germany. I would have presented the resolutions to the reichstag but it expressed a conviction that Lasker's labors had been very useful to Germany. This clause was directed against the policy which in the emperor's name I have been pursuing and which Lasker had opposed for years. Herr Lasker belonged to an opposition group who made immense capital out of his merits.

The speaker was interrupted at this point with loud cries of "shame!" He turned indignantly toward the quarter whence the cries came and advancing shouted: "The cry of 'shame' is an insult to me and demands for me the protection of the president. They should have called 'shame' on those who carried on political intrigues at Lasker's grave." Dr. Haedel, progressing in it is a matter of profound regret that Bismarck should have uttered no single word in praise of Lasker. People are accustomed to reserve reproaches for the living; why has Bismarck not spared the dead?

The chancellor retorted that he had not acted in judgment on the dead, but those who had tried to glorify the deceased had done so. Haedel urged that the friendly sentiments of the resolutions should have been recognized without too carefully weighing the words in which they were expressed. Bismarck contended that the exchange of complimentary parliaments was highly inappropriate, but he added that Haedel, if he so pleased, could introduce a motion conveying the thanks of the reichstag to the house representatives for the expression of sympathy.

The appearance of Bismarck in the reichstag is generally attributed to his desire to maintain friendship with the United States.

The bill to transfer the Welland railway to the Grand Trunk company was passed.

On Mr. Kilver's bill to amend the several acts relating to the Toronto, Grey and Bruce railway, Mr. Miller objected to the declaration in the preamble that the road was for the general advantage of Canada. This railroad was a loan work.

Sir Charles Tupper said the powers to regulate the railways were vested in the federal parliament by the British North America act. Mr. Cameron (Ontario) said the Ontario courts had decided that local legislatures had nothing whatever to do with railways.

The Northern railway company's bill and the bill respecting the Hamilton and Northwestern railway company were passed after some discussion.

A SOUTHERN FRED MANN.

Family Murdered by a Farm Hand and Two Others—The Tragic Incident.

LOUISVILLE, March 13.—John Martin, aged 78, his wife, two grown-up daughters and son, aged 12, were murdered in their house, twenty miles from Springfield, Tenn., Wednesday night. Martin had just returned from Nashville, where he had secured a settlement of a pension claim. The rest of the house was broken down with an axe. Martin was found with his head split open in two places and forehead crushed. The walls and floor were spattered with blood. Mrs. Martin must have been killed as she started from bed. Her arms were broken and a finger was horribly mangled. The boy was choked to death in the trundle bed. The girls slept in the next room, and were outraged before their skulls were crushed. There was evidence of a frightful struggle. George French, a farm hand, was suspected and arrested. He told a contradictory story of the crime. The boy was strung him up to a tree. On being lowered he confessed that he and Jim and Doc Carter, negro workmen upon Squigg Davis' farm, had planned the murder. He said they found \$1200 in the house and divided it. French was immediately jerked up and strangled to death. The other two were fired into his body. The mob then captured the two negroes and hanged and shot them.

After the above was in type its value as a new item was knocked out by the receipt of the following:

DEATH IN THE COAL MINE.

OVER 150 MEN KILLED BY AN EXPLOSION IN VIRGINIA.

Terrible and Horrified Bodies—A Terrible Scene of Destruction—How it Happened.

POCAHONTAS, Va., March 13.—An explosion occurred in the coal mines here last night at 12.30. The work of destruction was horrible and complete. There were 150 men in the mines at the time, not one of whom is believed to have escaped. Those who are not killed out right have most likely perished from the aftermath. The cause of the explosion is not yet definitely ascertained. The entries to the mines are full of bad air.

The presumption is that one of the miners struck a fire. Several miners ventured in the mines this morning, but could not long endure the foul atmosphere. A number of bodies were discovered, horribly mangled; some with the head torn off, others with the limbs all gone. Houses two or three hundred feet from the mines were overturned, and the large ventilator of the Southwest improvement company was blown to atoms and the mines cannot be entered until another is constructed for the purpose of freeing the atmosphere of the suffocating fumes. This work is now progressing. Large forces are constructing offshoots and perfecting arrangements for the internment of the dead, the most of whom are foreigners.

It has been ascertained that the accident was caused by men going too far with lamps. All the machinery is reported a total wreck. Little progress is made in the recovering of bodies. At least 150 men were killed.

Paving Contractors Getting \$14,000 For Accidentally Destroyed City.

The executive committee of the city council met yesterday afternoon. Present: Ald. Denton (chairman), Maughan, Hunter, Shaw, Smith, Defoe, Lobb, Blevins. James Ward's complaint against excessive drainage assessment was referred to Commissioner Maughan. John Baxter, to whom was referred the case of Archibald Macdonnell, fined for keeping an unlicensed pool table by Ald. Love, J.P., reported that he could see no reason why the fine should be remitted, and it was not. Commissioner Maughan reported that he could not recommend that W. Corrie's claim for over-assessment be considered. Tenders for stationary and blank books for the city's office were referred to subcommittee for a report.

John Baxter appeared before the committee and made a vigorous recommendation of the board of works that Clyde street be opened and extended westerly to Grosvenor avenue under the initiative paving contract. The recommendation was adopted. H. L. Hime, on the ground that it had been referred back to often, opposed John Baxter's request, but the matter was sent to a long and lively discussion took place on a clause in the report of the board of works recommending the opening and extending of Clyde street. The recommendation is based on the plea that when King and Queen streets were paved the contractors, "to oblige the public and not to injure the contractors," agreed to complete half the road to the tracks and then the other half. The contractors went on with the work in this manner without ever being asked that the "extra" would be allowed. The board of works, however, passed the "extra," but Ald. Smith insisted that the contractors should be paid. "Even if the money is to be paid," said Ald. Smith, "we should wait until the snow clears away and see whether the contractors are to be paid. Ald. Turner supported the report of the board of works and said he had examined the blocks in some portion of King street and found them to be of the same quality as those on the other side of the street.
